Declassified E.O. 12356 Section 3.3/NND No. 785019

SWITCHGEAR & TRANSFORMERS AT INDUSTRIA GOMMA SINTETICA TERNI

TRANSFORMERS

4 No. 3 phase 80 KVA Volts 525/220 - 127 Frequency 50
6 No. 150/5 Frequency 42-50 Current Transformers.
10 No. 5500/110 Voltage Transformers.
1 No. 4 KVA Single Phase Transformers.

PUMPS

3 No. - Electric Drive.
Motor Rating 1.5 HP 1450 RPM 220 Volts Delta
28 Amps Freq. 50.
Pump Rating 630 Litres per minute at H3 MT.

3 No. - Pumps with Motors.
Motor Rating 2.5 HP 500/290 Volts 6/3.46 Amps
Freq. 50 1450 RPM.

Pump Rating (German) as below

Mano Forderhoke	FLS 25
Fordermenze	L/S 0.6
Sperz Gerv	Kg/CM^2
U/Min 1450	P.S. 2.5

1 No. Pump as above deficient of Motor.
1 No. High Speed Pump Booster 2" x 2"
No Rating available.

Air Coolers or Fume Extractors.
18 No. Motor Rating only available.
H.P. 2 Voltage 220 Delta Amps 5 RPM 2800 Freq. 50.

In addition to the above there is a Transformer Distribution Station on which construction has been suspended. This consists of the following :

10 No. Panel Switchboard with: (a) Four incoming Transformer panels.
(b) Six outgoing Dis. panels.

Three of the Transformer panels are complete with automatic oil break switchgear. No volt, overload releases.
Rating 1000 Vots at 500 Amps. NO instruments on these panels.

Five Outgoing Dis: Panels are complete with Overload release gear, switches and isolating switches, ampmeters, No Votmeter.

1 No. Automatic overload release switch 15,000 Volts at 500 Amps.
Not installed.

1 No. Automatic Release switch 15,000 Volts - 200 Amps.

The Transformers for this installation are not to be found on the factory site.

Further, on the premises the accessories for this sub station can be found either crated up or in existing racking.

It is the intention to withdraw the R.E. staff from these premises in the near future and hand back to owners.

Declassified E.O. 12356 Section 3.3/NND No. 785019

SUBJECT: Electrical Equipment at Industria Gomma Sintetica, Terni

TO : Allied Force Local Resources Section, A.F.H.Q.

1. Reference is made to your letter LRS/R-56 dated 11 February 1945, Subject Switchgear and Transformers at Industria Gomma Sintetica, Terni; requesting information as to whether certain ~~electrical~~ equipment is needed ~~in connect~~ in connection with the electrical rehabilitation program.

2. With the exception of the following material, which it is requested be earmarked for electrical rehabilitation, ~~and frozen for~~ 2:00 to be released only by this headquarters, none is required.

2. The specific items mentioned below will be needed in electrical rehabilitation, and it is requested that they be frozen, to be released by this headquarters when needed. None of the other equipment is needed.

3. your ~~attention~~ action in bringing this information to our attention is appreciated.

23 January 1945

SUBJECT: Maintenance Material for Italian Power Plants.
(Requisition AC-ENG-72-45)

TO : Headquarters, Allied Commission, APO 394
(Supply and Resources Section)

Reference your RD-400/162 of 15 January.

1. Requisition AC-ENG-72-45 has been screened by the interested staff sections of this headquarters.

2. Material in columns headed "Southern Italy" and "Central Italy" will be forwarded to the CCAC for consideration as Category A requirements with rating two, under requisition No. MGS-261-ENG.

3. It is noted that no provision is made in this requisition for Northern Italy. It is considered that the above mentioned supplies will be available to meet urgent requirements of the North if it is determined at the time of receipt that Northern demands are more immediate.

4. Material for rehabilitating electrical power in Sicily and Sardinia for a period beginning six months to one year after May 1945 has not been determined to be a matter of military responsibility, and it is suggested that this portion of the requisition be submitted under Category B procedure. In our request for allocation of supplies for the mainland, we intend notifying the CCAC that the AC has this under consideration.

4. No items are at present available from theatre stocks. However we intend to request further investigation, and you will be advised of availabilities. The forwarding of the requisition for mainland requirements will not be withheld pending such determination. 2393

Declassified E.O. 12356 Section 3.3/NND No. 785019

1) - N°1 Servomotore per valvola rotativa, I° Gruppo - Peso: 4 Q.li
1) - N°1 Eccitatrice I° Gruppo - Peso: 6 Tonn.

Vi preghiamo di voler provvedere, come da accordi verbali, al trasporto dei suddetti materiali. I pesi relativi sono riportati nell'elenco soprascritto, le dimensioni d'ingombro approssimate sono indicate nei corrispondenti disegni di massima contenuti nell'allegato. L'ordine di precedenza per il trasporto, fissato dall'Acciaieria in armonia col piano di lavorazione, è quello dell'elenco.

Vi facciamo presente che per poter ripristinare il I° Gruppo occorre trasportare in Acciaieria i pezzi di tutti e due i gruppi in modo da poter utilizzare quelli più facilmente riparabili.

Poiché è Vostro desiderio, ed anche il nostro, che la Centrale di Cotilia venga al più presto ripristinata, è necessario che il trasporto in oggetto venga effettuato con la massima urgenza, in modo che possano essere rispettati i turni di lavorazione già predisposti dall'Acciaieria e siano evitate dannose perdite di tempo che altrimenti si verificherebbero.

Distinti saluti.

the list, accordingly with the workings that are going on in the steel-Works. We wish to point out that in order to rehabilitate a first unit, it is necessary to carry to the Steel-Works pieces of both units so as to make use of the more repairable ones.

It is your desire, as much as ours, that Cotilia station be rehabilitated as soon as possible; so it is necessary that this transportation takes place with great urgency, so that the shifts of workings in the Steel-works might be respected, and serious losses of time might be avoided.

Declassified E.O. 12356 Section 3.3/NND No. 785019

5 JUSTIFICATIONS:

The 620 Tons of Cement requested on this Form is required in order to construct a Bridge over the Fiora River at Km.110+450, on route N° 1. The proposed construction plan has been laid out in such a manner that the present emergency built Military Bridge, will not be disturbed for this reason the Military Authorities, who have approved the proposed project, prefer to accept the risk of a washout of the temporary structure rather than to divert cement ermarked for other Military Projects.

Since the proposed plan of the new bridge covers a major road improvement, in addition to permanent rebridging the Fiora River, this Bridge should be built.

Therefore it is requested that this allotment of Cement be granted at once. The netire Tonnage can be accepted in one lot and paid by the contractor Impresa Ugo CALDERAI. However from the storage stand point it would be advantageous to authorize withdrawal by the month as shown on the face of Mat 10.

PAPIGNO, 3 Febbraio 1945

OGGETTO: Refrigeranti alternatori Centrale di Galleto

I quattro generatori della nostra Centrale di Galleto hanno ciascuno un impianto di refrigerazione dell'aria degli alternatori, costituito da cinque refrigeranti ad acqua. Per i refrigeranti del primo gruppo, già in funzione, e del terzo che entrerà in esercizio a breve scadenza, si è provveduto con mezzi di fortuna, impiegando le parti utilizzabili dei refrigeranti di tutti e quattro gli impianti. Per quelli relativi al secondo e quarto gruppo, che entreranno in funzione successivamente, si deve invece, procedere alla loro ricostruzione integrale.

Ogni impianto è costituito da cinque refrigeranti aventi ciascuno 1236 tubi della lunghezza di metri 2,20. Per i dieci refrigeranti relativi ai due gruppi, e per altri tre che dovranno costituire una indispensabile scorta, sono necessari complessivamente n° 16008 tubi aventi ciascuno le seguenti caratteristiche:

lunghezza	2,20	m.
diametro esterno	15	mm.
spessore della parete	0,6	mm.

2382

Non essendoci possibile provvedere direttamente alla costruzione di detti tubi, preghiamo codesta A.G. di volerceli fornire.

Il materiale costituente è l'ottone, e ne occorrerebbe circa

./.

Il Foro competente per la decisione di qualunque controversia nel confronti della nostra Società è quello di Genova.

Declassified E.O. 12356 Section 3.3/NND No. 785019

6,5 Tonn.

Qualora non fosse possibile costruire i tubi in oggetto in ottone, potrebbe impiegarsi il rame per un quantitativo complessivo di circa 7 Tonn, e a tale scopo potrebbero essere utilizzati i rottami di rame di cui noi attualmente disponiamo.

Riteniamo che il lavoro di trafilatura possa essere affidato alla Ditta Corradini di Napoli o alla Bombrini-Parodi - Delfino di Colleferro.

Oggetto: Centrale geotermica di Cetara (Ischia-Napoli)
(Soc.Forze Endogene Napoletane, Napoli, via P.E.Imbriani 42)

Sig. Colonnello,

mi consenta di attirare la Sua attenzione sulla particolare situazione elettrica dell'Isola d'Ischia. Problema questo in sè stesso assai modesto, ma che ritengo meriti di essere considerato non fosse che per le così eccezionali particolarità che esso presenta.

Nell'Isola d'Ischia il servizio è attualmente assicurato consumando nafta (motori diesel) per circa 25 tonnellate mensili. L'utente principale è il Cantiere navale dell'isola.

Esiste però un impianto geotermico che sfrutta l'acqua termale del sottosuolo, ad una temperatura di 92 - 98° C, servendosi di un fluido intermediario (cloruro d'etile) che a sua volta aziona il gruppo turbo-alternatore. L'impianto, di concezione assolutamente nuova, è oramai completo in tutte le sue parti ed essendo previsto per 250 kW - può da solo sopperire all'intero fabbisogno dell'Isola - Per poter entrare in funzione mancano soltanto 2 tonnellate di cloruro d'etile ($C_2 H_5 Cl$).

Questo cloruro d'etile è stato a suo tempo ordinato alla Società Farmaceutici d'Italia di Milano; ma l'ordinazione non ha potuto aver seguito.

Vorrei pregarLa di voler far esaminare dai Suoi Uffici la possibilità di importare dagli Stati Uniti le 2 tonnellate di cloruro d'etile che sono necessarie. Con tale importazione l'impianto potrà entrare in funzione; contemporaneamento sarà sospeso il funzionemento delle attuali centrali Diesel; segue da ciò che coll'importazione, una volta tanto, di 2 tonnellate di cloruro d'etile, si eviterà l'importazione, ogni mese, di 25 tonnellate di nafta.

2283

Ltr Col Pepper
Dec 7/2

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

La convenienza dell'operazione è dunque manifesta sia nei riguardi del tonnellaggio, sia nei riguardi del costo di produzione dell'energia.

. . . . . .

Per ottenere questa importazione occorrono particolari richieste? Inutile dirLe che la Società proprietaria dell'impianto (Soc. Forze Endogene Napoletane, Napoli, via P.E. Imbriani 42) ed io personalmente rimaniamo a Sua completa disposizione per fornirLe tutti gli elementi che Lei ritenesse necessari.

Le sarò molto grato se vorrà farmi conoscere il Suo pensiero in merito a quanto sopra e, ringraziandoLa in anticipo, La prego di accogliere, sig. Colonnello, i miei più distinti ossequi.

(Giovanni Silva)

JUSTIFICATION : These batteries are required to make up complete units, because batteries received under requisition MGS-217 Siq Dated 25 Sept. 44 were found to be contaminated with water. The complete flashlights are for issue to Public Utility Companies and the issue cannot be completed until additional batteries are supplied.
It would appear that the batteries have been water logged for some time since some are completely rusted through.

P.W. & U. S/C HQ A.C.

STOCK No.	ARTICLES	UNIT	ON HAND AND DUE	CONSUMED	REQUIRED	APPROVED
-	Crystal glass water gauge tubes for Springfield Boilers Length 559 mm external diam.20 mm internal diam. 12 mm.	each	--	--	100	
-	Crystal glass water gauge tubes for Babcox and Wilcox boilers Length 420 mm External diam 19.5 mm Internal diam 11.5 mm	each	---	---	150	
	Water tubes for above boilers length 6.50 metres external diam 76 mm suitable for pressure of 26 atmospheres	each	---	---	200	

JUSTIFICATION: - The above material is required urgently for the Steam Station of Capuana Naples. All the stocks have been used up and it is now impossible to find or put into manufacture in this country. Capuana is the most important steam plant in Southern Italy and it is in operation daily it being the only plant that Naples can depend upon in the event of interruption of the southern network. The capacity of Capuana is 40.000 KW this will be a serious loss to the Southern system in the event of the station being forced to shut down.
Shipment is requested at an early date.

(all'attenzione del Magg.Price)
= R O M A =

Risposta alla lett. N.° 306/PWU
del 8/1/45

56

OGGETTO: Prodotti bloccati.

In risposta alla nota sopra citata si comunica quanto segue in merito all'esito delle domande di assegnazione di prodotti bloccati:

1) - Lettera I2/I2/44, 302/PWU - relativa a richiesta di materiali della Soc. Lurderello - (Impianti elettrici)

Lettera dell'11/I2/44, 300/PWU - relativa a richiesta di materiale da parte della MAT - (Carburo di calcio)

Le relative domande, trattandosi di prodotti controllati dall'A.C., sono state inoltrate nel dicembre scorso alla Sottocommissione Commercio per l'assegnazione del materiale richiesto, secondo le modalità precedentemente concordate con tale Sottocommissione.

2) - Lettera dell'11/12/44, 303/PWU - relativa a richiesta di materiale della Soc. Galleto-Terni - (Grasso animale)

La relativa domanda è stata inoltrata per competenza alla Div. IV^ di questo Ministero (Comm. Lubrano). Si provvederà alla eventuale assegnazione del prodotto in relazione alle disponibilità, nella prossima riunione dell'apposita Commissione.

3) - Lettera dell'8/12/44, 306/PWU - relativa a richiesta di materiale da parte della ICEM - (catrame)

La domanda non risulta pervenuta all'Ufficio competente, e pertanto si prega di volerne inviare una copia. 2359

SUBJECT : Construction of Provvidenza and S. Giacomo Power Station of Terni Coy.
REF. : R5/5T6/2/1
DATE : 20 January 1945

23 JAN 1945
A. C.

Herewith original letter from the Terni Coy. dated 30 Dec. 1944 with schedule of materials required to complete the Provvidenza and S. Giacomo power stations.

In view of the magnitude of the work and the national rather than local importance of these installations, it is thought probable that you have already determined your policy in regard to completion of their construction and dealt with the head office of Terni over the matter of materials.

Pending receipt of your instructions we are not, therefore, taking any action.

TERAMO PROVINCE

Impianti sul Vomano

Centfale Elettrica San Giacomo.

Sentiamo il dovere di illustrarVi le opere che nella provincia di Teramo e nella limitrofa di Aquila noi stiamo eseguendo e che rivestono carattere di interesse nazionale.

Due sono le centrali elettriche in costruzione, una a Provvidenza in provincia di Aquila della potenza di HP.210.000, l'altra a San Giacomo in provincia di Teramo della potenza di HP.300.000 raddoppiabile. I lavori per la centrale di Provvidenza non sono ancora al punto di poter far funzionare in breve tempo la centrale, quelli per la centrale di San Giacomo e che interessano opere che si svolgono anche in provincia di Aquila sono già così avanzati da permettere la messa in funzione di un primo gruppo di HP.50.000 entro il periodo di un anno e mezzo di lavoro.

I lavori consistono in linea di massima:

Allaggo e rivestimento di una galleria di un chilometro di lunghezza.

Completamento della diga ad arco di Provvidenza e sistemazione delle opere sussidiarie di presa e scarico.

Costruzione di due briglie sui torrenti di Nerito e Venaquaro.

Completamento delle cementazioni della galleria forzata di derivazione di Km.15.

Rivestimento per 400 metri del pozzo foraato.

Costruzione della vasca di espansione con relativi accessori.

Completamento del pozzo di accesso e del montaggio barre di collegamento colla sottostazione.

Costruzione e sistemazione di Km.1,500 di canale di gronda del Mavone.

Completamento del montaggio del primo gruppo quasi ultimato e del collettore forzato.

Per metterci in grado di poter riprendere ed eseguire questi lavori noi prevediamo di occupare un migliaio di operai per i quali ci occorre l'assegnazione di viveri per le cucine, dato che nelle zone dove si svolgono i lavori on vi sono possibilità di trovare i viveri necessari.

Per l'energia elettrica stiamo già provvedendo con la sistemazione di due tratti di linea in provincia di Rieti e Aquila mentre per i materiali e mezzi d'opera abbiamo dato l'incarico di interessarsi la nostra Direzione di Roma. Inviamo anche a Voi copia della richiesta di materiali e mezzi d'opera, raccomandandoci perchè un Vostro cortese intervento ce ne faciliti l'assegnazione.

L'effettuazione del nostro programma porterebbe un notevole vantaggio economico alla provincia di Teramo e a quelle limitrofe non escluso quello della disoccupazione.

Restiamo a Vostra completa disposizione per eventuali maggiori schiarimenti.

Roma, li 13 Gennaio 1945

Spett/le COMMISSIONE ALLEATA

ROMA

Come da gradita Loro richiesta ci pregiamo comunicare che la n/ officina sarebbe in grado di approntare N° 50 gruppi elettrogeni della potenza da Kw 5 a 30, trifase, con neutro e per la tensione richiesta, in circa 4 mesi con consegne ripartite mensilmente.

Per tale approntamento occorrono:

a) motori di autoveicoli di potenza proporzionata ai gruppi;
b) motori elettrici;
c) strumenti di misura, voltometri ed amperometri;
d) filo per avvolgimento.

Tali materiali possono essere reperibili sui vari mercati dell'Italia liberata, specialmente nella Toscana per quanto si riferisce agli strumenti di misura, e nel Napoletano, per il filo elettrico.

Per quanto riguarda i motori di autoveicoli, potrebbero essere assegnati quelli provenienti da ricupero, provvedendo noi alla rimessa in efficienza, oppure si potranno procurare acquistandoli presso detentori nelle campagne.

In merito ai motori elettrici, potranno anche questi essere assegnati dai materiali ricuperati, oppure potranno essere acquistati nelle campagne come per i motori di autoveicoli.

Per quanto si riferisce ai materiali che potranno essere trovati nelle campagne, chiariamo che quasi tutti gli abitanti delle campagne, hanno ricuperato per loro conto dei materiali, asportandoli da macchine abbandonate; come anche hanno ricuperato motori ed altro materiale proveniente da stabilimenti distrutti.

Di conseguenza necessiterebbe poter avere un permesso che concedesse una completa libertà di movimento per poter rintracciare, ricuperare ed acquistare i suddetti materiali.

La nostra organizzazione può dare sicuro affidamento, essendosi già da tempo dedicata a tale lavoro, lavoro che era venuta nella decisione di abbandonare per la difficoltà nel rintraccio dei materiali, difficoltà aumentata dalla impossibilità di muoversi liberamente.

2335

In questi ultimi tempi nella nostra officina sono stati approntati e consegnati 20 gruppi di varia potenza, tra i quali uno di 25 Kw che é stato requisito dal Comando Alleato 104 C.R.E. WORKF, ed altri 4 sono stati installati a Roma e precisamente: Banco di Roma (sede centrale), A.G.I.P. (sede centrale), Calzettificio Latino, Cinema Quirinale; gli altri sono stati venduti a clienti che li hanno portati fuori Roma.

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

Nella fiducia di aver chiarito quali sono le difficoltà che dovrebbero essere sormontate per tale approntamento, e rimanendo a disposizione per qualunque altro chiarimento, distintamente salutiamo.

O. R. M. A.
L'AMMINISTRATORE DELEGATO

Declassified E.O. 12356 Section 3.3/NND No. 785019

Ada D'Alessandro

OFFICINA REALIZZAZIONI MECCANICHE AERONAUTICHE
(Aircraft construction work)

Rome 13 January 1945

To the Allied Commission,

Rome.

According to your request, we beg to inform you that our workshop could fix 50 three-phase generating units from 5 up to 30 KW, with neutral, for any tension required, within 4 months and with monthly delivery.

To get these generating units ready, following implements are required:

a) autovehicles' motors of a power proportioned to the units
b) electrical motors
c) measurers as voltameters and amperemeters
d) winding wire

These materials are available on the various markets of Liberated Italy, especially in Toscana with regard to measurers, and in Naples Province with regard to electrical wire.

Concerning autovehicle-motors, those salvaged could be allotted and we could provide to their rehabilitation, or we could obtain them by purchase from the detainers in the country.

Concerning electrical motors, these too could be allotted from the salvaged materials or could be purchased in countryplaces as the autovehicle motors.

Referring to materials which are not available in the country, we make it clear that almost all countrypeople have rescued materials for their own account, carrying them away from abandoned motorcars: they have also rescued motors and other materials coming from destroyed establishments.

In consequence it would be necessary to have a permit allowing perfect free action in order to find out, to rescue and to purchase above-mentioned materials.

Declassified E.O. 12356 Section 3.3/NND No. 785019

You may rely fully on our organization which has long applied itself to this work and has only abandoned it lately owing to the difficulties in finding materials, difficulties increased all the more by the want of free activity.

Lately, 20 generating units of various power have been made ready and have been delivered by our workshop, a 25 KW one of which has been requisitioned by the Allied Command 104 C.R.E. WORKS, and 4 more have been installed in Rome and precisely in the "Banco di Roma (central office), in the A.G.I.P. (central off) in the Calzettificio Latino (Hosiery Latin Manufacture) and in the Cinema Quirinale; the others have been sold to customers which have taken them out of Rome.

Hoping to have clearly explained the difficulties which are to be overcomed in order to fix up these units, we are at your disposal for any other information you would desire.

Yours very truly

O.R.M.A.
The Deputy Manager

REQUISITION

JUSTIFICATION: Italian Electrical

Items on this requisition are vitally necessary for the rehabilitation program now being carried out which program is estimated to occupy six to twelve months to complete and covers Sardinia, Sicily, Southern and Central Italy.

SICILY - SARDINIA:

Transformers are out of commission and can only be recommissioned when repairs have been effected. Insulating materials necessary.

SOUTHERN ITALY:

Same remarks apply, in addition, war damaged plants which are scheduled for restoration under present program cannot be restored, unless insulating materials are provided, also a large hydro alternator (18000 KW) of the Sila group is out of commission and cannot be re-commissioned until insulating repairs are carried out, this latter, means that the steam station Naples has to carry the additional load of the South, which in turn means extra fuel oil consumption.

CENTRAL ITALY:

War damaged plants scheduled for restoration under the present program can only be restored when provided with insulating material, and many transformers and alternators are in workshops dismantled, but further work is suspended until insulating material is provided. Quite recently the burn out of a 8800 KW alternator has caused the cutting down of the power to Rome, this set is dismantled and waiting for the provision of insulating material.

Insulating materials is of first importance to the rehabilitation and restoration of the Italian electrical system. Hydro electric plants effected;

LARDERELLO	AVENTINO	SILA	MATESE
TIVOLI	FONTECUPA	CRICHELLA	FEDCARA
MORINO	PONTE A FIUME	TERNI GROUP	
FARFA	SERMANO	CANTERNO	

It is now impossible to find any of the material required, in the open market, as the Allied occupied country has been thoroughly combed and drained of all such material since the Allied occupation.

Much rehabilitation work is at a standstill due to the lack of essential material. Delivery during the next six months will enable important progress to be made and future programs planned.

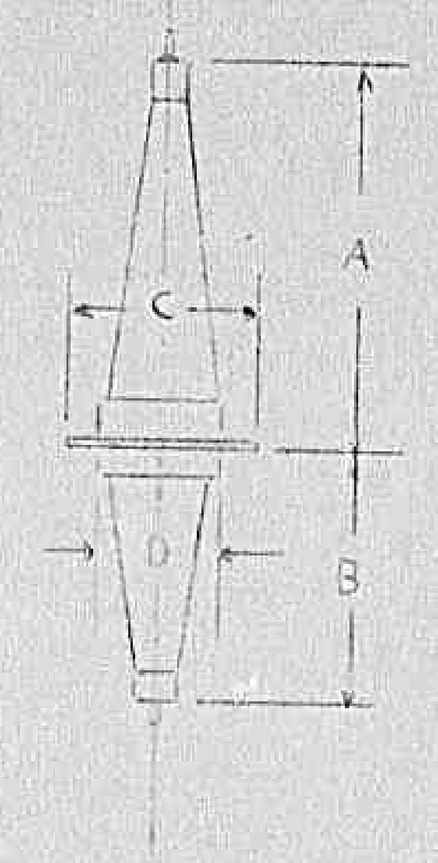

2327

All items on this requisition have been discussed with the Chief Engineer, AFHQ.

RATING: TWO

OGGETTO: Impianti elettrici di Torre Menta e Milelli. Manutenzione.

Con istanza in data 16 dicembre c.a. la ditta in oggetto si è rivolta a cotesto Ufficio per l'assegnazione di un quantitativo di 150 quintali di cemento necessari per alcune urgenti riparazioni e manutenzioni dei canali degli impianti idroelettrici di Torre Menta e Milelli.

Poichè le riparazioni e manutenzioni di cui trattasi presentano effettivamente carattere di indispensabilità ed urgenza nell'interesse dei pubblici servizi cui sono destinati gli impianti, inquantochè mentre per l'attuale trascuratezza di esse viene eccessivamente ridotta la produzione di potenza, un ulteriore ritardo nei lavori potrebbe produrre anche l'interruzione dei servizi, si prega di voler corrispondere alla richiesta della ditta con quella sollecitudine che il caso richiede. 2317

Subject: Torre Menta and Milelli
Electrical plants maintenance.

By means of a petition dated 16th Dec. inst., the Firm in question applied to you for the allocation of 150 quintals of cement, required for some urgent repairs and maintenance of the channels of the Torre Menta and Milelli hydro-electric plants.

As the repairs and maintenance in question are in fact of an indispensable and urgent nature, for the public utilities the plants are intended for, in as much as a further delay in the works might even cause the interruption of the services, while the production of power is exceptionally reduced owing to their present neglect, we beg you to deal with the Firm's request with the speed required by the situation.

TO : Regional Commissioner Toscane Region
(Attention Engineer Officer)

1. It is reported that there exists, in the stores of Societa Ceramica Richard Ginori, Colonnata Sesto Fiorentino, Firenze, a number of finished insulators of different types and voltages.

2. Will you please liason with Major Drake Industry and Commerce Officer your Region, to compile a detailed list of the stock of insulators, in order that this Section may determine their use.

3. There is a great demand for porcelain transformer bushings of all types and voltages, and in your report we shall be glad if you will say, at an early date, what facilities exist for the manufacture of these bushings.

ABRUZZI=MARCHE REGION
CMF.

TO : Regional Supply Officer?HQ,AC/AMG Abruzzi=Marche Region.

SUBJECT : Bad weather clothing for employees of Electrical Undertakings.

REF : R5/516/2.

DATE : 27 Nov. 1944.

With the arrival of winter weather the repair and reconstruction of electrical installations and transmission lines is being retarded by lack of suitable protective clothing for men working out of doors. Much of this work is in wet ground, e.g. repairs to dams and canals, and rainstorms invariably bring down transmission lines with resulting interruption to the service.

Boots and makintoshes are the items most urgently required? I understand that condemned army boots and salvaged gas capes can be obtained and it would be of very great help if you could secure 250 pairs boots in sizes 7,8&9

150 gas capes.
