SUBJECT: Supply of materials.

252

TO : Ministry of Public Works
( att: Eng. Asta )

1. The electrical rehabilitation work in Southern and Central Italy is of first importance both from a military point of view and now more especially from the point of view of the restoration of industries in Italy.

2. Officers of the Electrical Division of the Public Works and Utilities Sub-Commission with knowledge of electrical engineering have been following up the repair work and giving the Electrical Companies assistance where necessary, but the time has now arrived when these officers must be withdrawn and moved to the Northern regions.

3. For some time past we have been attempting to hand over the functions of supplies of materials which the Electrical Companies are continuously calling for. Major Price, the officer in the Electrical Division who deals with all supply matters is, however, still unable to relax his efforts for the supply of materials to the Companies operating in Italian Government territory.

4. This appears to be due mainly to the fact that the appropriate Government department have not engaged a qualified personnel who can take over this work, and a serious delay is likely to take place in the rehabilitation work if we on our part cease to carry out these functions.

5. The question of supply of materials to the Electrical Companies is and will be for some time a most important matter in the rehabilitation work and we would urge that you engage a suitable man who can deal with supply work without delay. It is suggested that this man should have an office next to Major Price in the Electrical Division until such time as he has been

Declassified E.O. 12356 Section 3.3/NND No. 785019

able to make himself acquainted with the procedure and taken over completely the work in the Italian Government territory.

6. The matter is now most urgent and we should be glad to know how soon arrangements can be made for this to be done.

W.M. LAPPER,
Lieut-Colonel,
Chief, Elec.Div.

REFERENCE: AC/302/2/TH 5

SUBJECT: REQUEST FOR MAINTENANCE ITEMS FOR ITALIAN CIVILIAN UTILITIES

TO : G-5 SECTION, AFHQ, APO 512
(Attn: Lt. Col. Croxx-Johnson)

Reference your T-8 of 16 Mar 1945 in re maintenance items for Civilian Utilities Companies employed by PBS.

1. Public Utilities needs were considered when placing demands for the items listed.

2. Deliveries against requests for batteries, tires and tubes have been in such relatively small quantities that they have been absorbed immediately upon arrival

3. At present there are none of these available.

4. A portion of the tires needed could probably be filled on the basis of specific demands to be honored by salvage depots in accordance with the salvage instructions issued by G(AB) of your HQ.

5. In view of the operational status of said companies we believe it most advantageous to all concerned if this material were authorized for issue from Embase stock.

SUBJECT: Telephone Conversation with Major Laurens, AFHQ Re Rubber Card for Galleto.

TO : Distribution.

1. I was informed yesterday that Lt. Devine, Commerce Sub-Commission had heard there might be some hold up on delivery of the rubber card packing for the Galleto units, because of insufficient justification on the order to back up in early delivery date. At Lt. Devine's suggestion, I talked to Major Laurens AFHQ (Freedom 504), and explained the situation. He told me that there are two separate orders for rubber card, and that work on each has started on a high priority. One order was marked for delivery 12 May and he hopes to have work completed on order by that time. He did not know definite, completion date on other order requested "immediately".

2. Sgt. Anzivino of my office will follow this work, through the R.E.M.E. shop.

**Per le vendite effettuate pel tramite della nostra Mandataria S. A. CONSORZIO DERIVATI VERGELLA di MILANO valgono le condizioni generali stabilite dai suoi listini. Per le vendite, invece, effettuate direttamente dalla ns. Società valgono le seguenti:**

CONDIZIONI GENERALI DI VENDITA – 1. Qualunque vendita è sempre subordinata alla nostra accettazione. — 2. Allorchè i pressi sono indicati base, essi vanno maggiorati degli extra stabiliti dal listino extra. — 3. Sui quantitativi indicati negli ordini ci riserviamo una tolleranza di peso del 5% in più od in meno. — 4. I termini di spedizione s'intendono sempre senza impegno. — 5. Qualunque ritardo nella consegna non darà mai diritto a penali, risarcimento di danni, annullamento di ordini, o riduzione di prezzo. — 6. Decliniamo ogni responsabilità qualora casi imprevisti o di forza maggiore ritardino od impediscano la esecuzione di un ordine o di parte di esso. — 7. Per eventuali contratti a termine le specifiche dovranno esserci rimesse entro il termine pattuito, trascorso il quale sarà in nostra facoltà sia di considerare annullata la quantità non specificata sia di esigerne le pronte specifiche. — 8. La merce, anche se venduta franco destino viaggia sempre a rischio e pericolo del Committente. — 9. Non si accettano reclami trascorsi 2 giorni dal ricevimento della merce. — 10. Per eventuali ammanchi il destinatario deve reclamare presso l'Amministrazione Ferroviaria essendo il peso della merce in partenza riscontrato dalle Ferrovie. — 11. Sono riconosciuti validi soltanto i pagamenti fatti al nostro domicilio in Roma. 12. Il ritardo del pagamento anche parziale delle fatture oltre la loro scadenza dà luogo alla decadenza dello sconto, se pattuito; e alla immediata decorrenza degli interessi di mora in ragione del 6% annuo. E' in nostra facoltà, trascorso il termine di scadenza esigere tratta a copertura. — 13. Se è convenuto il pagamento con effetti, il debitore deve fare il regolamento entro 15 giorni dal ricevimento della fattura. — 14. Le irregolarità o mancanza di pagamento ci danno facoltà di annullare il contratto, sospendere le consegne, o esigere garanzie, senza che il Committente possa avanzare pretese o riserve al riguardo. — 15. Tutti i materiali venduti rimangono di nostra esclusiva proprietà fino a quando non siano integralmente pagati. 16. Per qualsiasi controversia, il Foro Giudiziario competente è quello di Roma. — 17. Queste condizioni generali sono valide per tutti gli effetti di legge, intendendosi integralmente accettate dal Committente col conferimento dell' Ordine.

To : Electrical Section

Public Works and Utilities Sub=commission

Allied Commission

1. With ample supply of electricity from the North there is no problem of generation in Emilia. However, the transmission lines from BOLOGNA south to FLORENCE and to RIMINI=ANCONA are badly damaged. To rehabilitate electrical facilities in the area south of BOLOGNA, including FLORENCE,FORLI',RAVENNA,and PESARO,it will be necessary to rebuild at least two lines south of BOLOGNA. The lines suggested for repairs are PWGU number 303 (120 KV) BOLOGNA=FORLI' and no1077 BOLOGNA=S.MARIA=VAIANO=PRATO=RIFREDI(60 KV.). Both lines mentioned are owned by Società Bolognese Elettricità, a subsidiary company at the Società Adriatica di Elettricità. This company has already prepared plans for rebuilding these lines. However,with the serious shortage of transport and materials, it will be required that certains materials be made available to them.

2. Attached is a list of material needed for the most urgent of this Work. It is suggested that they be furnished,these materials, at least 25% now,with the remainder at monthly intervals of 25%.

3. One of the most urgently needed items of equipment for utility companies in this area,is a workshop truck with acetylene and electric welding equipment,such as a truck, shop, motorized used by the U.S. Army. It is strongly recommended that the electrical companies be allowed to purchase such trucks from the Army. Such equipment would be of greater use for repairing demolished steel towers than any other single item of equipment. It would be appreciated if this matter were brought before the proper authorities.

ECONOMIC SECTION

RECEIVED
P.W. & U. S/C A.G.
18 MAY 1945 306

18 May 1945

MEMORANDUM FOR PUBLIC WORKS & UTILITIES S/C:

1. Could you prepare a short memorandum giving a general idea of how many houses in Italy are wired for electricity and a statement of your opinion as to whether or not there will be a big post-war demand in Italy for electrical appliances.

2. Is there some general information that you can provide relative to the voltage and frequency of electric current in Italy with respect to its relation to standard electrical appliances manufactured in the United States? In other words would electrical appliances manufactured in the U. S. for distribution in Italy have to be constructed on a different voltage basis than those on the U. S. domestic market?

3. General information in connection with this would be appreciated.

OGGETTO Soc. Generale Pugliese di Elettricità - Bari.
Assegnazione lampadine elettriche.-

1 - La Soc. Generale Pugliese di Elettricità con sede in Bari - Via G. Suppa 5 - ha presentato domanda intesa ad ottenere l'assegnazione complessiva di n. 90.312 lampadine elettriche necessarie alla illuminazione pubblica nei comuni della provincia di Bari.

2 - L'assegnazione delle lampadine, secondo la richiesta della Società, dovrebbe essere frazionata come segue:

| | | |
|---|---|---|
| primo mese | n. | 36.052 |
| quarto mese | " | 27.790 |
| sesto mese | " | 26.470 |

3 - La scorta di lampadine elettriche della Società nell'ottobre 1943 fu bloccata dal Comando Genio Militare Britannico per conto del Comando Generale Truppe Alleate; da quell'epoca ad oggi, a seguito degli avvenuti prelevamenti, la scorta stessa si è notevolmente ridotta.

4 - Poichè questo Ministero non ha attualmente la possibilità di accogliere, neanche in minima parte, la richiesta in questio=

Oggetto:
Assegnazione cemento

PUBLIC WORKS & UTILITIES
SUB COMMISSION HQ. AC. APO 394
R O M A

L'On/le Ministero dell'Industria Commercio e Lavoro con nota nº 1754 del 18 c.m. ci comunica di rivolgerci a codesto Ufficio per quanto appresso:

Questa Società fin dal 1942 dovette sospendere i lavori di completamento di una variante in galleria, del canale acquedotto sul fiume Corace, che serve la propria Centrale Idroelettrica per la produzione di energia immessa sulla rete della Provincia di Catanzaro.

La spspensione fu dovuta unicamente a mancanza di cemento. Nell'anno successivo 1943 ottenemmo un'assegnazione di 250 quintali del tipo 500 ma le sopraggiunte vicende belliche non ne permisero l'approvviggionamento, nè se ne poté ottenere nello scorso 1944.

Poiché oltre i lavori suddetti è urgentissimo provvedere a quelli di alcune riparazioni urgenti ad uno scarico ed alla diga di sbarramento, nonché alla ricostruzione di un muraglione di sostegno in una zona franosa, che mette in serio pericolo la continuità dell'esercizio della Centrale e con grave danno per la sospensione della produzione, si chiede che venga accordata complessivamente l'assegnazione di 400 quintali di cemento tipo 500, di cui almeno 60 quintali per consegna immediata per le riparazioni suddette.

Chiede altresì che l'assegnazione le venga effettuata per prelievo dal Cementificio di Vibo Valentia, che è il più vicino data la scarsità dei mezzi di trasporto.

In attesa

SOCIETA' IDROELETTRICA DEL CORACE
- CATANZARO -

TO : Public Works & Utilities Sub-Commission 26 May 45

SUBJECT: Allocation of cement.

The Ministry of Industry, Commerce and Labor requested us, by ltr. 1754 dated 18 May 45, to apply to you for what follows :

Our Company, since 1942, had to discontinue the works for completion of an underground diversion of the aqueduct over Corace River, which feeds the Co.'s Hydroelectric Plant generating electric power supplied to Catanzaro Province Grid.

Suspension of works was due only to lack of cement. During 1943 we obtained an allocation of 25 tons of Type 500 cement, but, owing to the following war conditions, supply became impossible, also during 1944.

Since, besides a/m works, it is most urgent to carry out some urgent repairs to one ~~water~~ outlet and to the dam, and also to reconstruction of a retaining wall for stopping a landslide which could seriously endanger the plant and the continuity of its production, we request a total allocation of 40 tons of Type 500 cement, 6 tons of which to be delivered immediately for a/m repairs.

Also requested that allocation be made against Vibo Valentia 2638 Cement Works, owing to transport difficulties.

for Corace Hydroel. Co.

Public Works & Utilities Sub Commission,
Electrical Division.

This answers your 306/PWU of 23 May 45 (281)

1. Electric Stores held by the Societa Generale Elettrica Pugliese were frozen by CE 2 District in the early part of the campaign, and release was controlled by him so that WD requirements received priority.

2. This firm, as a Public Utility Company, is now considering the restoration of normal lighting conditions in its area, and consequently requires full control of its own stores.

3. Owing to the changed conditions, it is no longer necessary to hold these stores as frozen. Will you please notify the Company that all instructions controlling their stores are now cancelled, and releases may be made by the firm at their own discretion.

Genoa, May 19, 1945

From : San Giorgio, Inc.

To : A.M.G. Liguria Region P.W. & U. Genoa

Subject : list of machinery orders on hand.

As requested by you we submit a list of all orders on hand for customers of Central, southern and Insular Italy.

Work on these orders proceeds slowly on account of scarcity or lack of materials.

As soon as we shall be able to obtain the needed materials, we will be in a position to complete in a short while the above mentioned machinery and to accept new orders.

The most important materials which we are urgently in need of are the following :

Coal, oil for transformers, lubricating oil, nickelchrome mica, copal, cotton.

1 Enclosure.

Rivolgiamo la presente al fine di ottenere l'assegnazione di:

Qli 80 cemento 500.

Il detto cemento occorre per lavori di riparazione e manutenzione delle opere in cemento, e cemento armato ( diga ed opere di presa, ponte canale, ponticelli, vasca di carico, scarico).

Preghiamo che l'assegnazione venga effettuata sulla cementeria più prossima a questa zona per facilitarne il ritiro, e rendiamo noto che i lavori di riparazione e manutenzione devono essere eseguiti entro il mese di Luglio prossimo.

Con osservanza.

Soc. Gen. Elettrica della Sicilia

Herewith copies in English and Italian from Ing. Gonzales, shewing the position of the remodelling of the Porto Empedocle Power-Station.

He would appreciate our assistance in forwarding this information to the subject Company in Sicily.

Lardarello Company

Franco Tosi representatives state they have one 3,000 kW steam ready for delivery to Lardarello.

Also four 26,000 kW steam turbines with the majority of castings ready, but awaiting machining.

Terni Company

Franco Tosi state they also have a certain amount of equipment ready for S. Giacomo and Providenza, but are short of certain raw materials.

They were very much surprised to learn that equipment at S. Giacomo had not been destroyed or taken away by the Germans and pleased to know that this project would be continued as early as possible.

They are preparing a list of essential materials required for completion of equipment now on order. 2629

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

Their representative plans to visit central Italy as soon as transportation arrangements are completed.

Romana Company

Arrangements are being made for the Romana Company to move approximately 50 Tons of electrical equipment and material from Milan to Rome.

Engr. Rovelli and his Engr. Franco Guli are in Milan now.

Engr. Franco Guli will remain here to handle the tranfer of material to Rome.

Selt. Valdarno Company

Arrangements are being made for the Selt-Valdarno Co. to move approximately 15 Tons. of electrical equipment and material from Milan to Florence.

Memorandum Nº280545 for Col. Parker,
A. M. G. Milan.

Porto Empedocle Power Station. GdZ's remodelling of two B & W boilers

Hanuary 1943

Our contract: only few materials to be machined were at our Makers disposal in Venice. Part of the tubing, as well as 122 Qli (27400 lbs) of Tenmus had not yet been recieved.

Forni Stein contract: no material had been delivered yet for the stokers to Forni Stein's Makers in Nervi (Genoa).

Messrs S.C.E.S., the Client, showed nervous anxiety apparently not admitting that the situation was already serious nor that our interest was obviously to make the work, at least for the sake of being paid.

February '43

As the transport matter was becoming acute and as we had no hope to receive the material to complete the work, I considered wise not to start a work that could neither be completed nor shipped. I therefore unofficially suggested the Client to keep the materials unmachined for post war consideration, but my suggestion was repulsed, we supposed for political reasons.

April '43

After careful consideration with our Makers, we informed the Client that the delivery date for shipment could have been July 15th provide materials were at Makers disposal within May 15th. The stokers to be delivered in Genoa five months after materials disposal.

June '43

As materials situation was unchanged the delivery date evidently dropped.

Present

We must examine the situation together with our Makers

Memorandum N. 380545 per il Col. Parker A.M.G. - Milano

Centrale di Porto Empedocle rimodernamento GdZ per 2 caldaie B & W ;

---

Gennaio 1943

Contratto GdZ - Solo parte del materiale da lavorare era giunta alle officine di costruzione a Venezia, mancavano dei tubi e 122 Q.li di profilati.

Contratto forni stagni - Nessun materiale assegnato era giunto alle officine di costruzione a Nervi (Genova)

La S.G.E.S. (il cliente) mostrava ansietà non ammettendo che la situazione era già seria nè evidentemente, che il nostro interesse (come fornitori) era di eseguire il lavoro non fosse altro che per essere pagati.

Febbraio 1943

Poichè i trasporti diventavano sempre più difficile e poichè non avevamo speranza di ricevere i materiali mancanti lo scrivente considerava giudizioso di non iniziare un lavoro che non poteva essere completato e nemmeno spedito; conseguentemente lo scrivente avvanzò privatamente per il tramite del suo rappresentante Ing. F. di Maggio a Palermo la proposta di non iniziare le lavoraqioni e tenere il materiale per impiego post-bellico, ma il suggerimento venne respinto forse per ragioni politiche. 2617

Aprile 1943

A seguito di insistenze del cliente e dopo attenta considerazione col costruttore a Venezia, informai il cliente che l'approntamento alla spedizione poteva avvenire per metà luglio purchè i materiali mancanti fossero arrivati

entro metà maggio.
Per le griglie la consegna avrebbe potuto avvenire a Genova cinque mesi dopo l'arrivo dei materiali.

Giugno 1943

Poichè la situazione relativa ai materiali è rimasta invariata i termini di consegna anzidetti sono caduti.

Maggio 945

Occorre che lo scrivente esamini la situazione col suo costruttore a Venezia in modo da riferire al AMG in merito ad un programma per portare il lavoro a' un buon fine.

R

Genoa, May 19,1945

From : San Giorgio, Inc.

To : A.M.G. Liguria Region P.W. & U. Genoa

Subject : list of machinery orders on hand.

As requested by you we submit a list of all orders on hand for customers of Central, southern and Insular Italy.

Work on these orders proceeds slowly on account of scarcity or lack of materials.

As soon as we shall be able to obtain the needed materials, we will be in a position to complete in a short while the above mentioned machinery and to accept new orders.

The most important materials which we are urgently in need of are the following :

Steel, oil for transformers, lubricating oil, nickelchrome wire, nepal, cotton.

1 Enclosure.

San Giorgio, Inc.

£) Normal Production

- Electric marine installations, for rail, tram and trolley Bus traction for electric power station.
- Electric Gears for Marine Plants-for House Building - for Hoisting and Conveying equipments.
- D.C. and A.C. Machines for Rail-Tram and Trolley Buss traction. ( traction motors-dynamos, converters etc. )
- Electric machines for marine plants, dynamo turbine, for motors, fan etc.
- Transformers for medium size machines of all kinds up to 800 KVA.
- Three Phase induction Motors 10.000 KVA ( Should we get back some of the outstanding machines then there would be no limit of power).
- Generators and Turbine Generators - Electric locomotives.
- Trams and trolley Buses - electric propelling motors of any kind for DC. and AC.

Possibilities of actual production.

Under the present conditions our Works could provide for the following:

- Repairs of Electric Locomotives for Dc. and Ac. - Tram, Trolley Bus and Rail carriages.
- Repairs of electric marine machines installations - ( Electric Artillery installation included )
- Repairs of electric installations ( rudders-capstans-winches etc.) for war and merchandise ships.
- Repairs of generators, motors, transformers of small and medium power.
- Construction of transformers up to 800 KVA.
- Construction of three Phase induction motors in series.
- Construction if Dc. motors for Marine plants-Trolley Bus and Tram traction.

- Repairs of electric installations ( rudders-capstans-winches etc.) for war and merchandise ships.
- Repairs of generators, motors, transformers of small and medium power.
- Construction of transformers up to 600 KVA.
- Construction of three Phase induction motors in series.
- Construction if Dc. motors for Marine plants-Trolley Bus and Tram traction.
- Construction of Generators up to 30.000 KVA (two poles- 3000 r.p.m.)
- Construction of concrete kneading drums, house building hoisting and conveying equipments.

Electric Power: - 5.000 KVA.

Workers:

Normal number 1.500
Actual number 950

./.

2608

Declassified E.O. 12356 Section 3.3/NND No. 785019

Shop: Fitting and assembling shop, electric equipments - coiling shop electric gears-Blacksmiths and coppersmiths - Assembling of electric locomotives-Straightening machines shop - small engineering shop -equipment dept :- iron construction dept._ Electric Equipment Dept. Engineering Dept. - Electric Transformers dept. - Punching and Packing of collector bars, painting.

Stock on Hand : about 1500 tons of ferrous material, about 10 tons of copper and 2 tons of aluminium.

Plant conditinn:

condition of the Works Buildings for the most part is good and so is that of the plant equipments. The caused damages can be estimated at 5% to 6% of their total.

Mines: No mines.

Vehicle overhauling: Our Works are not equipped for this kind of work except that fer electrical parts or radical transformations.

Troop billeting facilities within plant : none.

Parking facilities: None

Area:

- covered area..... 43.000 sq. m.
- uncovered area..... 40.000 " "

Machineries: In our enclosure Nr. 1 we have indicated the state of the efficiency of the machines that remained in Genoa.

Transferred Machineries: On order of the occupying forcer, the German autheritiea, during Summer 1044 about 450 working machines were transferred to Valseriana. The percentage of these machines ranges in total to about 40% of the total. The less efficiency of the output is, however, of the 75% in respect to the normal.

Hidden machines - By special precaution taken we have in the whole hidden away 84 working machines. Theae can be rapidly recovered and set in efficiency again.

Cranes: see our enclosure Nr. 2

Directors: Director: Dr. Ing. Renato Boggio
Vice Director: Dr. Ing. Antonio Guli
" " : Dr. Ing. Attilio Giaquinto
" " : Dr. Ing. Ettore Di Roberto.

Plant Map: see our Enclosure Nr. 2 also the enclosure to Report of Artillery Works.

Head Office - Genova-Cornigliano, Via L.A. Muratori
Establishment ( Engineering Works)
Map Reference 928490 ( Town Map )
Intelligence Target D

Normal production:

- Repair of steam locomotives and railways-cars.
- Manufacture and repair of marine and land boilers of any size and type.
- Manufacture of pressure tanks, bottles, condensers, overheaters, parts of tubings, smoke hoods, funnel, silencers ect.
- Manufacture and repair of large marine and land Diesel engines.
- " " " Marine and land steam turbines of any size and type.
- Manufacture of gears for machinery built in the Establishment and for customers.
- Manufacture of Tools for the needs of the Establishment and for associated Establishments.
- Manufacture of armatures for marine and land plants.
- Repair of auxiliary machinery and manufacture of some types of same
- Manufacture and repair of heat exchangers such as: coolers, feed heaters and similar.
- Manufacture of some types of presses and smith hammers.
- " " bolt and screws.

Possibilities of actual production:

Excepted the manufacturing of fast Diesel engines, that has been transferred to Milan,(Macherio) the establishment is in condition to resume its normal production provided that the necessary fuel and the missing material is supplied. In order to give a more exact idea; we specif here, as an example, the following work possibilities.

- Repair of N. 6 + 8 locomotives, monthly
- " " " 8 + 10 railway-cars
- " " " 2 large Diesel engines
- " " " 8 medium " "
- " " " 15 small " "
- manufacture of Diesel engines for 3.000 + 4.000 H.P. monthly
- " " 6 Boilers; monthly, for 4.000 sq.m.
- repair of boilers
- " " turbines

3.) Electric power : KVA 7.000

4.) Workers:
- Normal number 4.900
- present number 3.000

5.) Shops: Boiler Workshop, Tool - Turbine manufacture - Diesel engines and fast Diesel engines manufacture, Large Engineering Testng and assembling halls.

6.) Stock on hand. The building material at present on hand in the Establishment's warehouses, roughly estimated, may be sufficient for 3 months of normal work with the exception of the high quality metals whose stock is sufficient for the normal work of one month and of the stores whose stock is almost inexistent as it appears from the small following work possibilities:

| | |
|---|---|
| - Seneoal and coke..... | 1 month |
| - Calcium carbide..... | 15 days |
| - Diesel oil, specific weight, 0,9 | 1 month |
| - light Diesel oil ( small engines ) | 15 days |
| - Emulsionable oil..... | 1 month |

7.) Plant conditions: All suffered damages from bombardments have been repaired in a definitive way and some of them in such a way as not to reduce the efficiency of the workshop, so that the consequences of the bombardments may be considered as pratically cancelled.

8.) Mines: none

9.) Vehicles overhauling: The establishment has never overhauled vehicles; some departments could however promptly equip themselves for overhauling combustion engines.

10.) Troop billetting facilities within plant : none

11.) Parking facilities : none

12.) Area:

| | |
|---|---|
| - covered area: | 71.000 sq.m. |
| - uncovered area: | 40.000 sq.m. |

13.) Machinery: We are enclosing statement n.1) concerning the principal machines and details on their present condition; statement n.2) with the same details as given for the tool department; statement N.3) with details of the machines hidden near the Establishment, which can promptly be set at work.

14.) Transferred machinery: By order of the occupyng German Authorities during the last months, 214 machine tools of the shop for Diesel engines and of the small and medium gear shop have been transferred to Macherio (near Milan) ; 9 of same have already been taken back to Genoa ( see enclosed statement N.4)

15.) Machinery removed by Germans. The German Authorities have removed a

from the small following more possibilities:

- Seasoal and coke..... 1 month
- Calcium carbide..... 15 days
- Diesel oil, specific weight, 0,9 1 month
- light Diesel oil ( small engines ) 15 days
- Emulsionable oil..... 1 month

7.) Plant conditions: All suffered damages from bombardments have been repaired in a definitive way and some of them in such a way as not to reduce the efficiency of the workshop, so that the consequences of the bombardments may be considered as pratically cancelled.

8.) Mines: none

9.) Vehicles overhauling: The establishment has never overhauled vehicles; some departments could however promptly equip themselves for overhauling combustion engines.

10.) Troop billetting facilities within plant : none

11.) Parking facilities : none

12.) Area:

- covered area: 71.000 sq.m.
- uncovered area: 40.000 sq.m.

13.) Machinery: We are enclosing statement n.1) concerning the principal machines and details on their present condition; statement n.2) with the same details as given for the tool department; statement N.3) with details of the machines hidden near the Establishment, which can promptly be set at work.

14.) Transferred machinery: By order of the occupyng German Authorities during the last months, 214 machine tools of the shop for [illegible] engines and of the small and medium gear shop have been transferred to Macherio (near Milan) ; 9 of same have already been taken back to Genoa ( see enclosed statement N.4)

15.) Machinery removed by Germans. The German Authorities have removed a large Pfauter gear cutting machine, which at present, is not wanted for for our work.

16.) Cranes: In the enclosure N.5) we have given the list of cranes with their capacity, their wheel track and specified the department where they are installed.

17.) Directors:

- Director: Dr. Ing. Edgardo DE VITO
- Vice director Dr. Ing. SANTI Daniele.

18.) Establishment - map: See enclosure N. 6.

1.) Normal Production:
- Manufacture of brass and steel shell cases for firing charges
- Manufacture of bars, tubes and miscellaneous rolled materials of brass, copper, alluminium and non ferrous alloys.

2.) Actual possibilities: The Works were to be transferred to Novi Ligure where at present the shell cases were beginning to be manufactured. The metallurgical section, which, should the fuel be available, would be able to work, has not been transferred.

3.) Electric power : KVA 6.980

4.) Workers:
- normal number 900
- present number 385.

5.) Shop: Alloy metal Foundry, rolling mills, bar press, bar drawing machine, wire drawing machine, tube manufacture.

6.) Stock on hand: At Genoa about 320 tons of ferrous material and abou 200 tons of steel discs for shell cases and at Novi Ligure about 85 tons of ferrous material and about 200 tons of steel discs for shell cases are available.

7.) Condition of plants: the Establishment is in good condition.

8.) Mines: no mines.

9.) Possibilities for Overhauling of vehicles: none

10.) Troop billeting facilities within plant: none

11.) Parking facilities: none

12.) Area:
covered : 25.000 sq. M;
uncovered : 42.000 sq; m.

13.) Machines in good conditions: See encl. 1.

2598

14.) Removed machines: The German occupyng authorities have transferred to Germany following machines:

Declassified E.O. 12356 Section 3.3/NND No. 785019

- Manufacture of bars, tubes and miscellaneous rolled materials of brass, copper, alluminium and non ferrous alloys.

2.) Actual possibilities: The Works were to be transferred to Novi Ligure where at present the shell cases were beginning to be manufactured. The metallurgical section, which, should the fuel be available, would be able to work, has not been transferred.

3.) Electric power : KVA 6.980

4.) Workers:

uncovered : 42.000 sq; m.

13.) Machines in good conditions: See encl. 1.

259

14.) Removed machines: The German occupyng authorities have transferred to Germany following machines:

- Weingarten crank press 2,5 ton capacity - 600 mm. stroke.

- Hasenclever crank press 1,0 ton capacity - 900 mm. stroke/

15.) Damaged machines: no damaged machines?

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

16.) Hidden machines: Following machines have been dismantled and hidden by us:
- electric furnace equipments and general electric equipments.
- Parts of machines have been dismantled and partly transferred to Novi Ligure and partly to the Genoa Establishment.
- From the electric sub-stations some transformers have been dismantled and hidden scattering them about in the various departments of the Establishment.

17.) Cranes: See enclosure N. 2

18.) Directors:
- Dott. Ing. Luigi Bergamini - Vice Director
- " " Gualtiero Chiossi - Vice director.

19.) Map of plant: See enclosure N. 3

6) Stock on hand: about 8.000 tons of iron materials, about 100 tons of non ferrous materials.

7) Condition of plant: The plants of the Sestri and Voltri yards have nearly not suffered at all trough enemy action. 259
Both the machines and the equipments of the ship outfitting yard of Genova-Sampierdarena are in working order, as this establishment in the harbour district of Genoa is the only one that suffered practically no damage through enemy action or through the work of German destroying units.
The only suffered damage consists in the sinking of a crane pontoon of 40 tons.

List of the machines removed to Germany

In Summer 1944 from the Artillery Works following machines have been removed:

- Iron benches for tracers 8710 Kg.
- Head of the Rheinmetall boring machine Nr. 10763 maximun boring lenght 6000 mm. 3625 Kg.
- Cerruti double Boring Machine N. 10773 maximun boring lenght 8000 mm 20.000 Kg.
- Head of the doubles Remis boring machine Nr. 10216 - 120 mm. spindle diametre 3625 Kg.
- Richard boring machine Nr. 10466 with steady upright, 120 mm. Spindle diametre 22000 Kg.
- Part of FOS grinding machine Nr. 10745 maximun slotting lenght 8000 mm. 18.000 Kg.
- Part of Wagner slotting machine N. 10678 maximun slotting lenght 6000 mm. 17.000 Kg.
- Wagner slotting machine N. 10.680 maximun slotting lenght 8000mm. 25.000 Kg.
- Wagner slotting machine N. 10677 maximum slotting lenght 6000 mm. 20.850 Kg.
- Part of Fairbank slotting machine N. 10.252 max. slotting lenght 9600 mm. 18.000 Kg.
- Parallel Oerlikon lathe N. 10.717 center distance 6000 mm. center height 475 mm. 14.500 Kg.
- Iron bank in two pieces 14.000 Kg.
- 8 electric motors Nr. 01770-01774-01323-01428-01430-01307-01306-01305 Kg. 1.800.
- Cases containing machine accessories and tools 38.430? Kg.
- 5 iron wardrobes 200 Kg.
- wood stools 25 Kg.
- wood foot boards 75 Kg.

BEST COPY POSSIBLE

ANSALDO joint-stock Company
wholly paid capital 500.000.000 It. lires
Head Office - Via L.A. Muratori, 7 - Genova - Cornigliano.

ANSALDO is an imposing industrial concern composed by various Establishments ( as per enclosed general map) , the activities of which appear from the single descriptions of each Work. It belongs to the I.R.I. Group ( Industrial Reconstretion Institute).

Apart from the activity of the Establishment Managing Offices, which are directly managing each Establishment, the Company has a Head Office leading the various Establishment activities coordinating them and representing the Company legally, for any occurrence.

Normally the Head Office is in charge of a Chief Administrator and of a Board of Directors.

Under present circumstances their tasks are conferred on a provisional Commissary, Prof. Dott. Ernesto Manuelli, Vice General Manager of the Company.

Moreover, the National Liberation Committee for Liguay on request of the Ansaldo workers, has required:

1. = Dott.Ing. Flavio Parda
2. = " Mario Marcsini
3. = " Ing. Domenico Zirilli

to constitue a Commission representing the National Liberation Factory Committees, which is charged to cooperate with the provisional Commissary.

In order to carry out the directions of the High Staff of the Company the Head Office is divided into several sectors viz:

- Plant and Production Sector-Central Director Dr. Ing. Guido Viganassi
- Vice Director Cav. Mario Scotti - Dr. Ing. Silvio Sestone.
- General Administration Sector - Central Director Dott. Arnaldo Giannini - Vice Director Mr. Costantino Salbiati and Dr. Rag. Riccardo Pigafetta.
- Supply Sector - Central Director Dr. Ing. Ernesto Giovene.
- Central Trade Sector - Central Director Dr. Ing. Gino Isidori - Vice Directors Dr. Ing. Amedeo Cocuccio ( for the inland trade coordination) Dr. Ing. Virgilio Biondi ( for the foreign trade).
- General Secretary Office - Executive Dr. Goffredo Gilella.
- Central Personnel Section - Executive Dr. Emanuele Risoi.

In its normal activity, besides an Establishment at Pozzuoli ( Naples) for manufacturing and repairing ordnance material and for engineering constructions, this company has its own Agencies managed by the Company's executives in several Italian towns, and regions, viz.: Rome, Milan, Turin, Trieste, Bologna, Padova, Venice, Sardinia.

Declassified E.O. 12356 Section 3.3/NND No. 785019

and of a Board of Directors.

Under present circumstances their tasks are conferred on a provisional Commissary, Prof. Dott. Ernesto Manuelli, Vice General Manager of the Company.

Moreover, the National Liberation Committee for Ligury on request of the Ansaldo workers, has required:

1. = Dott.Ing. Flavio Foidn
2. = " Mario Marcsini
3. = " Ing. Domenico Zirilli

to constitute a Commission representing the National Liberation Factory Committees, which is charged to cooperate with the provisional Commissary.

In order to carry out the directions of the High Staff of the Company the Head Office is divided into several sectors viz:

- Plant and Production Sector-Central Director Dr. Ing. Guido Viganuzzi
- Vice Director Cav. Mario Scotti - Dr. Ing. Silvio Tectens.
- General Administration Sector - Central Director Dott. Arnaldo Giannini - Vice Director Mr. Costantino Balbiani and Mr. Rag. Ricardo Pigafetta.
- Supply Sector - Central Director Dr. Ing. Ernesto Giovene.
- Central Trade Sector - Central Director Dr. Ing. Gino Isidori - Vice Directors Dr. Ing. Amadeo Cesaraia ( for the inland trade coordination) Dr. Ing. Virgilio Biondi ( for the foreign trade).
- General Secretary Office - Executive Dr. Onofrio Milella.
- Central Personnel Section - Executive Dr. Emanuele Ricci.

In its normal activity, besides an Establishment at Pozzuoli ( Naples) for manufacturing and repairing ordnance material and for engineering constructions, this company has its own Agencies managed by the Company's executives in several Italian towns, and regions, viz.: Roma, Milan, Turin, Trieat, Bologna, Padova, Venice, Sardinia.

2587

General remarks

1°) - In their whole the Ansaldo production equipments have not suffered substantial damage through bombardments: out of a total of more than 4000 machines only 90 have been destroyed and about 400 damaged.

2°) - No damages of consequence have been caused by the rating Germans. The provided for destructions ( among which that of the 4 pillars of the Ship Yard) have been prevented.

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

3°)- The machinery transfers ( nearly all to Lombardy and Piedmont) concern the Artillery Works ( nearly all of them) the Elektro Engineering Works ( half of them) the Fossati Works ( two shops) and Engineering Works ( one shops ).

4°) The working possibilities of the Ansaldo concern would be good should fuel not be missing altogether and the stocks of material had not been considerably shortened.

5°) The Ansaldo concern had never anything to do with overhauling of internal combustion engines for motor vehicles or of motor vehicles in general. Our Engineering Works could however soon equip themselves for engine overhauling and by the Fossati Establishment it would be possible to conveniently organise a center for the overhauling of motor vehicles. The Fossati is besides, even at present in a position to repair armoured cars and to rapidly increase this activity.

Intelligence Target : Add. G.

1.) Normal production : Construction and repair of tanks and armoured cars (not including the engines)
- Hot forging and pressing of medium and small pieces.
- Iron, bronze and light alloy castings.
- Machining of steel, cast iron and bronze propellers.
- Heat treatment of ferrous materials.

2.) Actual production possibilities. The establishment is in a position to resume promptly its normal production.

3.) Electric Power: 15.000 KVA

4.) Workers:
- Normal number : 3.200
- Present number: 2.500.

5.) Shops: Iron structural shop: Forging shop, Chemical Laboratory, die machining shop Hammers, Assemblages, Spare part shop, Turnery, Pressing and forging shop, Heat treatments.

6.) Stock on hand: About 6.000 tons of ferrous metals and their alloys.

7.) Conditions of plants: The general conditions of plants are quite satisfactory. The machines have suffered no damage through bombardment

8.) Mines: The establishment has not been mined.

9.) Overhauling of vehicles: The establisment has never carried out motor vehicles overhauling except in a small department for motor car repairs, owing however to the works that has been carried out so far in the establishment, this is in a position to provide very promptly for the necessary equipment for overhauling motor vehicles, engines excepted; theses could be taken charge of by the Engineering Works. The Establishment is able to carry our repairs of armoured cars at once, engines excepted of course.

ANSALDO ENGINEERING WORKS

18th May 1945

LIST OF THE MAIN WORKS BEING CARRIED OUT
IN CENTRAL AND SOUTHERN ITALY.

---

Soc. ELETTRICA SARDA - Rome. N° 2 22.500 kVA transformers 120.000/74.000 - 50 cycles natural cooling - for the Villasor substation.
The first unit was requisitioned by the Germans and sent to Germany.
This unit requires all materials for its reconstruction.
The 2nd unit which has also been requisitioned is in our shop for finish working, so far it is by 60% finished. Most of the materials are on hand.

AZIENDA GOVERNATORIALE ELETTRICIT&' ED ACQUE - ROME - N° 1 generator 25.000 kVA - 9.000 Volt - 2.700 r.p.m. 45 cycles for the Steam Power plant in Rome. The materials are ready for assembling in the power plant.

LARDERELLO S.A. PER LO SFRUTTAMENTO DELLE FORZE ENDOGENE - FLORENZ.
1) N° 4 generators 30.000 kVA - 10.5000 V. - 3.000 r;p.m. 50 cycles for the Larderello power plant.
Average percentage of carried out work: 40%
Large part of the materials is on hand.
2) N°2 three-phase transformers 6.000 kVA - 10.500/4.500 V. - 50 cycles, natural cooling - for feeding the auxiliary services of the power plant for the 30.000 kVA set.
Percentage of carried out works: 75%
Large part of the materials is on hand.
3) generator repair: 930 kVA
Percentage of carried out works: 10%
Small part of the materials is on hand.
4) - Reserve parts of exciting machines for generators of 15.000 kVA already furnished.
Percentage of carried out work: 0%
No material on hand so far.
5) - N° 1 generator 4750 kVA - 4500 Volt - 3000 r.p; m. - 50 cycles, destined to the power plant of Sasso Pisano.

SOC. GENERALE ELETTRICA DELLA SICILIA - PALERMO N° 1 couple of generators destined to the construction of a Ljungstrom generating set - 14.300 kVA - 9000/11000 Volt - 3000 r.p.m. - 50 cycles destined to the steam power plant of Porto Empedocle.

Risposta a nota del
N° Div.

OGGETTO Società Impianti Elettrici del Calore-Centrale Idroelettrica di Montemiletto

Il 2 c.m. la Società Impianti Elettrici del Calore, Avellino (Via Due Principati 32) ha richiesto allo scrivente l'assegnazione di 300 tnn di cemento necessarie per la costruzione di una diga di cubatura 1960 $m^3$.

Si tratta della diga di sbarramento da ricostruire (essendo stata l'originaria distrutta per eventi bellici nel 1943) dell'Impianto Centrale Idroelettrico di Montemiletto (Avellino) sul fiume Calore.

La Centrale ha un gruppo coassiale di 126 Kw e uso sussidiario a cinghia da 60 Kw.

La produzione normale media, mensile, si aggira intorno ai 100000 Kwh che si distribuiscono per luce e forza motrice in 18 centri abitati della provincia di Avellino.

Questo Ispettorato Generale, attraverso propri organi, ha accertato che il quantitativo sopraelencato è tutto necessario. Esso ritiene essere conveniente fare questa assegnazione perché con un'assegnazione relativamente modesta di cemento si dà vita ad un sensibile gruppo di abitanti che, oramai, da molto tempo è privo della tanto necessaria energia.

Pregherebbe, pertanto, Codesta Sottocommissione 2571 di volersi compiacere disporre in senso favorevole. Rimane in attesa di un cortese riscontro.

ALLA PUBLIC. WORKS E UTILITIES SUB
COMMISSION HQ AC. APO 394
R O M A

Fin dal 1940 abbiamo inoltrata domanda alle Autorità Competenti di quel tempo per ottenere l'assegnazione di 1500 quintali di cemento tipo 450-500 per ultimare i lavori della terza centrale idroelettrica della potenza di 300 HP. in Comune di Longobucco, (Cosenza) già al completo di macchine elettriche idrauliche e che dovrà alimentare unitamente alle altre centrali le reti di distribuzione della Società Elettrica delle Calabrie con sede in Catanzaro.-

Le domande avanzate in varie epoche sono state rimaste ad oggi inevase. Il 16 dicembre 1944 ci siamo rivolti alla Commissione Alleata di Catanzaro e questa accoglieva la ns/ richiesta, la inoltrò alla Camera di Commercio di Cosenza come copia che si acclude.-

Ripetiamo ancora una volta la domanda diretta al Ministero Industria e Lavoro e questa con nota del 18 corrente mese n° 1758 Div. V ci comunicava di rivolgere a codeste Spett. Commissione.-

Inoltriamo pertanto la domanda a codesta Spett. Commissione allegando prospetto per la distribuzione mensile dei 1500 quintali richiesti.-

Alleghiamo due copie di domande per la 237 postrazione delle pratiche a suo tempo inoltrate.-

Fiduciosi attendiamo comunicazione al più presto in considerazione dell'urgenza dei lavori da ultimarsi.-

Declassified E.O. 12356 Section 3.3/NND No. 785019

Il prodotto richiesto è destinato a completare una Centrale Idroelettrica sul fiume Trionto di 400 HP. energia che viene ceduta in blocco alla Società Elettrifa delle Calabrie con sede in Catanzaro per potenziare l'attuale impianto che serve tutti i paesi dell'ex- circondario di Rossano, sia per la pubblica che per la privata illuminazione che per le industrie-in modo speciale per il molino di alta macinazione nei pressi della Stazione ferroviaria di Rossano, ai molini rurali della zona oltre a diversi stabilimenti oleari,il tutto assolutamente indispensabile date le attuali contingenze.-

L'impianto è al completo di macchinario manca solo il cemento per sistemare le opere di presa.-

CAMERA DI COMMERCIO

COSENZA

La Ditta in oggetto ha presentato una domanda a codesto Ufficio per l'assegnazione di 500 quintali di cemento per la costruzione di una Centrale idroelettrica la quale aveva già avuto l'approvazione da parte nostra ed anche oggi l'approviamo.-

In considerazione che l'installazione per la fornitura di energia elettrica sarà per il bene pubblico noi apprezzeremo l'accoglienza benevole da parte del Vs/ Ufficio.-

ROMA

OGGETTO: CENTRALE IDROELETTRICA CAMPITELLI
5ª DOMANDA PER ASSEGNAZIONE CEMENTO

1°) - Domanda 16/5.1940
2ª) - Domanda 5/5.1941
3ª) - Domanda 21/7.1941
4ª) - Domanda 24/4.1942
5ª) - Domanda 16/11.942

Tutte le domande sono rimaste a tutt'oggi inovase speciamo che quest'ultima venga presa in considerazione.-

Assegnandoci con la massima urgenza i 1500 quintali chiesti su la Ditta Zippitelli di Bari o Salerno. Tale cemento serve per ultimare i lavori della Centrale di Campitelli in Comune di Longobucco (Cosenza) della potenza di circa 300 Kw. che dovrà alimentare unitamente alle altre centrali della Soc. An. Idroelettrica Smurra, le reti della Società Elettrica delle Calabrie. Si fa noto che l'impianto è al completo di macchinario e non manca (da più di tre anni e mezzo) che il solo cemento.-

L'Ufficio idrografico di Catanzaro, s'interessò ripetutamente ed ha riferito al Superiore Ministero in merito alla mancata ultimazione dei lavori.-

Rossano, lì 16 novembre 1942

# ISTITUTO NAZIONALE PER IL COMMERCIO ESTERO

818

N. 11806 – Uff.Re/Imp.
DA CITARE NELLA RISPOSTA

ROMA, 6 GIUGNO 1945
VIA TORINO 107 - CASELLA POSTALE 1001

OGGETTO:- Prezzi "bushing" -

Come é noto sono state effettuate alla Società Meridionale di Elettricità di Napoli le seguenti consegne di isolatori passanti (bushing):

| | | | | |
|---|---|---|---|---|
| Transfer Note | n. 106 | - 11/1/1945 - | Kg. 387 | |
| " " | n.0282 | - 22/3/1945 - | " 1.234 | |
| " " | n. 080 | - 9/3/1945 - | " 263 | (Insul Z.Co.I.) |
| " " | n. 051 | - 7/3/1945 - | " 16.656 | |
| " " | n.0124 | - 11/3/1945 - | " 331 | |
| " " | n.01048 | - 22/5/1945 - | " 1.388 | |

Per quanto riguarda i prezzi di detto materiale nessuna specifica comunicazione ci é finora pervenuta. Dal listino prezzi inviatoci in data 22 marzo u.s. con lettera n. 1804/ES rileviamo tuttavia i seguenti "landed cost":

| | | | |
|---|---|---|---|
| - bushing for circuit breaker | each | lire | 131.000 |
| - bushing for transformers | each | " | 35.157 |

che riteniamo non applicabili alle partite summenzionate, per le quali i quantitativi sono espressi in rapporto al loro peso.

SUBJECT: Request for Maintenance Items for ITALIAN Civilian Utilities

TO : G-5 Section, AFHQ

1. Your letter, ref. T/8, dated 11 April 1945 and enclosures, refer.

2. The motion prompting the action of the Commanding Officer of P.B.S. in releasing the tyres and tubes detailed in your above mentioned letter, is greatly appreciated by this H.Q., and an equal replacement from A.C. stocks will be made as and when supplies become available.

3. In view, however, of the paucity of supplies, allocation of these tyres and tubes should be left to the discretion of this H.Q. by virtue of its over-all knowledge of the transportation situation throughout Italy at the present time.

Con foglio nº1 in data 19 Aprile 1944 il 1441°Ordnance Supply & Maintenance Co. 43° Service Group,tramite il signor tenente D.V. Boscarelli-Spply Officer,mi requisiva in Officina nº1 Generatore da KW 6,5 Volts 110-220,trifase,con reostato,che si apparteneva al Comune di Nocara (provincia di Cosenza) che me lo aveva affidato per la riparazione e che,a lavoro ultimato,non potetti spedire per difetto di mezzi di trasporto.

Invitato a presentare la fattura,questa fu da me stilata il 28/4/1944 sotto il nº069/44 per la somma di £.23.000.=

Tenuto conto che non è il pagamento del prezzo segnato in fattura che mi interessa,quanto mi interessa invece rientrare in possesso della macchina requisitami,sono a pregarVi di voler gentilmente disporre sin d'ora presso il Comando competente che non appena la macchina medesima non servirà più per l'uso al quale è stata adibita mi venga senza ulteriore procedura restituita.

Confido che codesta Onorevole Commissione non troverà nulla in contrario ad aderire alla mia richiesta,ringrazio in anticipo e distintamente saluto.

Subject: ACETYLENE FOR TORRENOVA STATION

3205

To: Major L.J.Price, R.E.
Public Works & Utilities
Electric Division
ROME.

We have duly received Release Order No. AC 2789 dated 18 April 1945, and thank you most warmly for the interest you have taken in connection with the release of the acetylene necessary for lighting the antennas of our Torrenova Radio-electric station.

We notice that the R/O in question only covers our requirements for the month of April, and we beg to ask you, therefore, to assist us in getting the above material also in future.

As already pointed out, the acetylene we need, mainly concerns the security of the military aircrafts flying during the night over Ciampino airport, close by Torrenova station, and we trust there will be no difficulty in assuring the regular supply of the above-mentioned item during the months to come.

With renewed thanks, we remain, dear Sir,

Very respectfully yours,

JUSTIFICATION: Exhaustive enquiries have been made to obtain from civil sources without result.
The number demanded is required to be installed in the hydro-electric stations of Farfagliorino, Fontecupo, Fontefiume, and Terni which stations are scheduled for completion during this six months rehabilitation programme and the batteries are to be used for providing direct current to operate auxiliary apparatus.
It is absolutely essential to instal batteries for the above mentioned purpose and it is suggested that the batteries be obtained through Ordnance channels.

ELECTRICAL DIVISION

MEMORANDUM FOR FILE

13 April 45

Reference : 306/PWU

Subject : Checking of Requisition Division AC

At the request of Economic Section Major Price and myself went over the specification on electrical equipment and apparatus on 11 and 12 April.

These requisitions call for material to be used for the rehabilitation of Industrial Institutions in Italy.

Category "A" comprising the following classifications were checked :

III - Agriculture
IV - Industry
V - Mining
VI - Coal and Miscellaneous

Since the electric motors, called for on requisitions, specify frequencies of 42, 45 and 50 cycles and in many cases call for special voltage leads, the following statement was made to the Italian Government Representatives who were present at the meeting :

" It has been pointed out to the Italian Government representatives that electric motors which require special voltage leads and characteristics to operate on 42 cycles are not likely to be stock items and will have to be manufactured. The same conditions will be true for motors to operate on 45 and 50 cycles. The Standard frequency in the U.S. is 60 cycles".

Specific corrections were made on the following requisitions :

FISHERIES SUPPLIES - PROGRAMME IIIa

Requisition AC-QM/ENG/TC- 121-45
MGS-290-QM/ENG/TC

Page 4 Item 12a should read 50 cycle 2539
and not "150"

Declassified E.O. 12356 Section 3.3/NND No. 785019

TEXTILES - PROGRAMME IVa

Requisition N° AC-QM-109-45
Page 1 Item 9 reading as follows :
"Insulating tape rubber Wool 200 - cotton 200"
should have the word "Industry" to be added after the words "Wool" and "Cotton"

MINING - PROGRAMME Va

Requisition AC/ENG/89/45 - Page 10
Item 8 "Sockets porcelain"
Should have "Lamp holders" added to the statement.

13 April 1945

SUBJECT : Repair of Grain Elevator at Castellammare & Torre Annunziata.

TO : AFHQ-G-5 Section
Economics & Supply (Attention; Maj. R. F. Grady)

1. Reference your letter G-[illegible] of 9 April 1945. The action referred to in Food Sub-Commission's letter 71-1/52/Food dated 7 February, was the contact made with departments of the Allied Commission and AFHQ, view to processing the necessary materials for the grain elevators.

2. The nature of the material required extensive screening by various departments, and at one stage it was difficult to follow how far the work had progressed, but a visit to AFHQ by representatives of the Transportation Sub-Commission, confirmed that the work was in hand.

3. This Division has prepared a U.S.C. Form No. 400, to cover the materials and it will be forwarded through channels, under separate cover. As regards the demand for belting, we have been advised that 20 HP have the necessary authority to manufacture, but we have no knowledge of the progress made in respect of the iron sheets, rivets and nuts.

3 April 1945

SUBJECT: Repair of Grain Elevator at Castellammare and Torre Annunziata

TO : Headquarters, Allied Commission, APO 534
(Attn: Transportation Sub-Commission)

1. Reference phone conversation Lt. Lathrope/Lt. Worley and AC letter reference 71-1/58/Food of 7 February 45.

2. The present position as known here follows. The DEP&S, AFHQ who controls 80 EPW has received requests from various sources for maintenance and repair supplies for the grain elevators at Castellammare and Torre Annunziata. A recently received request, apparently from the plant manager, is attached.

3. The DEP&S, who is fully cooperative, has not been able to obtain additional information when required nor been able to ascertain to whom material should be released when available, nor has he been able to establish the validity of the various requests which have reached him.

4. The failure of the grain elevators would materially affect the rate of discharge of grain ships and the urgency of the situation requires a complete review at this time.

5. It is requested that the Allied Commission:

a. Outline the action taken as stated in the letter of 7 February, detailing what supplies have been requested and to whom requests have been made.

b. Indicate what supplies have been received, and the present condition of the elevators.

c. Submit a consolidated demand to this section and indicate what requests this demand supercedes. This demand should include the attached list if the supplies listed are still required. It should also show a breakdown of requirements between Castellammare and Torre Annunziata; to whom within the 25 release notes should be sent to arrange collection; the desired rate of delivery; a priority rating showing the most critical items;

and the period covered by the request.

6. DEP&S has authorized the 80 EBW to commence manufacture of 285 meters of elevator and conveyor belting and information copies of Demand No. 1592 dated 31 March 1945 have been forwarded to A.C. To what extent this meets the total requirements for the elevators should be indicated.

Subject : Cement- Electrical Rehabilitation

To : Director of Engineer Production and Stores
A.F.H.Q.

1. For the repairs and reconstruction work of the Tivoli and Fontecapa Power Plants
150 Tons Cement
is urgently required.

2. This application is very urgent since the situation is now critical. Reconstruction work has been interrupted due to lack of Cement.

3. We shall be glad to know that 150 Tons Cement can be made available for our important programme of Electrical Rehabilitation, since no availability is known at present by Commerce Sub Commission, it is hoped that a supply will be made available to us in the near future.

4. Will you please authorise No.3 Det North 30 EDW Spoleto to release this amount to us to enable Power Station to carry out their programme.

Subject : Electrical Wire redrawing.

To : Electrical Section
Public Works & Utilities Sub-Commission
Allied Commission.

1. Three electrical operating Companies in this area ( Soc. Elettrica Romagnola, Soc. Idroelettrica dell'Alto Savio, Impresa Elettrica Riccione) are in desperate need of wire redrawing for the copper they have managed to salvage from their many badly destroyed lines.

2. Would it be possible to have your Headquarters arrange for the redrawing of this copper by CORRADINI in Naples?

3. This Headquarters will arrange transport of copper to Naples.

4. Total amount of copper involved is some 15 tons.

Reference your LCP/55 dated 21/3/45.

1. The endorsement on your release order attached your letter to the effect "Payment will be made against delivery of the Gas" is not understood.

2. As was previously discussed by Capt. W. Woodall and Major LC Price this office is in no way responsible for recovering the financial liabilities of Italian Civilians and no facilities or organisation exists at the Gas plants.

3. It was agreed by Major L C Price and confirmed vide telephone conversation of 21st. March (Woodall-Price) that the issues could only be made by the Gas Plants to Civilian Contractors in the following circumstances:

(a) Civilian representative must be in possession of a signed authority from your office.

(b) Civilian representative must produce, in addition, a receipted bill from your office proving prior payment for the total quantity of gas to be drawn.

(c) Gas to the quantity shown on receipted copy of this bill will then be issued.

4. Will you please take all necessary action to put this procedure into effect.

This Agency have started to rebuild partially the Orvin hydraulic station at Sambucheto (Macerata) which on June last is been destroyed by german troops on their retreat.

To retaking some walls and to repair the roof and primei bally( the re-construction of the hydraulic turbine bases. and the alternator) need (to have the assignment of the following materials:-

30 Q.li (3 tons) cement
3.000 briers
10 Q.li (1 ton) hydraulic lime.
2.000 roofing tiles

The supply producing by this Electric Coy, is used now for pumping water, for lighting, and for industry purpose, for this reason asking the above materials to re-establish the said station.

COMANDO C.R.E.

A N C O N A

OSIMO li 16 febbraio 1945

Questa Azienda ha iniziato la parziale ricostruzione della propria centrale idroelettrica di Sambucheto ( Macerata) che nel giugno scorso era stata distrutta dalle truppe tedesche in ritirata.-

Per il lavoro di ripresa di alcune murature, per la ricostruzione del tetto e sovratutto per la ricostruzione dei basamenti delle turbine idrauliche e degli alternatori necessita a questa Azienda avere l'assegnazione dei seguenti materiali:

| | | |
|---|---|---|
| Cemento del tipo 500 | Qli 30 | ( trenta) |
| Mattoni mazzocchi | n.3000 | ( tremila) |
| Calce idraulica | Qli 10 | ( dieci) |
| Tegole marsigliesi | n.2000 | ( duemila) |

Con la presente si rivolge domanda a codesto Spett/ C.R.E. per detta assegnazione, certi del buon esito, trattandosi di ripristino di un servizio pubblico, inquanto l'energia prodotta dalla suddetta centrale viene utilizzata per il sollevamento della acqua dell'Acquedotto Comunale di Osimo, per la illuminazione e per le industrie della città.-

Con osservanza.-

Firm Di Salle - Naples

Dear Maj. Price:

With reference to a previous application for cement entered by engineer Di Salle - Naples, please find enclosed herewith a letter addressed to you, by which he is asking for a release of a relatively small amount of steel round bars.(+) This is necessary to him in order to proceed with the erection of one small workshop isle which would enable him to move away from the Poggioreale S.M.E. substation premises

If the situation is such that this material could be released to the firm Di Salle without interfering with other requisitions of higher priorities, the S.M.E. engineers and myself would very much appreciate your taking his application into favourable consideration.

Hoping to have again a chance to see you in Rome, please accept my kindest regards.

(+) 2,5 Tons 1/2" dia.
2,5 Tons 5/16" dia.

Industry Sub-Commission.
Public Works Sub-Commission.
Roads Division, Tn. S/C.

1. Attached at Appendix "A" is a list of commodities which were in A.C. Warehouses on the 28th February, 1945.

2. Some of these commodities have now been cleared, but the majority are still in the warehouses.

3. Most of these commodities have been imported from overseas and it would appear that delay is occurring in arranging for their final distribution; at the same time this Sub-Commission has been informed that they are urgently needed.

4. Will addressees please examine the list and take the necessary action to ensure that instructions are issued through the appropriate authorities for the distribution of the articles, and that the necessary bids for movement are made. 210.

Lt Col Rogers and
Maj. Price

See sheet 3 - Pls try to have our materials removed as fast as possible when notified as warehouse space is at a premium

N A P L E S

INDIRIZZO TELEGRAFICO: SAFEN - NAPOLI

Supply of Ethyl Chloride for geothermic plant of Cotara in Ischia Island -

The "SAFEN" - Soc. An. Forze Endogene Napoletane ("Neapolitan Endogenous Power Co.") has the purpose of exploiting the endogenous power of the volcanic underground surrounding Naples and the Island of Ischia, for the production of electric power.

The "SAFEN" has built two geothermic plants in the Island of Ischia, for a first practical exploitation, capable of providing the electric power needed by the Island. The largest of the two plants whose power is 300 KW, has been built in Cotara; it exploits the thermal power of the underground at a temperature of 92°-98° C, by means of an intermediate fluid, the Ethyl Chloride ($C^2 H^5 Cl$), which operates a turboalternator group. This plant has recently been completed in all its parts, and to be started it needs

tons 2 Ethyl Chloride ($C^2 H^5 Cl$)

One ton Ethyl Chloride is the quantity wanted for the normal fonctioning of the plant; the second ton is necessary to replace the running losses over some years.

The "SAFEN" does not foresee the direct sale of electric power to the customers, but rather the sale of it, by means of already nearly completed electric lines, to the two Firms ("Ing. Gasperini & Co." and "Ing. Simeoni e Zappi") which at present provide the Island with production and sale of electric power by their own plants.

At present the old existing plants worked by "Diesel" motor attain 300 KW in the rush moments.

.//.

Fornitura di cloruro di etile per la centrale geotermica di Cotara in Ischia -

La "SAFEN" - Soc. An. Forze Endogene Napoletane - si propone di sfruttare, per la produzione di energia elettrica le forze endogene del sottosuolo vulcanico dei dintorni di Napoli e dell'Isola di Ischia.

In questa Isola, per raggiungere una prima pratica realizzazione, ha costruito due centrali geotermoelettriche, tali da sopperire all'attuale fabbisogno dell'Isola. La maggiore di dette Centrali, della potenza di 300 KW, sita in località Cotara, sfrutta l'acqua termale del sottosuolo, che ha una temperatura di 92°-98° C servendosi di un fluido intermediario (cloruro di etile, $C^2 H^5 Cl$) che a sua volta aziona il gruppo turboalternatore. Questa Centrale è attualmente completa in tutte le sue parti. Perchè essa possa entrare in funzione occorrono ora

ton. 2 di cloruro di etile ($C^2 H^5 Cl$)

Circa una tonnellata è il quantitativo occorrente per il normale funzionamento dell'impianto, una seconda è prevista per compensare le perdite di esercizio per qualche anno.

La "SAFEN" non prevede di vendere direttamente l'energia elettrica ai consumatori, ma di fornirla mediante linee già quasi ultimate alle due ditte - Ing. Gasperini & Co. e Ing. Simeoni e Zappi - che con i propri impianti provvedono alla produzione e vendita di energia elettrica nell'Isola.

Mod. 7 (2000) Tipl A. Traul - 6-42

Declassified E.O. 12356 Section 3.3/NND No. 785019

SOC. AN. FORZE ENDOGENE NAPOLETANE
S. A. F. E. N.

The plant of Cetara will allow a much more regular distribution during the 24 hours, thus saving, besides, about 300 tons imported gasoil per year.

This very important public service not only insures the supply of electricity to the 30.000 inhabitants of the Island, but it also serves the two Rest Camps of Ischia proper (Brit.) and Casamicciola (U.S.A.), beside the British Royal Navy dock yard at Ischia Port.

Obviously this advantage makes it worth while for the A.C. to overcome the difficulties of transport for the required Ethyl Chloride, since the supply once in a while of

tons 2 Ethyl Chloride ($C^2 H^5 Cl$)

easily available abroad, means for the A.C. the saving of supply and transport of so much as 300 tons naphta per year.

Therefore the "SAFEN" (which is ready to pay cash for the supply) trusts that the above mentioned chemicals can be made available for them as soon as possible.

Soc. An. FORZE ENDOGENE NAPOLETANE
(SAFEN)
Il Direttore

Attualmente i vecchi impianti esistenti azionati da motori "Diesel" raggiungono nei momenti di maggior consumo i 300 KW.

La Centrale di Cetara permetterà una distribuzione molto più regolare nelle 24 ore, facendo risparmiare circa 300 tonn. di gasoil per anno.

Questo importante servizio pubblico, oltre ad assicurare la fornitura di energia elettrica ai 30.000 abitanti dell'Isola, provvede ai bisogni dei due "rest camps" alleati di Casamicciola (U.S.A.) e Ischia (Inglese) ed a quelli del Cantiere di Ischia Porto al servizio della Royal Navy.

E' evidente quindi la convenienza da parte della C.A. di superare le difficoltà di trasporto per il cloruro di etile richiesto in quanto la fornitura una tantum di

2 tonn. di cloruro di etile ($C^2H^5Cl$) facilmente disponibile all'estero, risparmia la fornitura e il trasporto di tonn. 300 annue di nafta.

Pertanto la "SAFEN" (che è pronta a pagare per contanti la fornitura) confida che il prodotto di cui sopra le sia fornito al più presto possibile.

SUBJECT: Cork Sheets for Italy

TO : Headquarters, Allied Commission, APO 394
(Attn: Commerce Sub-Commission)

1. Reference is to Requisition M33-261-END, items 12 and 13 (cork sheets for gaskets), and to Allied Commission letter ACC/5127/37/ Commerce of 23 October 1944.

2. It appears that there is sufficient raw cork and facilities for the manufacture of cork sheets. Ammonia Plant of Follonica, Grossetto Province, is cited as an example.

3. It is thought that there should be sufficient demand for cork sheets for automotive gaskets, insulation uses, and similar purposes which would justify an effort to manufacture cork sheets, if plants are not already doing so.

4. It is suggested that Italian resources be investigated and this Section be notified if items 12 and 13 may be eliminated as an import requirement.

OGGETTO: Assegnazione di filo di rame isolato.

Il Lanificio F.lli Tavani, con sede in Chieti segnala che dopo le riparazioni ai danni subiti dalla centrale in servizio del proprio opificio ha esaurito ogni scorta di filo di rame isolato a seguito dell'avvenuta bruciatura di due bobine di un alternatore.

E Poichè la centrale stessa funziona in parallelo con le altre centrali sul fiume Verde, al fine di evitare ulteriori inconvenienti la ditta suindicata chiede l'assegnazione di 12 Kg. di filo di rame isolato per avvolgimenti da 32/10 e da 38/10 di m/m al fine di avere una sufficiente scorta.

Compatibilmente con le altre più urgenti necessità, prego esaminare se sia possibile effettuare tale assegnazione.

I am herewith enclosing a letter received from "Morgan Crucible Company London" and as you will note they suggest that I get into touch with you regarding the ordering of their goods.-

I now have orders for Morganite qualities for dynamo brushes and various other eletrical equipment, and should be peased if you would advise me as to the procedure of obtaining these supplies from Messrs.

Thanking you in anticipation.

Yours sincerely,

Velonà

P.S. This material in urgently needed in order to continue essential services of the municipality (railways, tramways, eletric power ect.) as all existing stocks have been exhausted.

TRADE MARK

Dr. Ettore Velona,
Via Francesco Crispi 91,
Naples,
ITALY.

Dear Sir,

A short time ago we received a letter from Captain S. Allen, Church Army, who passed on to us your message, for which we thank you.

We should be very glad to have such news of the Belotti organisation as is available, though we presume you have not had any very recent news from the heads of the firm.

As regards business, this must, of course, be passed through the Military Authorities, and we presume that should you have enquiries or orders to place, you will contact the British Military Authorities.

We would point out that it is very desirable to insist on the Morganite qualities being supplied, as otherwise there is a risk that such orders may find their way to other makers.

Now that the postal services are open for the exchange of correspondence on commercial questions, we shall hope to hear from you very shortly.

Yours faithfully,
THE MORGAN CRUCIBLE COMPANY LIMITED

Con la presente vi chiediamo notizia sullo stato delle pratiche da voi svolte per la fornitura di spazzole di marca originale "Morganite", indispensabili al buon funzionamento dei nostri motori elettrici di trazione ad alta velocità e delle commutatrici delle sottostazioni elettriche.

Avendo le scorte di carboni in via di esaurimento, vi preghiamo vivamente di svolgere tutto il vostro interessamento presso la fabbrica, al fine di provvedere tempestivamente ai bisogni del nostro esercizio filo-tramviario; tanto più che, secondo le promesse fatteci dal G.M.Alleato, possiamo contare su una maggiore assegnazione di energia pel prossimo Marzo, ciò che ci consentirà di mantenere il servizio per tutta la giornata.

Distinti saluti.

SUBJECT: Requisition AC-RNG-81-45, Glass Tubes and Ganges for steam Power Station, Naples.

TO : AFHQ, G-5 Section, Economic & Supply Division.
Attn: Lt. D. E. Lathrope.

1. Reference is made to your letter 17 February Ref. E-1. Request is hereby made that action be taken to obtain the above mentioned subject items from U.S. or U.K. as soon as possible.

2. It is requested that the following statements be included in the justification of the above mentioned requisition:

a. Exhaustive enquires have been made during the past six months to discover whether any of the items can be obtained or manufactured in this theatre, the result is a blank and the Capuana Steam Station reports the situation now becoming serious.

b. The items as demanded are considered to be sufficient for twelve months maintenance.

c. So far as boiler tubes are concerned, experiments are being carried out, by welding the tubes recovered from the war damaged boiler, but the results are not considered very satisfactory.

d. Material as demanded required urgently.

e. Capuana steam station is the only plant to be depended upon in the event of interruption of the southern network.

TO : AFHQ, G-5 Section, Economic & Supply Division.
Attn: Lt. D. E. Lathrope.

1. Reference is made to your letter 17 February Ref. E-1. Request is hereby made that action be taken to obtain the above mentioned subject items from U.S. or U.K. as soon as possible.

2. It is requested that the following statements be included in the justification of the above mentioned requisition:

a. Exhaustive enquiries have been made during the past six months to discover whether any of the items can be obtained or manufactured in this theatre, the result is a blank and the Capuana Steam Station reports the situation now becoming serious.

b. The items as demanded are considered to be sufficient for twelve months maintenance.

c. So far as boiler tubes are concerned, experiments are being carried out, by welding the tubes recovered from the war damaged boiler, but the results are not considered very satisfactory.

d. Material as demanded required urgently.

e. Capuana steam station is the only plant to be depended upon in the event of interruption of the southern network.

For the CHIEF COMMISSIONER:

HARLAN CLEVELAND
Executive Director
Economic Section

Subject : General Construction Material

To : Whom it may concern

1. This is to certify that the Firm Ferroben is contracted to carry out important work of both military and civil importance on behalf of Allied Commission namely :-

a) Reconstruction of Railway Bridge over the river Arno.
b) Reconstruction of Ceprano Hydro electric station

it is important therefore that no obstacles are presented to the Firm Ferrobeton to delay this work.

2. Both the above jobs are being delayed because of lack of building materials, early movement is therefore essential.

OAC:cl

5 March 1945

Ref: ES-400/162-RB

SUBJECT: Asbestos Fibre Sheets and Heat Resisting Cloth.
(Reqn AC-NRG-80-45)

Lt Col Rippon

TO : AFHQ, G-5 Section, Economic & Supply Division.
Attn: Lt. D.E. Lathrope.

1. Reference is made to your letter E-1 dated 20 Feb '45 and telephone conversation of 3/1/45.

2. A thorough check has shown that Asbestos fibre sheets are not available locally.

3. A further investigation of the requirements of the Capuana Station has indicated that the amount of Asbestos sheets ordered would suffice for only 3 months. It is therefore requested that items 1 and 2 be increased to 100 sq. yd. each and that action be taken to obtain these items from US or UK.

4. The following is submitted as an added justification for our requirements:

a. All stock and local procurement sources have been exhausted with the complete rebuilding of the Capuana steam station.

b. The quantity now demanded is sufficient for approximately six months maintenance.

c. The packing is needed for high pressure steam joints, the description having been obtained from "Garlock" catalogue.

d. It is requested that the materials as demanded be imported at a very early date since no stocks are available.

e. In the event of "blow outs" occuring the station will cease to operate until emergency supplies can be obtained through Royal Naval channels.

f. There are no substitutes for the items specified. These items are to be used in high pressure steam joints.

SUBJECT: Electrical Materials.

TO : S.C.A.O. 5 Army A.M.G.

1. This Advanced Section of Electrical Division Public Works & Utilities Sub-Commission, Allied Commission, is operating from an office within the offices of "Società Elettrica Selt-Valdarno" 6 Via Cerretani, Florence.

2. The functions of this section are:

a) Rehabilitation of Power Plants
b) Rebuilding of Transmission lines
c) Transformer stations, sub-stations etc.
d) Liason with Electrical Companies and general supervision of rehabilitation projects.

3. The purpose of this letter is to call for your assistance in protecting the electrical materials laid in the store of the Selt-Valdarno Company.
The stores are, of course, frozen.
Releases are continually being approved and authorized to meet demands of the Army units.

4. We appreciate the importance of meeting as far as possible these demands, but would emphasise that our programmes generally include materials of the Electrical Companies: delay is often caused and work at times held up due to the fact that some unit or accessory has been released.

5. Our progress is important to the activities of C.A. functions under your command, as well as electric service to Army units. Your assistance in protecting materials referred to is requested.

OGGETTO: Firm Di Salle - Naples

Dear Maj. Price :

With reference to a previous application for cement entered by engineer Di Salle - Naples, please find enclosed herewith a letter addressed to you, by which he is asking for a release of a relatively small amount of steel round bars. This is necessary to him in order to proceed with the erection of one small workshop isle which would enable him to move away from the Poggioreale S.M.E. substation premises.

If the situation is such that this material could be released to the firm Di Salle without interfering with other requisitions of higher priorities, the S.M.E. engineers and myself would very much appreciate your taking his application into favourable consideration.

Hoping to have again a chance to see you in Rome, please accept my kindest regards.

Ref. AC/330/17

22 February 1945

SUBJECT: Oxygen & Acetylene Issues to Civilians

TO: AMOT, B.T.O. Finance (British)

1. Your letter ref. CS/130/8/2, dated 15 February 45, refers.

2. This Sub-Commission agrees that the system as outlined in your letter under reply, for obtaining release of these commercial gases is unsatisfactory, and it is appreciated that the request contained in the letter from Societa Chimica dell'Aniene has been met.

3. With reference to para 3 of your letter, it is agreed that in the future the procedure you outlined will be followed and that approved requests will receive the usual AC release order issued by this Sub-Commission on which it will be stated that supplies can only be obtained against payment and upon civilian firms providing their own containers. Such release orders will be addressed to your office for attention.

4. It is noted that the prices to be charged are as follows:

Acetylene 33 lire per cubic meter
Oxygen 44 " " " "

5. It is understood that a periodic bulk allotment of gases will be made to AC, and as soon as the required figures are received from the Ministry of Industry, Commerce, and Labour, this Sub-Commission will advise you of the estimated quantity required for a given period.

All'attenzione del Sig. Magg. PRICE

OGGETTO: Cemento speciale per Galleto

Per la ricostruzione delle membrature in cemento armato della Centrale Galleto ed impianti annessi ci é necessario disporre di cemento speciale tipo 680. Questo tipo di cemento ci é necessario per la ricostruzione dei pilastri e sopratutto delle travi che, usando altro tipo di cemento, risulterebbero di dimensioni eccessive. Inoltre sono già state predisposte le casseforme aventi dimensioni corrispondenti all'impiego del suddetto tipo di cemento ad alta resistenza. Il totale quantitativo necessario di questo tipo di cemento é di 300 Tonn. da suddividersi in ragione di 60 Tonn. al mese nel periodo dal 1° marzo al 1° luglio del corrente anno.

Presso le nostre Cementerie di Spoleto, che hanno sempre fabbricato per noi il tipo di cemento 680, esistono già immagazzinate le prime 60 Tonn. corrispondenti al fabbisogno del mese di Marzo, e, d'altra parte, le nostre Cementerie di Spoleto sono in grado di poter fabbricare l'intero quantitativo senza intralciare la normale produzione.

Facciamo presente che la ricostruzione dell'ossatura in cemento armato di una parte del fabbricato di Galleto é necessaria e urgente

sopratutto nei riguardi della rimessa in servizio del II° gruppo Galleto, non potendo eseguire le riparazioni di alcuni locali con le macchine in servizio e le barre in tensione.

Richiediamo pertanto che ci sia concesso di prelevare subito dalle Cementerie di Spoleto le 60 Tonn. di cemento speciale tipo 680 già pronte e di autorizzare quella Cementeria ad allestirci l'intero quantitativo necessario.

R O M A

Via Vittorio Veneto

All'attenzione del Maj.PRICE

Ci risulta che presso lo Stabilimento della Gomma Sintetica di Terni sono accantonati molti tubi Mannesmann per le misure comprese tra 1/4" e 10".

Poichè siamo assolutamente sprovvisti dei tubi occorrenti per il ripristino dei restanti tre gruppi della Centrale Galleto, le saremmo grati se volesse autorizzarci a prelevare per il nostro fabbisogno dalla suddetta scorta.

Le dimensioni ed i quantitativi occorrenti sono i seguenti:

| | | |
|---|---|---|
| - Ø 3/8" | ml. 60 | Necessari per i comandi delle turbine II - III - IV Gruppo Galleto. |
| - " 1/2" | " 150 | |
| - " 3/4" | " 345 | |
| - Ø 3/8" | ml. 40 | Per le tubazioni dell'olio di lubrificazione dei cuscinetti II - III - IV Gruppo Galleto. 2413 |
| - " 1/2" | " 200 | |
| - " 1" | " 200 | |
| - " 1 1/4" | " 60 | |
| - " 1 1/2" | " 66 | |
| - " 2" | " 60 | |
| mm. 266 x 255 | ml. 45 | |
| " 165 x 155 | " 60 | |

./.

Vincent

Il Foro competente per la decisione di qualunque controversia nei confronti della nostra Società è quello di Genova.

Declassified E.O. 12356 Section 3.3/NND No. 785019

mm. 135 x 125 ml. 40
" 110 x 100 " 30
" 90 x 80 " 30

} Per le tubazioni dell'olio di lubrificazione dei cuscinetti II - III - IV Gruppo Galleto.

Inoltre poichè in uno dei trasformatori da 20.000 kVA. che dovrà essere messo in servizio con il III° Gruppo Galleto (il II° in ordine di riattivazione) mancano i refrigeranti; si dovrà provvedere al raffreddamento dell'olio con un impianto ad acqua, e pertanto necessitano ml. 100 da Ø 6".

Questi ultimi, ed 1/3 almeno dei quantitativi su riportati, sono della massima urgenza dovendo il III° Gruppo Galleto entrare in servizio per i primi giorni di Aprile.
