28 January 1946

SUBJECT: Coal Requirements - Richard-Ginori, Florence

TO : Ministry of Public Works  
(Att: Prof. A. Asta)

172

1. Transmitted herewith is letter from the above company dated 8 January, 1946 pertaining to the discontinuance of coal deliveries for the manufacturing of insulators.

2. Since the allocation of coal has now been placed in the hands of the Italian Government, would you please inform the Richard-Ginori Co. on the correct procedure of securing coal.

171  
*refers*

3. Since the manufacturing of insulators has a bearing on electrical rehabilitation, it is recommended that your office follow this matter.

GEORGE F. PARKER  
Colonel Infantry  
Chief, Electrical Division

170

With reference to your letter dated 31 Dec. 1945 306/PWU  
we have the pleasure of informing you that we have taken due note of  
its contents.

We take this opportunity of apprising you that the mon-  
thly allocation of coal for the manufacture of Insulators during  
November and December 1945 has not been supplied us.

In order to continue our production of Insulators, we beg  
you to kindly inform us which Organization shall be applied for to get  
the aforesaid allocation.

With our best regards, we beg to remain, Gentlemen,

Yours truly,

Societa' Ceramica Richard-Ginori  
Stabilimento di Doccia

SUBJECT : Weekly report Insulator allocations.  
TO : Società Ceramiche Richard Ginori,  
Colonnata - Florence

1. Effective immediately you may discontinue furnishing this office with the weekly report on Insulator manufacture.
2. This was originally requested in our letter 28 June 45, file reference 306/PWU.
3. Accept our appreciation for these reports in the past.

INTER OFFICE MEMO

161

REFERENCE: 306/PBU  
 SUBJECT: Delivery Schedule of Terni Steel.  
 TO: SEE DISTRIBUTION.  
 FROM: F. Was & U. Sub-Commission.

27 Oct 1945

A Conference with Ings. De Casperi and Casperini of the Terni Steel Works 26 October 1945 resulted in the following schedule for delivery of turbine parts for electric generating stations.

<u>Centrale</u>	<u>Delivery Date</u>
Castelnuovo Val di Cecina (2nd unit)	31 October 1945
Castelnuovo Val di Cecina (3rd unit)	15 November 1945
Acquoria (1st unit)	15 December 1945
Cotilia (1st unit)	31 January 1946
Acquoria (2nd unit)	28 February 1946
Faifa	28 February 1946
Anversa	March 1946
Cotilia (2nd unit)	June 1946
Preci	Drawings completed and program now being prepared.
Rapigno V (vertical)	No program. Drawings not yet completed.
Rapigno VI (horizontal)	No information.

The pattern shop will be free for additional work in January 1946. If additional central station work is desired, the companies must arrange for positions on the 1946 schedule immediately. The preparation of drawings will require some time and any delay at this stage will cause additional delays at late/stages of the work.

COMPAGNIA GENERALE DI ELETTRICITA'

149

ALLIED COMMISSION,

Oct 12, 1945.

R O M E

Esp. 47966

Gentlemen,

We attach herewith translation of our letter UII/SE, dated October 9th, 1945, to the Istituto Ricostruzione Nazionale, Sezione URMIT, asking you kindly to assist us in the matter in the manner mentioned therein.

We may add that our Company is an affiliation of the General Electric Company, of New York.

With thanks in advance,

Yours truly

COMPAGNIA GENERALE DI ELETTRICITA'

Enclosure: 1 Translation.

COMPAGNIA GENERALE DI ELETTRICITA'MILANOTranslation

Milan, October 9th, 1945.

Instituto Ricostruzione Nazionale,  
Sezione URMIT,  
Via Dogana, 1,  
Milano.

Subject: TUNGSTEN ELECTRODES.

Gentlemen,

Through Messrs. Ugo Perussi, of Turin, sole representative for Italy of the firms OSRAM, of Berlin, and Metallwerk Plausee, of Reutte, the following quantities of Wolframite at about 65% WO<sub>3</sub> were sent to Germany in order to be transformed into electrodes of tungsten at about 99% purity:

605.5	kilos	forwarded	Nov 5th	1942
511.8	"	"	Dec 31st	1942

A part of the above material was duly returned to us transformed, whilst there remained lying for our account with the above mentioned firms a quantity of 234,268 kilos. of tungsten metal which was at our disposal from May 12th, 1944.

For the known events the said material could not be forwarded to us and we have been unable to obtain any news in the matter.

In view of the impossibility of obtaining supplies from other sources of tungsten electrodes, it is of paramount importance for us to re-enter into possession of the above quantity of tungsten, of our property, which would allow of our meeting the requirements of our customers and maintaining in operation for at least a year over 200 Arcatom welders which we have installed in Italy.

It would therefore be necessary to interest the A.M.G. in the matter so as to secure their intervention by their taking the matter up with the A.M.G. in Germany with a view to obtaining an authorization for the transfer of the above mentioned quantity of tungsten from the aforesaid firms to us.

3127

./.

The value of the material which has remained in Germany, calculated at the present market price of Lire 22,000 per kilo., attains the amount of L. 5,153,896.

We thank you for anything you will be able to do in regard to the recuperation of the above mentioned material and are at your disposal for any further information you may require in the matter.

Yours faithfully,

N.B. In the event of it not being possible to recover the material, we ask that the corresponding amount mentioned by us be considered as a credit of ours in Germany.

142  
6 October 1945

Reference: 306/PWU

Subject : Availability of Mica in Austria.

To : Economic Section.

From : Electrical Division.

1. Transmitted herewith for your information is a copy of a letter sent to the Electrical Division from Captain P.M. Vannoy dated 25 September 1945, subject, Mica Production Austria. The letter written after Captain Vannoy had visited Austria in search of some electrical equipment removed from Italy by the Germans suggests two places in Austria from which mica might be obtained.

2. At the present time in Italy mica is one of the scarcest articles needed to repair damaged electrical equipment, and the importance of any quantity of sheet mica, however small, would materially accelerate the electrical rehabilitation program in Italy. As will be noted from paragraph 4 of the reference letter one of the arrangements which must be made prior to importing mica, would be to agree upon a means of barter between the two countries.

3. In consideration of the importance of mica to the Italian electrical industry, it is recommended that operation of importing the Austrian mica be referred to the agency concerned with making arrangements of this nature.

E.J. RISTEDT  
Colonel C.E.  
A/Director.

3111

The other gas plants in Piemonte Region require 242 tons of coke to warm their ovens. Only 15 days is required to warm these, because they are small.

To furnish gas to Turin for domestic users 3 hours per day, and other industrial users will require 6,600 tons of coal per month. To this must be added the 2,000 Tons required for Philips and Fiat, or a grand total of 8,700 Tons per month will be required, beginning Oct. 1st.

3,000 Tons of coal will be required per month to furnish gas to the other towns and cities of Piemonte. It is recommended that sufficient coal be allotted to Turin before any is sent to other places, because Turin is where the most essential industries are located. Also it is less difficult to get fuel for domestic use in the smaller places than it is in the large city of Turin.

LTGURL. - (Regional Engineer: Lieut-Col. F. S. L. LEE, h.L.)

Public Works and Utilities.

The work of this Division has been very heavy during the month under report, over 1,000 projects have been checked and approved, including 523 projects for the provinces of Apulia and Lucca prior to closing on August 4, 1945.

In general other public works in the Region are reaching the second phase of rehabilitation, and projects now being dealt with include repairs to schools, public buildings, "case popolari" and other state or municipal undertakings. There has also been a big increase in M.F.A.A. projects.

As a result of rainfall the supply of drinking water now equals demands and the special water Control Committee is no longer required. Several projects for aqueduct repairs are in hand and the position is being watched.

With the completion of the removal of debris from the...

SUBJECT: Mica Production - Austria

TO: Chief Electrical Division - Public Works & Utilities S/C  
Hqs. Allied Commission - APO 394

1. There is one fairly large mica mine near Klagenfurt, Austria. I have seen samples of the product and it is a thick straight seam of "MUSCOVITE" (white mica) with no contamination. It parts very easily into thin sheets and can readily be worked into any form required.

2. The two available mines are as follows :

- Phillips Valvo-Werke G.m.b.H. - Pölling, Postal Station  
ANDRA - Landkreis Wolfsberg - (Dutch owned firm)

Yearly production - 250 Tons  
Number of Employees - 236

- Glimmergruber Modriach  
Modriach - Voitsberg

Yearly production - 15 tons

3. These mines are both in the British area. The Phillips mine is reported to have some kind of a processing plant to make sheets and forms to any dimension.

4. There is no rate of exchange between the two countries, however a trade could possibly be arranged. UNRRA offices at Klagenfurt were perturbed over the high prices demanded by Italy for fruit for importation to the area. Possibly through UNRRA a trade of excess fruit, food, etc. in Italy could be traded for the Austrian mica.

5. At least the development of this source of mica would eliminate the necessity of further use of ships, to bring mica from the U.S.A.

To Chief Electr.Div.P.W.& U. S/C - Hqs.Alcom - Mica production

---

6. The Industry division of the Military Government at Klagenfurt does not appear to be anxious to re-open these mines. I did not discuss the matter with them and presume that their reluctance may possibly be difficulties of transportation or ignorance of the needs for mica in Europe.

SUBJECT: Supplies for Capuana Electrical Power Generating Steam Plant, Naples. MGS-276-ENG.

TO : Headquarters, Allied Commission, APO 394  
(Attn: Economic Section)

Folio 322 - 2nd Part

1. Reference is to MGC 511 (FX 90849) of 10 June, repeated to ALCOM, Rome.

2. Advice has been received from War Office that the following supplies on MGS-276-ENG have been shipped on the Fort Rae, KR 223, to Naples.

a. Item 4. 3/32" jointing sheeting asbestos compound, weight 364 lbs.

b. Item 5. 1/8" asbestos cloth wire woven, weight 200 lbs.

3. While the advice from War Office does not specifically state so, it is believed that these items were shipped under Index No. 223/27.

4. The supply position on items 1, 2, 3 of MGS-276-ENG is covered by TROOPERS signal 67864 E5F of 18 August and AFHQ signals FX 37169 and FX 37296, both of 21 August; all signals repeated to ALCOM, Rome, for information.

## ENTE AUTONOMO VOLTURNO

Legge 8 luglio 1904 n. 301  
R. D. L. 28 aprile 1937 n. 796

NAPOLI (173)

Via Cisterne dell'Ollo, 44 - Sede propria

GM/edb

Prot. N. 5421

To: Allied Commission  
Public Works & Utilities Division

N A P L E SOGGETTO: Steel Plate.-

In the reconstruction works in progress at Colli al Volturno hydro-electric power station it is necessary to build anew three sections of pipe line, 1200 mm. in diameter and 16 mm. thick, having an aggregate length of 5.50 metres, and also four elements of pipe line, 550 mm. in diameter, 10 mm. thick, according to the drawing enclosed herewith.

For this construction there are required about 25 sq.m. of high resistance steel plate, at least 16 mm. thick, and 15 sq.m. of 10 mm. thick steel plate, a suitable grade of which we have been unable to get from the market such as to warrant for the necessary safety in connection with the high operating pressure of plant (20 atmosphere).

We therefore kindly request you, if possible, to let us purchase these materials from the Allied Forces.

Yours Faithfully  
Prof. Ing. Guido Maione  
Managing Director

OGGETTO: Lamiere d'acciaio.-

Per i lavori in corso per il ripristino delle centrali idroelettriche di Colli al Volturno è indispensabile procedere alla costruzione a nuovo di tre tronchi di condotte dorzate del diametro di mm/1200 e dello spessore di mm/16 e della lunghezza complessiva di metri 5,50 nonché di 4 elementi di condotta del diametro di 550 mm/, spessore mm/10; giusta il disegno che si alliga alla presente.

Per questa costruzione occorrono circa 25 mq. di lamiera di acciaio ad alta resistenza dello spessore di mm/16 almeno, e mq. 15 di lamiera da mm/10 che non è stato possibile finora trovare sul mercato di qualità tale da offrire la dovuta garanzia di sicurezza, data l'alta pressione di funzionamento dell'impianto (20 atmosfere).

Si chiede se possibile di acquistarle dalle Forze Armate Alleate.

Distinri saluti.

2. We were not aware that S.G.P.E. had had difficulty in obtaining rail waggons to move poles and we have no record that S.G.P.E. have at any time appealed to us to help, in any case, it is now a matter entirely for the S.G.P.E. to arrange direct with the I.S.R. Bari depot, as rail movement for civilian traffic is now handled by the I.S.R.
3. The S.G.P.E. should obtain from the Bari depot, the necessary forms which when filled in, must be handed back with a declaration to the effect that payment will be made to the I.S.R. if the waggons are not used or loaded when they are provided.
4. Forms and specimen declaration attached hereto.

ROMA

Submit it as copy for you.

Eng. Pavia yesterday morning said to me he had available only 500 tons cement for electrical companies. This morning

I know by a note of Prof. Vicentini he had yesterday received in 900 tons.

I suggest to speak to Doctor Solazzo in Commerce Sub Commission (448403) to know by him the truth, and to move an action for clarifying the situation.

As it may concern in your 3073

or Eng. Pavia is wrong, but it is necessary

ti 10.000. Fatte le proporzioni, 900 tonn. alle Società Elettriche.

Si prega codesta Sottocommissione di voler rappresentare, a chi di dovere, tale situazione che è estraamente grave.

Si rimane in attesa di un cortese riscontro.

Subject: Transport of E.L. Poles

To: A.C. Rome

RE  
P.W. & J.  
27 AUG 1945 306

2624  
P.W. & U. S.L.  
Tel No: Bari 11348  
Ref No 12CRE/ES/9.  
23rd. August, 1945

The Societa' Generale Pugliese di Elettricita' serving the whole of South East Italy have in the past applied for and obtained release for approx 3000 Poles. These poles are urgently required for maintenance purposes on the 9, 18 & 30 KV overhead power lines. It being now over four years since the last arrived. The poles are of chestnut from the woods of Calabria. 106

The society has also asked for the necessary railway wagons to transport them from Calabria to the Stations of Puglie Taranto, Lecce, Brindisi, Bari & Foggia. These have not been forthcoming. Will you please therefore do all in your power to get release for these required railway wagons as the need is very urgent.

The total wagons required will be about 40 of the special type known on the Italian State Rlys as "Thor" and supplied at the rate of one per day until all are transported.

With reference to your letter Ref. N. 506/PWU of 11 August I would inform you that I have handed over this information to the Genio Civile Office in Frosinone. Chief Engineer Del Chicca will visit your office and give full instructions regarding the consignment of materials.

The Chief Engineer will also discuss with you any arrangements for payment of materials handed over to Genio Civile by the Allied Commission.

In addition I would like to thank you for the trouble you have taken and for the successful results achieved.
