CALCI E CEMENTI DI SEGNI

Reference : V/4299 Rs/Mn 4 Apr 45
To : Public Works and Utilities Sub-Commission
Electrical Division
Subject : Cement bags.

Reference your letter of 31 Mar. 45.

We regularly received the 5000 empty paper bags sent to our Factory at Colleferro Segni.

We beg to inform that the capacity of said bags appeared to be of 45 Kgs, and not of 50 Kgs each.

Therefore, for the first shipment to Vito Bellomo Firm at Bari we had to use 1100 bags, plus 5% for waste : on the whole 1165 bags.

We will inform you of the quantity of bags used for shipment of the orders by Bellomo for Manduria, Ing. Masi and Martignano Pasquale, and we beg you to keep into account the lower capacity of the bags, sending us a larger number of them.

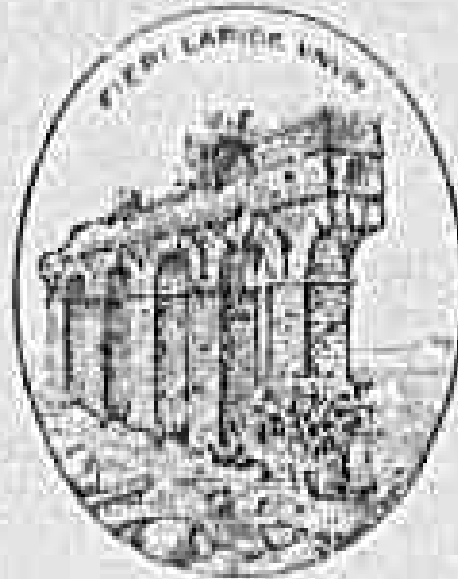

Truly yours,

Sgd. Calce³⁵⁷¹ Cementi di Segni

APQ 394

A fav. Vostra 3I/3 u.s.

Abbiamo regolarmente ricevuto i n. 5000 sacchi di carta vuoti inviati al nostro stabilimento di Colleferro-Segni.

Avvertiamo però che il contenuto dei medesimi è risultato di kg. 45 e non di kg. 50.

Pertanto per la prima spedizione effettuata alla ditta Bellomo Vito a Bari (50 tonnellate) sono occorsi n. 1110 sacchi oltre il 5% per sfraso: complessivamente n. 1165 sacchi.

Mentre ci riserviamo darVi notizia dell'ulteriore saccheria impiegata per l'evasione degli ordini: Bellomo per Manduria, Ing. Masi e Martignano Pasquale, Vi preghiamo tener conto della minore capienza dei medesimi per inviarcene un numero maggiore.

Gradite distinti saluti.

To : Director, Transportation Sub Commission
Rail SectionMaj. Price's Office 2/4/45
P.W. & U-Elect. Section

From: P.W. & U. S/C Electr. Division

1. Reference conversation Capt. Clinging-Maj. Price, it is confirmed that the following acceptances are still to be complied with:

Your Bid No.	5044-	Piazzesi,	week	12/2 - 19/2	-	1	Wagon
"	"	"	"	"	"	5	"
"	"	"	"	"	"	7	"
"	"	"	"	"	"	2	"
"	"	"	"	"	"	1	"
"	"	"	"	"	"	5	"
"	"	"	"	"	"	1	"

2. We have interviewed the Director of Colleferro Cement Works and we have been assured that all wagons allocated weekly by Station Master in Colleferro Sidings have been used for our Cement, but these allocations are not in accordance with your acceptances.
3. The position is still critical since the total of 8 wagons per day, suggested to be forwarded at Calce Cementi sidings to clear our outstanding bids, were not put into Colleferro.
4. Will you please do all you can to provide rail wagons for the A/M acceptances so that the arrears can be picked up and leave the way clear for bids to follow.

PUBLIC WORKS & UTILITIES

OGGETTO

ROMA

1°) Con riferimento al colloquio col Sig. Magg. Price accludiamo:

- a) elenco delle spedizioni effettuate a mezzo ferrovia da Colleferro durante il mese di gennaio (all.A)
- b) idem durante il mese di febbraio (all.B)
- c) " " " " " marzo (all.C)

2°) Rileverete che su un totale di 103 vagoni sono stati spediti

su Vs/ assegnazioni	vagoni n° 67
per i bisogni dei ns/ Stabilim.	" " 7
su assegnazioni AC Industry	" " 24
" " Min. Industria	" " 5

Teniamo a far presente che i vagoni spediti alla Soc. Montecatini nei giorni 21/2/45 ci erano stati consegnati con l'indicazione esplicita della loro destinazione.

3°) Da parte Vs/ avete effettuato le seguenti assegnazioni sul ns/ Stabilimento:

in dicembre	q.li 6.150	
" gennaio	" 13.500	
" febbraio	" 7.750	
" marzo	" 7.300	
	<u>34.700</u>	(da computare sulle 1000 Tonn. assegnateci)

E' chiaro che il numero dei vagoni consegnati è insufficiente per completare queste assegnazioni e che qualora non venga notevolmente aumentato, l'arretrato da spedire andrà crescendo progressivamente.

23/3/45

T. (2)

./..

Comunque il totale spedito ad oggi ai Vs/ beneficiari è di Q.li 20.490.=

4°) In questo momento risultano da spedire i seguenti quantitativi:

su Vs/ assegnazioni	Q.li	14.210
su assegnaz. AC. Industry	"	9.471
" " Min. Industry	"	11.213

5°) Sappiamo di aver fatto tutto il ns/ possibile, superando gravissime difficoltà per dare corso con la massima sollecitudine alle spedizioni che Vi interessavano e saremo grati se una verifica in proposito sarà fatta a Colleferro.

6°) Con l'occasione chiediamo il Vs/ cortese intervento perchè ci vengano concesse le assegnazioni dei materiali necessarie per lo esercizio dello Stabilimento, senza di che entro tempo relativamente breve saremo costretti ad interrompere la ns/ attività.

Le assegnazioni più urgenti sono le seguenti:

- a) pneumatici per autocarri
- b) carbone sulcis
- c) sacchi carta o carta per sacchi
- d) carburanti per trasporto lignite da Castel S. Pietro a Poggio Mirteto e per i trasporti interessanti lo Stabilimento di Colleferro
- e) cinghie di cuoio.

7°) Finora i materiali che abbiamo avuto a mezzo assegnazione sono stati limitati a poche voci ed a quantità irrisorie, salvo che per i carburanti, per i quali ultimi da due mesi non abbiamo più assegnazioni per i trasporti.

Per maggiore chiarezza elenchiamo le assegnazioni di una qualche importanza avute finora per la produzione del cemento:

carbone sulcis	Tonn. 100 in corso di ritiro a $\frac{1}{2}$ autocarri
lignite di Ribolla "	100 attendiamo la spedizione a $\frac{1}{2}$ ferro = via

entrambe a mezzo Ufficio Provinciale del Commercio e dell'Industria di Roma.

./..

CALCI E CEMENTI DI SEGNI
ROMA

segue lettera N. 400/391 del 23/3/45

R3

./..

8°) Malgrado questa quasi assoluta mancanza di assegnazioni, abbiamo potuto ricostruire e riprendere l'esercizio dello Stabilimento, che come Vi è ben noto aveva subito danni di gravità tale che lo si poteva considerare quasi distrutto. I materiali necessari sono stati acquisiti ad ogni costo sul libero mercato a prezzi elevatissimi.

Confermiamo che lo Stabilimento è oggi in grado di produrre 270 Tonnellate giornaliere di cemento, naturalmente a condizione che ci siano assegnati le materie prime, i combustibili ed i materiali tecnici necessari.

9°) Ci permettiamo in modo particolare richiamare la Vs/ attenzione sul ns/ fabbisogno di sacchi, per i quali contiamo che da parte Vs/ sia provveduto almeno al rifornimento di quelli necessari per l'espletamento delle Vs/ assegnazioni (1000 Tonn. mensili) che, tenuto conto delle rotture all'insaccamento, è mensilmente di:

21.000 sacchi della capacità di 50 Kg. cadauno.

TRANSLATION

- 1) Referring our interview with Maj. Price, we enclose:
- a) a note of the forwardings made, by railway, from Colleferro, during January (enclosure: A)
 - b) idem during February (enclosure: B)
 - c) " " " March (" " : C)

- 2) You can notice that, on a whole of 103 waggons, they have been forwarded:

under your allotments	n° 67	waggons
for the needs of our Establishments	" 7	" "
under AC Industry allotments	" 24	" "
under Ministero Industria allotments	" 5	" "

We make you notice that the waggons forwarded to the Soc. Montecatini on February 21, 1945, had been granted to us with the explicit indication of their destination.

- 3) Besides, you have made the following allotments on our Establishment:

in December	6.150	q.ls
in January	13.500	"
in February	7.750	"
in March	7.300	"
	34.700	q.ls

(to be computed on the 1.000 Tons, allotted to us)

You can easily understand that the number of the granted waggons, has not been enough to settle these allotments, and that, in case it cannot be remarkably increased, the arrear, which has still to be forwarded, will augment progressively.

However, the whole quantity we have forwarded to your beneficiaries, till to-day, is of 20.490.= q.ls.

- 4) On this moment the following quantities have still to be forwarded:

under your allotments	14.210	q.ls
under AC Industry allotments	9.471	"
under Min. Industria allotments	11.213	"

- 5) We know we did our utmost, surmounting very hard difficulties, to make as quickly as possible the forwardings in which you took interest, and we shall be very grateful if you will make a verification at Col=

del 23/3/45

F. 5)

C. /...

leferro accordingly.

- 6) In this occasion, we ask you for your kind intervention, so that the allotments of all kinds of materials necessary to the operating of our Establishment - without which, in a few time we shall be obliged to stop our activity - be granted to us.

The most urgent allotments are, as follows:

- a) pneumatics for the trucks
 - b) Sulcis coal
 - c) paper bags, or bag paper
 - d) fuel for the conveyance of lignite from Castel San Pietro to Poggio Mirteto and for the transports of Colleferro Establishment.
 - e) leathern belt
- 7) Till now, the materials we have received through allotment, have been limited to very few kinds and to insignificant quantities, except for the fuel, of which it is two months that we have not any more allotments for our transportations.

To explain better, we enumerate the allotment rather important, we have had till now for the cement production:

Sulcis coal	100 Tons	, which we are going to collect by trucks
Ribolla lignite	100 "	, we are waiting for the forwarding by railway

both through Ufficio Provinciale dell'Industria e del Commercio di Roma.

- 8) Notwithstanding this very great lacking of allotments, we could re-build and re-take the operating of the Establishment, which - as you know - had suffered so serious damages, that it could be considered as destroyed. All the necessary materials have been bought at any rate on free market, at very high prices.

We confirm that in this moment the Establishment is able to produce 270 Tons cement/per day, naturally on condition that raw materials, fuel and technic materials be allotted.

- 9) We beg to call to your attention our need of bags; we hope you will provide at least to the supply of those necessary to the settlement of your allotments (1000 Tons/per month), that, appreciating the breakages during the sacking, are monthly of:

21.000 bags, each one with a capacity of 50 Kg.

pneumatici

R O M A

=====

Per l'esecuzione dei trasporti che interessano l'esercizio dello Stabilimento di Colleferro e della connessa Miniera di lignite di Castel S. Pietro, abbiamo urgentissima necessità di disporre di almeno

4 pneumatici completi di copertoni e camere d'aria nella misura 42 x 9.

In difetto di una sollecita consegna dei suddetti pneumatici, saremo entro breve tempo costretti a sospendere l'esercizio.

I pneumatici di cui sopra potranno essere utilizzati in uno o più dei seguenti autocarri:

FIAT 634 N targa RO/39337	proprietario	Ditta Fr.lli Bonomo
FIAT 634 N " RO/38706	"	" " "
FIAT 634 N " RI/2717	"	Ditta Fr.lli Del Bufa-

10.

Qualora non sia disponibile la misura 42 x 9 potranno essere utilizzati anche i pneumatici delle seguenti misure: 10,50 x 24, 11,00 x 24, 11,25 x 24, e in genere qualsiasi pneumatico adatto per ruote di cerchio 24, purchè la larghezza del copertone non sia inferiore a 10".

PRIMICERI MICHELE DI ANTONIO

STABILIMENTO VINICOLO PROPRIO

PARABITA

(LECCO)

Parabita 15 Marzo 1945

18 MAR 1945

Alla Commissione Alleata
HQ.
P.W. & W. S/C
Roma

Ringrazio sentitamente per l'assegnazione fattami
e spero che vorrete prendere in considerazione una
ulteriore domanda per 120 ton. di cemento occorrenti
per il mio stabilimento fatto in associazione con
la ditta Primiceri qui di Parabita stesso.

Vi sarei infinitamente grato se vorrete evadere questa
mia domanda con un po di sollecitudine, poiche i
lavori sono ora iniziati e sarebbe un danno l'inter-
romperli per mancanza di cemento.

Distinti saluti.

Martig nano Pasquale

To : Director of Engineer Production and
Stores
A.F.M.Q.

1. In connection with the electrical rehabilitation a large amount of cement is used and we again find it difficult to provide paper bags, where possible we ask the Companies to supply their own bags but this is not always possible.

2. Would you be kind enough to release to us 5,000 cement bags to help us over the present shortage, it is hoped that a supply will be made available to us in the near future.

1. Reference our letter 306/PWU dated 12 March 45
releasing to Ditta Pastore Vincenzo
100 Tons Cement.

2. We are informed that the above named has been able
to find 2000 half quintali bags and these will be sent to
Colleferro on Monday, 19 March 45, the other bags required
will be taken from the small number you still hold at our
disposal, after which the stock of AC Bags will be finished.

3. Application is being made for a further quantity.

Per la mia costruzione occorrebbero 120 Ton. di cemento. Le mie varie domande presentate fino ad oggi sono restate senza evasione e mi permetto quindi di rivolgermi direttamente a Voi.

Per qualsiasi informazione o ragguaglio prego scrivere direttamente al mio stabilimento di Martina Franca, tenendo presente che la mia richiesta riveste carattere d'urgenza.

Nella speranza di vedere benevolmente accolta la mia richiesta, ringrazio anticipatamente.

To : Director Transportation Sub Commission
From : P.W. & U. S/C
Electr. Division

1. Your attention is directed to the number of rail wagon acceptances which have not yet been cleared at the Collesferro Cement Works.

2. The a/m works are producing cement mainly for work in connection with the electrical rehabilitation of liberated Italy and any delay in rail movement means delay on reconstruction work and stoppage at the works, since the works are producing cement, the silos become full to capacity, consequently producing must stop.

3. The following acceptances are still to be complied with :

Acceptances No.	Wagons	For week
5043	1	12/2 - 16/2
5044	5	12/2 - 19/2
5045	7	12/2 - 19/2
5046	7	12/2 - 19/2
5047	6	12/2 - 19/2
5990	2	19/2 - 25/2
5991	2	19/2 - 25/2
6630	1	26/2 - 4/3
7457	7	5/3 - 11/3
7458	7	5/3 - 11/3

Total 45 Wagons.

4. Will you please do all your possibly can to provide rail wagons to clear these outstanding bids and thus leave the way clear for bids to follow.

Subject : Cement

To : Director Commerce Sub Commission

1. Further to this office Memo 306/PWU dated 28/12/44 we shall be glad if you will arrange with the Italian Ministry of Industry Commerce and Labour to allow this Division to draw from Calce e Cementi -Colleferro :

1,000 Tons Cement
each month until further notice.

2. It is suggested that you make this quantity available and that it be left to the discretion of Public Works and Utilities Sub Commission to dispose of the cement to the works in order of priority and need.

3. As the cement is required, it is proposed to issue a letter to the Company concerned to collect and arrange payment direct with Calce e Cementi after which this Sub Commission will arrange rail transportation if necessary.

4. It is considered that this arrangement will save a great deal of time and it will be known that the cement is being used on jobs in order of priority.

INDUSTRIAL SUB-COMMISSION

R. O. S. A.OGGETTO: Energia elettrica per
Colleferrro.

- 1) Con riferimento alle ns/ richieste verbali ed a seguito di quanto comunicatoVi con ns/ App/753-79/8 in merito all'assunzione di energia necessaria per la riattivazione di un ciclo produttivo di 170 tonn. di cemento al giorno ed in relazione a quanto verbalmente comunicatoci sulla difficoltà di mettere a ns/ disposizione l'energia richiesta nelle ore di punta serale (ore 17-22) e diurna (ore 6-9), abbiamo studiato una nuova ripartizione delle lavorazioni in modo da ricorrere di ulteriori Kw. 200 al carico in queste ore.

Riepiloghiamo perciò le tre alternative del diagramma di fornitura in base alla quale ci è possibile azionare le ns/ macchine per la produzione sopra necessitata, in modo che Voi possiate decidere quale è il diagramma più favorevole:

- Alternativa a) Kw. 1300 per tutte le 24 ore del giorno compresi perciò i periodi di punta serale e diurna.
- Alternativa b) Kw. 1700 nelle ore diurne e notturne
Kw. 700 nelle ore di punta serale e diurna
- Alternativa c) Kw. 1800 nelle ore diurne e notturne
Kw. 500 nelle ore di punta serale e diurna

Questi valori sono comprensivi del 350 Kw. di cui attualmente disponiamo nelle ore diurne e notturne.

- 2) Nell'ipotesi che non Vi sia possibile assegnarci già dal mese di Febbraio tutta l'energia richiesta, Vi facciamo presente che ci è possibile ugualmente aumentare la ns/ attuale produzione di cemento macinato dalle scorte di clinker, fino al quantitativo di 180/200 tonn. al giorno. Infatti le irregolarità di fornitura di energia non ci hanno permesso di raggiungere nei mesi

secolari le produzioni preventive e ne è risultata al momento presente una riserva notevole scorta di clinker.
Per questo programma interfaccie, limitato al solo mese di Febbraio, ci è necessaria la seguente disponibilità di energia:

- Kw. 800 nelle ore notturne (23-5) e diurne (9-17), compresi gli attuali Kw. 350 già assegnati.
- Kw. 200 nelle ore di punta serali (ore 17-22) e diurne (ore 6-9)

3) Si intende che a partire dal 1° marzo al più tardi, è in ogni caso necessaria l'assegnazione dell'energia di cui al punto 1), per evitare la sospensione totale della ns/ attività.

TRANSMISSION

SUBJECT: Electric power for
Colliatferro

- 1) Referring to our verbal requests and following up what we have communicated to you with our App/753-10/d about the allotment of electric power necessary for the re-starting of a production of 270 Tons of Cement per 24 hours, and in relation to Your difficulty of granting the requested electric power in the hours of full load during the evening (from 5 p.m. to 10 p.m.) and during the day (from 6 a.m. to 9 a.m.), as You have verbally communicated, we have studied a new distribution of the workings, so that it be possible to reduce the withdrawal of electric power, in these hours, of further 100 kw.

Therefore we recapitulate the three resolutions of the supplying dia. ram according to which it is possible to put in motion our machinery to have the above mentioned production, so that You can decide which is the most favourable dia. ram:

- 1 resolution: 1300 Kw. for all the 24 hours of the day, including the periods of maximum load during the day and the evening.
- 2 resolution: 1700 Kw. in the diurnal and nightly hours
700 Kw. in the hours of maximum load during the day and the evening.

3499

- 3 resolution: 1800 Kw. in the diurnal and nightly hours
500 Kw. in the hours of maximum load during the day and the evening.

These quantities include the 350 Kw., that are now at our disposal in the diurnal and nightly hours.

- 2) If it is impossible for You to allot all the requested power, starting already from February, we notify that we can equally increase our actual production of cement from clinker reserves, till 180/200 Tons/ per day.

In fact the irregularities of the supplying of electric power have not allowed us to reach in the last months the foreseen production and so in this moment we have a considerable reserve of clinker.

For this intermediate programme, limited at February only, it is necessary the following availability of electric power:

- 800 Kw. in the nightly (from 10 p.m. to 5 a.m.) and in the diurnal (from 9 a.m. to 5 p.m.) hours, including the actual 350 Kw., that have been already allotted.
 - 200 Kw. in the nightly and diurnal hours, in which there is the maximum load: from 5 p.m. to 10 p.m. and from 5 a.m. to 9 a.m.
- 3) "Naturally, starting from the 1 March at the latest, it is necessary the allotment of electric power as at 1st paragraph, to avoid the total interruption of our activity.

./..

- 3 resolution : 1800 Kw. in the diurnal and nightly hours
500 Kw. in the hours of maximum load during the day and the evening.

These quantities include the 350 Kw., that are now at our disposal in the diurnal and nightly hours.

- 2) If it is impossible for You to allot all the requested power, starting already from February, we notify that we can equally increase our actual production of cement from clinker reserves, till 180/200 Tons/per day.

In fact the irregularities of the supplying of electric power have not allowed us to reach in the last months the foreseen productions, and so in this moment we have a considerable reserve of clinker.

For this intermediate programme, limited at February only, it is necessary the following availability of electric power:

- 800 Kw. in the nightly (from 10 p.m. to 6 a.m.) and in the diurnal (from 9 a.m. to 5 p.m.) hours, including the actual 350 Kw., that have been already allotted
 - 200 Kw. in the nightly and diurnal hours, in which there is the maximum load: from 5 p.m. to 10 p.m. and from 6 a.m. to 9 a.m.
- 3) Naturally, starting from the 1 March at the latest, it is necessary the allotment of electric power as at 1st paragraph, to avoid the total interruption of our activity.

OGGETTO:

sacchi carta - Stabilimento di
Colleferro

- 1) E' giunto a Colleferro da Livorno il vagone n° 1029742 della cui spedizione ci avete dato telefonica notizia.
- 2) Il numero di sacchi riscontrato all'arrivo è risultato di 39.900.
- 3) La capacità di tali sacchi è di circa Kg. 35, anzichè quella normale di Kg. 50.
- 4) Pertanto, tenuto conto di qualche inevitabile rottura durante le operazioni di insaccamento, il quantitativo totale di cemento che potrà essere imballato nei sacchi di cui si tratta, sarà di tonn. 120 circa.
- 5) Preghiamo volerci comunicare il prezzo franco ns/ Stabilimento, al quale i sacchi in parola ci saranno addebitati.
- 6) Ci permettiamo ricordare le ns/ precedenti, relative all'assegnazione di carta per sacchi o di sacchi confezionati.

bimento di energia nelle due ipotesi a carico continuo ed a carico discontinuo.

E' da tener presente che in ogni caso ci è necessaria la disponibilità continuativa di 700 Kw. durante le 24 ore del giorno per il forno rotativo e le macchine ad esso collegate.

All/I

TRANSLATION

OGGETTO: electric power for Colleferro

- 1) As we have explained in our previous letters, to increase the production of the Establishment till the stated 270 T. of cement/per 24 hours, it is necessary that the supplying of electric power be increased to 1.300 KW.
- 2) Because firstly we have received an allotment of 350 KW., we beg You to dispose that a supplementary allotment of 950 KW. be made to our Establishment of Colleferro.
- 3) Besides, we beg You to dispose that the electric power be supplied for all the 24 hours of the day, so that it be possible to use about 30.000 KWh., necessary for the production of 270 Tons of cement.
- 4) If it is not possible to grant the 1.300 KW. also in the most busy hours (in the evening: from 5 p.m. to 11 p.m and in the mornings: from 6 a.m. to 9 a.m.), we are able to maintain our promise to produce 270 Tons/per 24 hours, with an use of 700 KW. in the most

./..

CALCI E CEMENTI DI SEGNI
ROMA

segue lettera Npp/753-PG/d del 28/12/1944 *T.*

./..

busy hours and of 1.700 KW. in the normal hours.

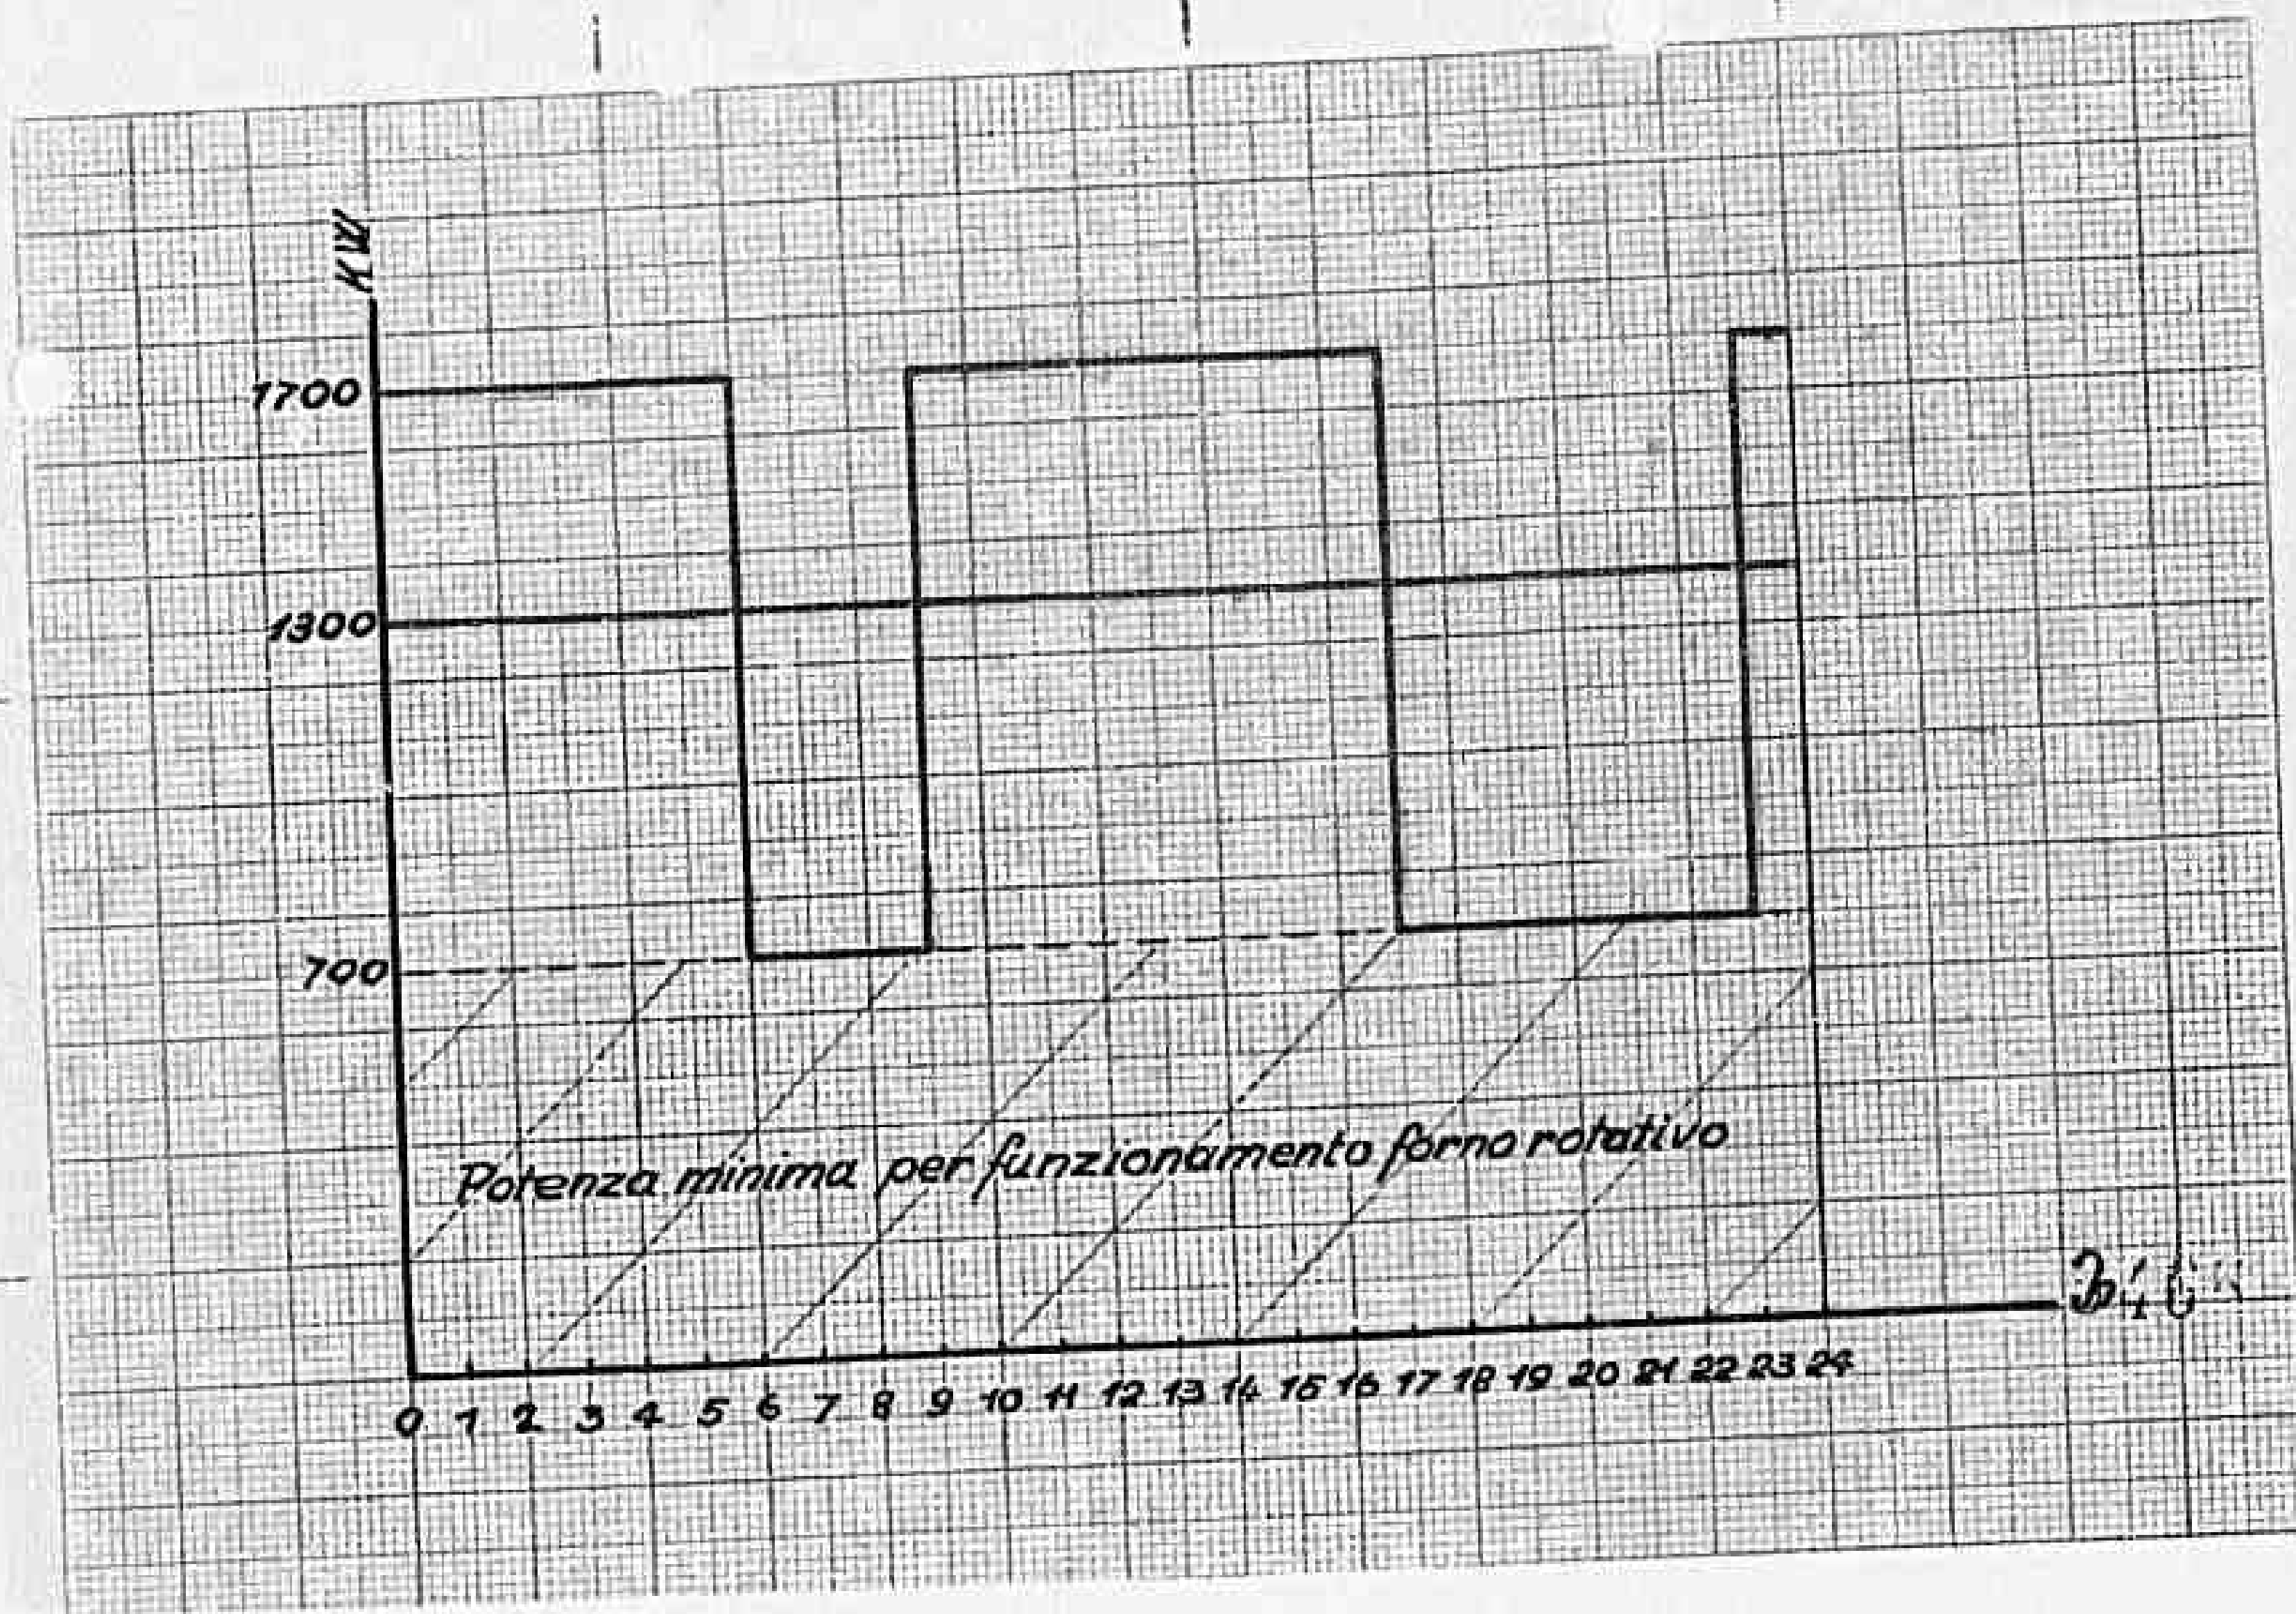

To justify this alternative, we enclose a diagramm of electric power use in the two hypothesis of continuous and discontinuous work.

However, You have to remember that we need a continuative availability of 700 KW. during the 24 hours of the day for the rotary kiln and the machines, connected with it.

 Public Utilities - Sub Commission

La sottoscritta S. CALCI E CEMENTI DI SEGNI, i cui impianti di Colleferro per la produzione di cemento sono già stati parzialmente riattivati, e che, entro breve tempo, potrà mettere a disposizione ulteriori forti quantitativi di cemento e calce, ha urgente necessità di disporre di automezzi da utilizzarsi per il trasporto dei materiali occorrenti allo Stabilimento.

Chiede perciò di essere autorizzata a recuperare e riparare un autocarro Citroen tipo 45, della portata di circa 70 q.li, già dell'Esercito Tedesco ed abbandonato dallo stesso con gravi danni al motore, alle balestre ed allo chassis, nella Cave della Cementeria di S. Marinella.

L'autocarro sarà riparato nelle Officine di Colleferro.

Si chiede che venga autorizzato il rilascio del libretto di circolazione a favore della ns/ Società.

TRANSLATION

The undersigned S. CALCI E CEMENTI DI SEGNI, whose plants for cement production in Colleferro have been already partially re-established, and that, in a little time, will be able to put at disposal other considerable quantities of cement and lime, has a very urgent necessity to dispose of trucks, that shall be used for the carriages of materials necessary to the Establishment.

Therefore, it asks for the authorization to recover and repair a lorry: Citroen- type 45, with a tonnage of about 70 q.l.s, that, owned by German Army, was abandoned by Germans in the quarries of the Cementery of S. Marinella, with remarkable damages at the engine, the elliptical springs and the chassis.

The lorry will be repaired in the factories of Colleferro.

We beg You to authorize the issue of the circulating permission, to the credit of our Company.

1. It has been decided to partially reactivate the above cement plant the products of which will be intended for civilian and military uses.
 2. Repair work on the plant is proceeding and it is estimated that one rotary kiln and 3 clinker grinders will be in a position to operate by January 1st 1945.
 3. To enable this plant to function at the rate of 270 tons per day the following coal will be required each month:

a) Sardinian coal	600 tons
b) Lignite (normal compness)	1000 tons
- Will you please put forward the necessary bids for a 6 month allocation of coal to the Coal Division.

R O M A

OGGETTO: Stabilimento di Colleferro
produzione calce idrata

A seguito delle precedenti comunicazioni relative alla produzione di calce nel ns/ Stabilimento di Colleferro, ci permettiamo presentare domanda con la presente per ottenere l'assegnazione di tonn. 1000= mensili di carbone coke necessarie per la realizzazione della produzione di calce idrata, preventivata in tonn. 6000 mensili.

Qualora ciò sia ritenuto utile, potremo impiegare, in sostituzione del coke, il carbone antracitoso.

Con questo tipo di combustibile il fabbisogno mensile per la produzione di 6000 Tonn. di calce idrata, è di tonn. 1500.

Naturalmente svolgendo un'attività ridotta, il consumo di combustibile decrescerebbe, fino ad un certo limite, in misura proporzionale alla produzione.

Il regime minimo di produzione che possiamo preventivare è di tonn. mensili 900 di calce idrata, con un corrispondente fabbisogno di combustibile di

carbone antracitoso	tonn. mensili	225
oppure coke	" "	150

E' noto a codesta A. C. che, nelle località in cui si dispone di pozzolana, la calce può, in alcune applicazioni e principalmente nelle malte idrauliche, sostituire il cemento e che il suo impiego può quindi implicare una sensibile economia di un materiale attualmente molto scarso.

La calce è inoltre richiesta per tutti i lavori di riparazione e di ricostruzione.

Ci auguriamo pertanto che la presente sia presa in buona considerazione e che ci venga concessa l'assegnazione richiesta.

TRANSLATION

SUBJECT: Colleferro Establishment
hydrated lime output

311

✓..

S. A. I. PER LA PRODUZIONE CALCI E CEMENTI DI SEGNI

n According to the previous communications, relative to the lime production in our Establishment at Colleferro, by this letter we beg You to grant an allotment of 1.000 Tons/per month of coke, necessary to reach an hydrated lime production, that we have foreseen in 6.000 Tons/per month.

If You think it useful, we could use, instead of the coke, anthracitous coal.

With this type of fuel, the necessary for the production of monthly 6.000 Tons of hydrated lime, is of 1.500 Tons/per month.

Naturally, having a reduced activity, the consumption of the fuel shall decrease, till a certain limit, proportionally to the output.

The minimum output speed, that we are able to foresee, is of monthly 900 Tons of hydrated lime, with a corresponding fuel necessity of:

anthracitous coal	225 Tons/per month
or coke	150 " " "

You know that, in the localities where there is availability of pozzolana, the lime, in some applications and principally in hydraulic mortars, can substitute the cement, and that, using the lime, it is possible to economize a material, that now is very scarce.

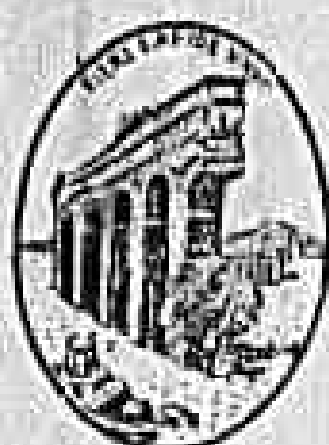

Besides, the lime is very much requested for all the repair and re-building workings.

Therefore, we hope that this our letter can be taken in good consideration and that the requested allotment be granted.

An other original of this letter has been sent to the: A. M. G. - Lazio Umbria Region - Industrial Division - ROME.

OGGETTO: Stabilimento di Colloferro
produzione cemento

R O M A

A seguito della ns/ 27 ottobre c.a., riteniamo ns/ dovere riferire a codesta Sotto Commissione sull'andamento dei lavori di ricostruzione e riparazione del ns/ Stabilimento di Colloferro.

1°) MACINAZIONE

- a) è stata iniziata la produzione di cemento partendo da semilavorati disponibili,
- b) e tutto il 30 Novembre sono state prodotte circa 700 tonn. di cemento,
- c) la produzione è, come previsto, di Tonn. 5÷6 ora. Giornalmente si produce il quantitativo consentito dalla disponibilità di energia elettrica. Finora l'energia ci è stata erogata con molta discontinuità e spesso con tensione insufficiente.

2°) RICOSTRUZIONE

- a) riparazione parziale reparto cottura

Confermiamo che, come già comunicato precedentemente, saremo pronti in gennaio a far funzionare l'intero ciclo relativo ad un forno e relativi impianti di essiccaimento, trasporto e macinazione con una potenzialità di 270 tonn. giornaliere.

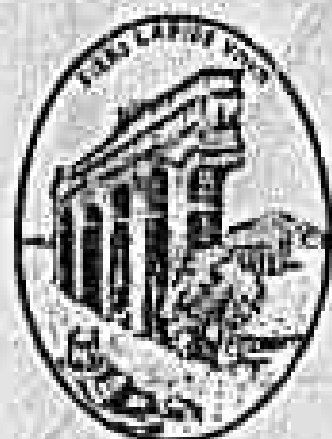

- b) Procede anche con buon ritmo la ricostruzione integrale dei fabbricati industriali e delle ciminiere di cui una ha già raggiunto i 40 metri di altezza.

3°) COMBUSTIBILE

- a) carbone sardo od equivalente - confermiamo che sarà indisponi-

345

./..

S.A.I. per la produzione Calce Cementi di Legumi
ROMA - CORSO UMBERTO I. 267

... 311

12

sabile ricevere a partire da gennaio un quantitativo mensile diTonn. 600

da integrarsi con la lignite di cui al capoverso seguente.

- b) lignite - abbiamo iniziato i lavori di riattivazione della
na/ miniera di Castel S. Pietro presso Poggio Mirteto, dalla
quale ci ripromettiamo di ricavare mensilmente le necesse=
rieTonn. 1000

4°) TRASPORTI

Ci riserviamo di presentare quanto prima domande di assegna =
zione dei vagoni e di carburante per i trasporti di gesso, li
gnite e sabbia silicea e di permessi di circolazione per gli
automezzi.

Con osservanza.

TRANSLATION

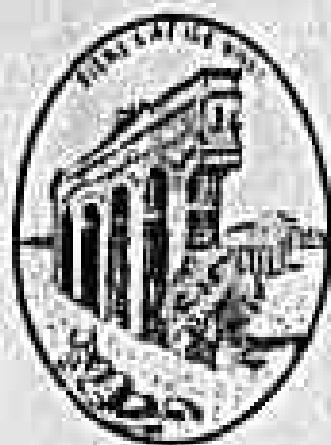

SUBJECT: Colleferro Establishment
cement output

Following up our letter of the 27 October, we think
dutiful to report You about the course of the repair and re =
building work of our Establishment at Colleferro.

1) - GRINDING -

- a) The production of cement, beginning from available par
tly-manufactured, has been initiated.
- b) Till 30 November, about 700 Tons of cement have been
produced.
- c) The output is, as we had foreseen, of 5 + 6 Tons per
hour. Every day we produce the quantity, that is al=

./...

S. A. I. per la produzione Calce Cementi di Segni

ROMA - CORSO UMBERTO I. 267

./..

lowed by the availability of electric power. Till now, electric power has been distributed with much discontinuity and very of ten with an insufficient tension.

2) - REBUILDING -

a) partial repair of burning department.

We confirm that, as we have previously communicated, in January we shall be ready to make operate all the cycle, relative to a kiln and relative drying, carriage and grinding plants, with a potentiality of 270 T./per 24 hours.

b) Also the complet re-building of the industrial buildings and of the chimneys is going on well; one of the chimneys has already reached an hight of 40 mt.

3) - FUEL -

a) Sardinian coal or equivalent coal - we confirm that it shall be indispensable to receive, from January 1945, a monthly quantity of 600 Tons that have to be completed with the lignite, as follows.

b) lignite - we have initiated the re-starting workings of our mine of Castel San Pietro, near Poggio Mirteto, from which, we think, it shall be possible to dig out the necessary1000 Tons/ per month.

4) - TRANSPORTATION -

We reserve to ourselves to present as soon as possible, our requested of allotment of railway cars, and fuel for the carriage of the gypsum stone, lignite and siliceous sand and of circulating permission for the trucks.

Industrial Sub Commission

R C M AOGGETTO: Cementeria di Vibo Valentia (Prov. Catanzaro)

Come convenuto di presenza, ci preghiamo trascrivere qui di seguito alcune notizie sulla ns/ Cementeria a margine.

Notizie generali

La Cementeria è situata sulla strada da Vibo Valentia a Briatico a circa km. 1 dalla Stazione e km. 1, 5 dal porto di Vibo Valentia.

Lo Stabilimento è munito di raccordo ferroviario che lo collega con il porto e con la Stazione di Vibo Valentia.

Le cave di calcare e di argilla marnosa sono immediatamente adiacenti allo Stabilimento, al quale sono collegate con brevi decauville.

La capacità produttiva annua è di tonn. 90.000/100.000.

A circa 13 km. dallo Stabilimento si trova una miniara di lignite di proprietà della Soc. L.I.M.S.A. di Roma, dalla quale si potrebbe prelevare buona parte del combustibile occorrente.

Situazione attuale

Al momento dell'armistizio lo Stabilimento era prossimo all'ultimazione.

Non appena ristabilito il contatto con Vibo Valentia, sono stati ripresi i lavori ; si prevede di ultimarli entro il mese di Gennaio 1945 e di iniziare immediatamente le prove di funzionamento.

La produzione potrà essere perciò disponibile, salvo imprevisti, nel mese di Febbraio.

Fabbisogni vari per il completamento degli impianti

E' necessaria l'immediata assegnazione di quanto segue:

- a) - Cemento - Tonn. 120 - assolutamente necessario entro Novembre c.a. - pratica di assegnazione già in corso presso l'ACC Commerce Sub Commission e di ulteriori 120 Tonn. per il completamento dei silos, ecc. necessarie entro Dicembre.
- b) - Assegnazione dei vagoni ferroviari necessari per il trasporto a Vibo Valentia del cemento di cui al precedente paragrafo a)
- c) - Assegnazione di due vagoni alla Stazione di Colleferro con destinazione Vibo Valentia per trasporto di macchine ed attrezzi già accentrati a Colleferro per il successivo inoltrò.

3442 ./..

S. A. I. PER LA PRODUZIONE CALCI E CEMENTI DI SEGNI

foglio 2)

Per questa assegnazione è già stata iniziata la pratica presso il Railway Transportation (Capt. Dran) Via Regina Elena n° 47 -

Fabbisogno per il funzionamento degli impianti

Si considera l'opportunità di iniziare il lavoro con una produzione ridotta di 4.000 tonn. mensili, aumentabili gradatamente man mano che lo Stabilimento sarà rimesso a punto.

Per la suddetta produzione ridotta si prevede il seguente fabbisogno:

a) Combustibile

Usando una miscela di carbone Sardo e lignite di Briatico, il fabbisogno mensile di combustibile è:

Carbone Sardo Tonn. 900

Lignite (umidità commerciale) " 1200

Il carbone Sardo dovrebbe affluire via mare al porto di Vibo Valentia; la lignite dovrebbe provenire dalla Miniera di Briatico, miniera che in questo momento risulta però inattiva.

In difetto di questa lignite il carbone Sardo dovrebbe essere portato a tonn. mensili 1.200/1.300.

b) Gesso

Il consumo di gesso sarà inizialmente di 200 tonn. mensili.

E' previsto il rifornimento della cava di Marcellinara, sulla linea ferroviaria S. Eufemia/Gatanzaro a km. 70 da Vibo Valentia.

c) Trasporti

1) - automezzo della portata di q.li 70 per trasporto lignite dalla Miniera di Briatico allo Stabilimento con relativo carburante.

2) - automezzo da 40/50 q/li e relativo carburante per trasporto correttivo miscela cruda su un percorso di km. 2

3) - assegnazione di 10 vagoni mensili per trasporto gesso dalla Stazione di Marcellinara a Vibo Valentia.

d) Energia elettrica

Sono necessari inizialmente KW. 1.200 da aumentare gradatamente fino a KW. 2.000=. L'energia proverrà dalla produzione calabrese e sarà prelevata dalla sottostazione di Feroleto della S.M.E., tramite linea A.T. delle FF.SS. e sottostazione di Vibo Valenzia, già attualmente sotto tensione.

=====

S. A. I. PER LA PRODUZIONE CALCI E CEMENTI DI SEGNI

To the kind attention of Cap. PRICE

ROME, 30 October 1944

TRANSLATION

As we have verbally agreed, we send You some news about our Cement-Works at Vibo Valentia.

General data

The Cement Works is placed on the road that goes from Vibo Valentia to Briatico, at about 1 km. from the Station, and 1,5 km. from the Port of Vibo Valentia.

The Establishment has a railway junction, that connects it with the Port and the Station of Vibo Valentia.

The quarries of limestone and marl clay are immediately contiguous to the Establishment, to which they are connected by means of short decauville.

The yearly productivity is of 90.000/100.000 tons.

At about 13 km. from the Establishment, there is a lignite mine, owned by the Soc. L.I.M.S.A. of Rome, from which we could withdraw a great part of the necessary fuel.

Present state

At the moment of the armistice, the Establishment was almost completed.

As soon as it has been possible to re-establish our communications with Vibo Valentia, the workings have been taken: we foresee to finish them within January 1945 and to begin immediately the working proofs.

Therefore the output shall be available, except the unforeseen, with in February.

Various necessary for the completion of the plants

There are necessary the following allotments:

- a) - Cement - Tons 120 , absolutely indispensable within November 1944 - we have already allotment dealings with the A.C.C. Commerce Sub Commission - and further 120 tons, for the completion of the silos, ecc., necessary within December.
 - b) - Allotment of railway cars, necessary to carry to Vibo Valentia the a/m cement.
 - Allotment of two wagons to the Colleferro Station for Vibo Valentia to carry machinery and tools, that have been sent to Colleferro for the successive forwarding.
- For this allotment we have already begun some dealings with the Railway Transportation (Capt. Dran) - 47 Via Regina Elena -

sheet: 2

Necessary for the working of the plants
We think that we can begin the work with a reduced production of 4.000 Tons/per month, increasable, as it will be controlled the function of the single machines.

a) Fuel-

Sardinian coal	900	T.
Lignite (normal dampness)	1200	"

is not working.
In default of this lignite, the Sardinian coal should be brought to
1.200/1.300 T./per month.

Gypsumstone-
Firstly, the gypsumstone consumption shall be of 200 T./per month.

c) Transportation-

- Transportation-
- 1) - lorry, with a tonnage of 70 Q.ls, and the relative fuel, to carry lignite from the Briatico Mine to the Establishment.
 - 2) - lorry, with a tonnage of 40/50 Q.ls, and relative fuel, to carry corrective of the raw mixture, on a way of 2 km.
 - 3) - allotment of 3 wagons/per month, to carry gypsumstone from Marcellinara Station to Vibo Valentia.

Electric power-
Firstly, they are necessary 1.200 KW, that shall be gradually increased till 2.000 KW. The electric power shall come from the Calabria production, and shall be withdrawn from the substation of Feroletto of the S.M.E., through high voltage electric line of the FF.SS. and substation of Vibo Valentia, that now is already under tension.

Ind. Subcommission

R O M ACEMENTERIA DI COLLEFERRO.=

Al fine di illustrare la situazione e le possibilità della nostra Cementeria di Colleferro, Vi alleghiamo copia di rapporti già da noi stesi per le diverse autorità interessate e precisamente:

- 1°) copia di relazione sullo stato degli impianti con proposta di messa in marcia progressiva presentata all'ACC il 21/6 c.a.
- 2°) copia di relazione presentata il 13/7 c.a. al DW in seguito a visita a Colleferro del Sig. Col. Glendinning
- 3°) copia di relazione presentata il 25 c.m. al Ministero dell'Industria (Sig. Magg. Thornitt-Smith).

Riassumendo, dalle sopraelencate relazioni risulta che la nostra Cementeria, capace in condizioni normali di produrre 800/1.000 tonnellate giornaliere, si trova attualmente nella seguente situazione:

- 1) -Contro assegnazione di energia per 350 Kw. è in grado di iniziare immediatamente la consegna di 6.000 tonn. di cemento con un ritmo di 100 tonn. al giorno.
- 2) -A partire dal 1 gennaio 1944 potrà iniziare la produzione di 270 tonn. al giorno di cemento.

Per realizzare tale produzione sarà necessaria l'assegnazione di Energia.....KW. 1300 (ivi compresi i 350 KW. di cui al punto precedente)

Combustibile (fabbisogno mensile)

carbone sardo	T.	600
lignite macinabile (umidità commerciale)	"	1000
<u>oppure</u> di solo carbone sardo	"	1000

INDUSTRY - COMMERCE - AND WORKS MINISTRY

MEMORANDUM

SUBJECT : SUPPLY POWER FOR THE CEMENT FACTORY TO VIBO VALENTIA

The new factory of S.A. Calce e Cementi Segni in Vibo Valentia proceeds according to plan.

It will be possible to test out the machinery in January 45 and production can start in February and March, it is necessary therefore to have an electric power supply connected before January 1st 45, of 500 KW and eventually 2000 KW (9 KWh to produce one quintale of Cement) for a daily output of 300 Tons cement.

It is possible to reduce the power needed to 1200 KW by alternatively working the kilns and crushers but the output of cement is reduced from 300 Ton/day to 160/Ton/day.

The power can be furnished by the Societa Elettrica delle Calabrie (SIE group) Naples office which have since March 1941, a contract for the electric power supply of 60000 V to the substation now operated by the state Railways near this factory but the substation is at the moment supplied by the SIE Feroleto Substation. This Societa has agreed the supply but needs authorisation.

SUBJECT:- SUPPLY POWER TO THE S.A.CALCE E CEMENTI 's CEMENT FACTORY
IN COLLEFERRO

The firm as above has notified us that the repairs to the Colleferro factory are completed and that they require an allotment of 350 KW of power and eventually 700 KW of power for grinding the existing stock of clinker stored in their warehouse, which will produce 100 Tons of Cement daily.

The same firm states that in a few days the SRE plant at CEPRANO will be in operation, the repairs being carried out by SRE, therefore the request can be facilitated by the reinstated CEPRANO power station.

We trust it is possible to grant this request as the Colleferro factory is needed for the output of cement which is required for repairs to the houses of the unfortunate people.

R O M A

In esito a richiesta fattaci di presenza ci pregiamo co-
 municare quanto segue:

1°) - Contro assegnazione della necessaria energia, nella misu-
 ra di 350 KW., siamo in grado di iniziare immediatamente,
 partendo da semilavorati disponibili, la produzione di
 Tonn. 6.000 di cemento da consegnare in ragione di circa
 100 tonn. al giorno,

2°) - nel Gennaio 1945 saremo in grado di riattivare un ciclo
 completo di lavorazione corrispondente ad un forno con le
 relative macchine di frantumazione, essiccamento, traspor-
 to, macinazione ed insaccamento, raggiungendo una produ-
 zione di270 tonn. al giorno
 Per realizzare tale produzione ci saranno necessari:

- a) Energia elettrica, ivi compresi i 350
 Kw. di cui al paragrafo 1°) KW. 1300
- b) Combustibili. Si ritiene consigliabi-
 le il funzionamento con una miscela di
 carbone Sardo o lignite essiccata, con
 la quale il fabbisogno risulta di:
 carbone SardoTonn. 600 mensili
 lignite (umidità commerciale) " 1000 "

c) Pietra da gesso (avremo scorte per circa due mesi) T. 210 mensili ①

d) Trasporti ed altri materiali di esercizio di minore importanza.

3°) - Successivamente, in un periodo di tempo dipendente dalla possibilità di approvvigionamento di alcuni macchinari elettrici potremo riattivare l'intero impianto raggiungendo gradualmente una produzione di T. 800 al giorno.

Su richiesta potremo precisare quanto necessario per tale riattivazione completa.
