Subject: Weekly report.

Attached, please, find the weekly report for the weeks ending the 18.8.45 and 25.8.45.

These statements show only the situation of our copper stocks, for no changes took place on the other positions, since our last report of the 28.7.45.

The quantity of "Almelec" cable, that will be delivered today to the Società Romana di Eletticità, will be included in the next report, as we do not know the right weight yet.

Your kind attention is drawing on the position of the raw materials delivered by the electrical Companies, for the Società Edison is still owing us kg. 8.938,- of cathodes for covering the kg. 19.064,- of copper cable, delivered to the Edison since last June, as per your orders.

Your kind assistance for settling the matter will be greatly appreciated.

We remain

Statement of the quantity of coal and fuel used and quantity available for further production:

Considering that no supply of coke is, at present, possible, we shall try to use only coal. The percentage of coal used for each 100 kg. of finished product is, of course, increased at 35 kgs. instead of 25 kg.

Coal : $\frac{20.000 \times 100}{35}$	kg.	57.400,-

SUBJECT : Fuel Oil - Novara -

TO : Regional Commissioner - Piemonte -
(Att.Regional Engineer)

- 1) - The Società Edison has requested that 1500 tons of fuel oil which they have in storage at their Novara thermal plant be blocked.
- 2) - Allied Commission, who is responsible for reconstruction of electric facilities in Italy, has engaged factories in northern Italy to manufacture wire and insulator for electrical reconstruction. These factories are ready to start production immediately but lack fuel.
- 3) - It is requested that the fuel oil at the Novara plant be blocked and released only on the orders of officers who have engaged the factories which can manufacture wire and insulators for electrical reconstruction.
- 4) - This request is being sent to you for the necessary action.

For the regional Commissioner :

5384

C.P. BOLICK;
Col.F.A.
Regional Engineer.

NAFTA at Novara blocked, unable to obtain release.

5 ton Nafta obtained through UDL for Trafilser.

40 ton coal not delivered from Brescia, called Capt. Persilly and requested coke at least.

Arranged to borrow copper from FF SS but much difficulty over scrap.

Snag arranged 28 June.

Coal from Capt. Persilly no good - full of dirt!

Coke apparently not available in Brescia, not possible from Venice.

Bilopnese Co refused to take the whole of the 19 Ton.

28 June heard that SADE had placed an order with Tempini for 90 tons copper. Materials OK.

5388

Capt. Best:

- 1) Edison Co. is to get 20 tons of the 120 mm - 19 strand 2.80 m dia. but do not have any scrap to turn in. Please that it is released when Eng. Maggi is ready to receive it.
- 2) Col. Crump has authorized the transfer of 40 tons of coal from TEMPINI to TRAFILERIE - Please check status of this transfer
- 3) Eng. Maggi wants to discuss possibility of getting some guard assistance for protecting damaged line, north of Mori.
