Subject : Steel work for Electrical Rehabilitation 3/3/45

To : Director Commerce Sub Commission

From : P.W. & U. S/C
Electr.Division

1. Herewith lists of steel work etc required by the electrical companies engaged on power plant rehabilitation, which should be included on your list for presentation at the next Engineering Materials Committee meeting.

2. Demands covered by MAT 10s attached and it is requested that they be given high priority in view of the importance of the work involved.

To : Director Economic Section
(Requisition Branch)

1. Reference telephone conversation Requisition Branch - Major Price (Electrical Division) this A.M. and AFHQ G-5 Section letter EI dated 20 Feb.45.

2. As the packing demanded will have to be imported it will be necessary to increase the amounts to 100 sq yds of each, and the following is submitted as an added justification:

JUSTIFICATION.

a) all stocks and local procurement were exhausted some time ago, since the steam Station of Capuana has been almost completely rebuilt as the result of enemy action. Packing used during the rebuilding was either furnished through Engineer or Royal Navy channels.
b) the quantity now demanded is sufficient for approximately six months maintenance.
c) the packing is needed for high pressure steam joints, the description having been obtained from "Garlock" catalogue.
d) it is requested that the material as demanded be imported at a very early date since no stocks are available.
e) in the event of "blow outs" occurring the station will cease to operate until emergency supplies can be obtained through Royal Naval channels.
f) the material as demanded is the correct type for high pressure steam joints and there are no substitutes, as the jointing is required it is intended to cut the correct size and shape of the gaskets from the sheets.

From : P.W. & U. S/C
Electr.Division

1. Reference is made to telephone conversation Requisition Branch -Major Price (Electrical Division) this A.M. during which it was mentioned that G-5 Section AFHQ require additional justification.

2. Justification is submitted as follows:

a) exhaustive enquiries have been made during the past six months to discover whether any of the items can be obtained or manufactured in this theatre, the result is a blank and the Capuana Steam Station reports the situation now becoming serious.

b) the items as demanded are considered to be sufficient for twelve months maintenance.

c) so far as boiler tubes are concerned, experiments are being carried out, by welding the tubes recovered from the war damaged boiler, but the results are not considered very satisfactory.

d) material as demanded required urgently.

e) Capuana steam station is the only plant to be depended upon in the even of interuption of the southern network.

1. Reference is made to your EB-160/163-EB dated 26 Feb.45.

2. The requisition referred to was submitted originally by Commerce Sub Commission, however we have been able to gather sufficient information to answer the questions referred to in Para 3 AFHQ G-5 letter EP dated 22 Feb.45.

3. Added justification to support requisition quoted above:

a) local manufacture cannot be undertaken due to lack of raw materials.

b) the quantities on demanded are required to renew existing worn out diaphrams and to maintain the system for six months after date of delivery.

c) the rate of consumption depends upon the "life" of the existing diaphrams which are perished and require renewing.

d) approximately 60% of the demanded diaphrams are urgently needed so that the gas supply system may be operated safely and efficiently.

e) gas supply to sections of the system may have to be curtailed.

f) substitutes cannot be suggested for the efficiency of the system.

g) weight approximately one ton.

SUBJECT : Diaphrams for Naples Gas Works
Requisition MGS-258-ENG

TO : Headquarters, Allied Commission, APO394
(Attn. Economic Section, Supply & Resources Div.)
Commerce Sub-Commission)

REF : AC/5300/Commerce 5th and 27th January .

1. Attached is a copy of MGS-258-ENG covering your request for 746 spherical diaphrams for use at the Naples Gas Works. The possibility of manufacture is being investigated.

2. Considerable difficulty was experienced in processing this requisition since the miscellaneous internal AC correspondence forwarded did not contain all essential information. Correct procedure is to submit Form 400 giving detailed specifications, and use, and justification. The suggested source of procurement was helpful.

3. The necessary additional information has been secured directly from Southern Region and you will be advised when a decision is reached.

SUBJECT : Oxygen and Acetylene Issue to Civilians

TO : ADOS, RAAC, Ordonance (British)

1. Your letter Ref. OS/100/8/2, dated 13 Feb. 45 refers

2. This Sub-Commission agrees that the system as outlined in your letter under reply, for obtaining release of these commercial gases is unsatisfactory, and it is appreciated that the request contained in the letter from Societa Chimica dell'Aniene has been met.

3. With reference to para 5 of your letter, it is agreed that in the future the procedure you outlined will be followed and that approved request will receive the usual AC release order issued by this sub-commission on which it will be stated that supplies can only be obtained against payment and upon civilian firms providing their own containers. Such release orders will be addressed to your office for attention.

4. It is noted that the prices to be charged are as follows:

Acetylene	35	Lire per cubic meter
Oxygen	44	" " " "

5. It is understood that a periodic bulk allotment of gases will be made to AC, and as soon as the required figures are received from the Ministry of Industry, Commerce and Labor, this Sub-Commission will advise you of the estimated quantity required for a given period.

SUBJECT: Acetylene and Oxygen

TO : Headquarters, Allied Commission, APO 394
(Attn: Public Works & Utilities Sub-Commission)

1. Reference your letter 301/PWU of 10 January requesting P.B.S. to supply 12 cylinders of Oxygen and 6 cylinders of Acetylene. This matter was referred to the British Services by your 2nd Ind undated.

2. Ordnance (British) AFHQ has advised as follows:

(a) Position is as follows. Supply of oxygen and acceptance could if necessary be made available from TERM - the need however is not understood. At present some 40% or more of the output of the ROME gas plants is allocated to civilians by ADOS ROME by direct individual recommendations from HQ AC. Negotiations are now in hand between ADOS ROME and HQ AC whereby the latter is to be given a bulk monthly allocation and will sub-allocate it (to WD contractors and sponsored public utility concerns only) as it sees fit. It is not clear why the requirement cannot be found from this source.

(b) Under no circumstances would it be possible to provide any cylinders, the present shortage being so great that it is necessary to juggle stocks from float to float to keep the Armies and Base Workshops going.

3. It is requested that you confirm that your requirement can be met from the above mentioned allocation. If such is not the case please furnish the basis of your demand and advise whether the AC can furnish cylinders.

Subject : Maintenance Material for Italian Power Plants
(Requisition AC-ENG-72-45)

To : Headquarters AC APO 394
Supply and Resources Section

Reference your RD-400/162 of 15 January

1. Requisition AC-ENG-72-45 has been screened by the interested staff sections of this headquarters.

2. Material in columns headed "Southern Italy) and "Central Italy" will be forwgrded to the CCAC for consideration as Category A requirements with rating two, under requisition No. MGS-261-ENG.

3. It is noted that no provision is made in this requisition for Northern Italy. It is considered that the above mentioned supplies will be available to meet urgent requirements of the North if it is determined at the time of receipt that Northern demands are more immediate.

4. Material for rehabilitation electrical power in Sicily and Sardinia for a period beginning six months to one year after May 1945 has not been determined to be a matter of military responsibility, and it is suggested that this portion of the requisition be submitted under Category B procedure. In our request for allocation of supplies for the mainland, we intend notifying the CCAC that the AC has this under consideration.

5. No items are at present available from theatre stocks. However we intend to request further investigation, and you will be advised of availabilities. The forwarding of the requisition for mainland requirements will not be withheld pending such determination.

Declassified E.O. 12356 Section 3.3/NND No. 785019

JUSTIFICATION:

Items on this requisition are vitally necessary for the Italian Electrical rehabilitation program now being carried out, which program is estimated to occupy six to twelve months to complete.

SICILY - SARDINIA :

This portion of total Italian requirements under consideration by A.C. for submission as a Category 'B' program.

SOUTHERN ITALY:

Transformers are out of commission and can only be recommissioned when repairs have been effected. Insulating materials necessary. In addition war damaged plants which are scheduled for restoration under present programme cannot be restored, unless insulating materials are provided, also a large hydro alternator (18000 KV) of the Sila group is out of commission and cannot be re-commissioned until insulating repairs are carried out, this latter, means that the steam station Naples has to carry the additional load of the South which in turn means extra fuel oil consumption.

CENTRAL ITALY :

War damaged plants scheduled for restoration under the present programme can only be restored when provided with insulating material, and many transformers and alternators are in workshops dismantled, but further work is suspended until insulating material is provided. Quite recently the burn out of a 8800 KV Alternator has caused the cutting down of the power to Rome, this set is dismantled and waiting for the provision of insulating material.

Insulating materials is of first importance to the rehabilitation and restoration of the Italian electrical system. Hydro electric plants effected:

LARIRILLO	AVENTINO	SILA	MATESE
TIVOLI	FONTECUPA	CRICHELLA	PESCARA
MORINO	PONTE A PIAVE	TERNI GROUP	
FARFA	CEPRANO	CANTERNO	

It is now impossible to find any of the material required in the open market, as the Allied occupied country has now been thoroughly combed and drained of all such material.

Much rehabilitation work is at a standstill due to the lack of essential material. Delivery during the next six months will enable important progress to be made and future programs planned.

RATING : T.O

LANDED COSTS: It is requested landed costs be despatched to arrive before receipt of shipment.

Declassified E.O. 12356 Section 3.3/NND No. 785019

present programme cannot be restored, unless insulating materials are provided, also a large hydro alternator (18000 KW) of the Sila group is out of commission and cannot be re-commissioned until insulating repairs are carried out, this latter, means that the steam station Naples has to carry the additional load of the South which in turn means extra fuel oil consumption.

CENTRAL ITALY :

War damaged plants scheduled for restoration under the present programme can only be restored when provided with insulating material, and many transformers and alternators are in workshops dismantled, but further work is suspended until insulating material is provided. Quite recently the burn out of a 8800 KW Alternator has caused the cutting down of the power to Rome, this set is dismantled and waiting for the provision of insulating material.

Insulating materials is of first importance to the rehabilitation and restoration of the Italian electrical system. Hydro electric plants effected:

LAGHERALLO	AVENTINO	SILA	ALTESE
TIVOLI	FONTECUPA	ORICHELLA	PESCARA
MORINO	PONTE A FIUME	TERNI GROUP	
FANFA	CIPRANO	CANTIRNO	

It is now impossible to find any of the material required in the open market, as the Allied occupied country has now been thoroughly combed and drained of all such material.

Much rehabilitation work is at a standstill due to the lack of essential material. Delivery during the next six months will enable important progress to be made and future programs planned.

3A30 Battery BA - 30 on nil --- 500

DELIVERY: Rome Warehouse - Electrical Division, Public Works & Utilities Subcommission, HQ, Allied Commission, APO 394.

JUSTIFICATION: These batteries are required to make up complete units, because batteries received under requisition RMS-217-SIC dated 25 Sept '44 were found to be contaminated with water. The complete flashlights are for issue to Public Utility Companies and the issue cannot be completed until additional batteries are supplied.
It would appear that the batteries have been water logged for some time since some are completely rusted through.

None	Compressed Asbestos Fibre sheet packing blended with superior resisting compounds 3/32" thickness	sq.yds	nil	---	50	100 sq yds
None	High pressure wire insertion Asbestos heat resisting cloth 1/8" thickness	sq.yds	nil	---	50	100 sq yds

DELIVERY: Duko - Public Works & Utilities Subcommission, Allied Comission.

JUSTIFICATION: This material is very urgently required in order that the steam station of Capuena Naples may continue to operate efficiently. All stocks have been used up and it is impossible to find any more in the open market. The above quantities are sufficient for 3 - 6 months maintenance and it is suggested that they may be obtained through Engineer or Naval Channels in order to keep the boilers operating until imports can be effected.

None	Crystal glass water gauge tubes for Springfield Boilers Length 555 mm - external diam. 20 mm Internal diam. 12 mm.	ea	---	---	100
None	Crystal glass water gauge tubes for Babcock and Wilcox boilers Length 420 mm External diam 19.5 mm Internal diam 11.5 mm	ea	---	---	150
None	Water tubes for above boilers length 6.50 metres external diam 76 mm suitable for pressure of 26 atmospheres.	ea	---	---	200

DELIVERY: DUKO - Public Works & Utilities Subcommission, Allied Commission.

JUSTIFICATION: The above material is required urgently for the Steam Station of Capuana Naples. All the stocks have been used up and it is now impossible to find or put into manufacture in this country. Capuana is the most important steam plant in Southern Italy and it is in operation daily, it being the only plant that Naples can depend upon in the event of interruption of the southern network. The capacity of Capuana is 40.000 KW, this will be a serious loss to the Southern system in the event of the station being forced to shut down. Shipment is requested at an early date.

SUBJECT : Trisodiom Phosphate ex "SS JOHN CLARKE",UGS50-BA 450

FROM : Port & Warehouse Division

TO : Public Works & Utilities(Att.Maj.Price)

1. The A/M ship completed discharge in Leghorn on 30 Oct 1944.

2. No advice was received from G-5, AFHQ, that this cargo was aboard the CLARKE and intended for ALCOM.

3. ALCOM Port Liason Officer, Leghorn, is being instructed (see attached letter) to attempt to find cargo in Leghorn.

4. Results of the investigation will be sent to Public Works and Utilities Sub-Commission.

SUBJECT : TRISODIUM PHOSPHATE ex "SS.JOHN CLARKE",UGS 50-BA 450

FROM : Port & Warehouse Division

TO : ALCOM Port Liason Officer,Depot 12L50,Leghorn
(Att.Lt. Mitchell)

1. The A/M vessel completed discharge in Leghorn 30 Oct 44.

2. Advice has just been received that it carried the following(NOT previously advised):

180 drums Tri-Sodium Phosphate 100 Lbs each net
19449 lbs gross wt., marked-BOWL 49 Eng.IV TOC 660 PAA

3. Request that every effort be made to recover this cargo. It may be found at the Eng. Depot in Leghorn. Apparently the original lack of advice was due to a typographical error on the manifest, as markings were shown POC instead of TOC.

4. Report findings to this HQ.

21 January 1945

SUBJECT: 18,000 lbs Trisodic Phosphate ex JOHN CLARKE
(UCS 50/PA 450)

TO : Headquarters, Allied Commission, APO 394

1. It is understood that the above is claimed by CCAC and copy of relative manifest is attached.

2. The manifest was produced after further enquiries had been made by this Section and it will be noted that the mark is given as "ENG IV POC 660 PAA". However, it is believed that this concerns one item of MEG-151-CM, ordered in I 23773 of 1 June 1944, as BOWL-ENG-IV TCC- F 434.

3. ENGR, AFHQ state that the requisition has not been processed through Engineers.

4. If the phosphate is in fact traced and delivered to AC this Section should be informed so that the relative records may be adjusted.

SUBJECT : Justification for Timber to be placed on Restricted List of Materials.

TO : Public Works and Utilities Sub-Commission, A.C.

FROM : Industry Sub-Commission.

1. The following timber dimensions are to be placed on the list of Restricted Materials.

2. Bulk timber in : fir, larch, pine, chestnut. Average sectional dimension not less than 15 cms.

Sawn timber in : fir, larch, pine, chestnut. Of a thickness of 30 m/m or more.

Fir, larch, pine, and chestnut beams. Sectional dimension not less than 7 cms. x 7 cms.

Fir, larch, pine, and chestnut slats regardless of dimensions.

3. The justification for such dimensions to be placed on this list must reach Commerce Sub-Commission A.C. (Maj. Wood) by 31st January if it is to be considered at the Engineering Materials Committee meeting which takes place 1st Feb. 1945.

REQUISITION

Maj. Price's Office
P.W. & U.-Elect. Section

To: ~~ELECTRIC SECTION REQUISITION BRANCH~~ No. of Sheets one Sheet No. one

Requisition No. 306/1WU Date 1/2/45 Period February - March

SHIP TO PUBLIC WORKS & UTILITIES SUB COMMISSION HQ A.C. APO 394
Electrical Division

REQUISITIONED BY (show Signature, Rank, Organization, Destination. If different from "ship to" include address):

L. G. PRICE
MAJOR RE
Electrical Division
P.W. & U. S/C

APPROVED BY:

STOCK No.	ARTICLES	UNIT	ON HAND AND DUE	CONSUMED	REQUIRED	APPROVED
3 A 30	Battery BA - 30	ea	nil	---	500	

SHIP TO : PUBLIC WORKS & UTILITIES SUB COMMISSION HQ A.C.
Electrical Division
APO 394

JUSTIFICATION : These batteries are required to make up complete units, because batteries received under requisition MK3-217 Sig Dated 25 Sept.44 were found to be contaminated with water. The complete flashlights are for issue to Public Utility Companies and the issue cannot be completed until additional batteries are supplied.
It would appear that the batteries have been water logged for some time since some are completely rusted through.

INSTRUCTIONS FOR PREPARATION OF REQUISITION

Space "TO."—To show the approving office to which requisition is submitted.

Space "PERIOD."—Show period for which the supplies are required.

Space "SHIP TO."—Full shipping address to be given. Where mail address is different from shipping address the former should also be shown, e. g., "Q. M., Fairfield Air Depot, Osborn, Ohio. Mail address, Fairfield." Except for established camps, posts, or stations, street or building address should be shown, e. g., "C. O. 328th Inf., National Guard, 156 Republic Bldg., Grand Haven, Mich." Where the property is to be invoiced to an organization, etc., different from that to which it is to be shipped, the required information will be shown.

Space "STOCK No."—Show stock number listed in Federal Stock Catalogue.

Space "ARTICLES."—Include sizes required. Show purpose numbers applicable to an article or group immediately above the article or group concerned.

Space "ON HAND AND DUE."—Show the quantity on hand plus the quantity approved on previous requisitions and not yet received.

Space "CONSUMED."—Show quantity consumed during the previous period.

Space "REQUIRED."—To be the quantity asked for by the requisitionist.

Space "APPROVED."—To be the quantity approved by the approving officer.

This form may be used in lieu of Q. M. C. Forms Nos. 402, 409, and 410 by appropriate modification.

IN THE SPACE BELOW SHOW BASIS FOR REQUISITION, i. e., Strength of Command, Number of Animals, Number of Animal-Drawn and Motorized Vehicles, Armament, or such other data as may be required by instructions issued by approving authorities.

REQUISITION

Maj Price's Office
P.W. & U. Elect. Section

To: ECONOMIC SECTION REQUISITION BRANCH No. of Sheets one Sheet No. one

Requisition No. 300/PWU Date 1/2/45 Period Jan- June 1945

SHIP TO NAPLES

Requisitioned By (show Signature, Rank, Organization, Destination. If different from "ship to" include address):

L. G. PRICE
MAJOR RE
Electrical Division P.W. & U.
S/C

Approved By:

STOCK No.	ARTICLES	UNIT	ON HAND AND DUE	CONSUMED	REQUIRED	APPROVED
	Compressed Asbestos Fibre Sheet packing blended with superheat resisting compounds 3/32" thickness	sq.yds	nil	---	50	
	High pressure wire insertion Asbestos heat resisting cloth 1/8" thickness	sq.yds	nil	---	50	

JUSTIFICATION : This material is very urgently required in order that the steam station of Capuana Naples may continue to operate efficiently. All stocks have been used up and it is impossible to find any more in the open market. The above quantities are sufficient for 3 - 6 months maintenance and it is suggested that they may be obtained through Engineer or Naval Channels in order to keep the boilers operating until imports can be effected.

Declassified E.O. 12356 Section 3.3/NND No. 785019

REQUISITION

JUSTIFICATION: Italian Electrical

Items on this requisition are vitally necessary for the rehabilitation program now being carried out which program is estimated to occupy six to twelve months to complete and covers Sardinia, Sicily, Southern and Central Italy.

SICILY - SARDINIA:

Transformers are out of commission and can only be recommissioned when repairs have been effected. Insulating materials necessary.

SOUTHERN ITALY:

Same remarks apply, in addition, war damaged plants which are scheduled for restoration under present program cannot be restored, unless insulating materials are provided, also a large hydro alternator (18000 KW) of the Silla group is out of commission and cannot be re-commissioned until insulating repairs are carried out, this latter, means that the steam station Naples has to carry the additional load of the South, which in turn means extra fuel oil consumption.

CENTRAL ITALY:

War damaged plants scheduled for restoration under the present program can only be restored when provided with insulating material, and many transformers and alternators are in workshops dismantled, but further work is suspended until insulating material is provided. Quite recently the burn out of a 8000 KW alternator has caused the cutting down of the power to Rome, this set is dismantled and waiting for the provision of insulating material.

Insulating materials is of first importance to the rehabilitation and restoration of the Italian electrical system. Hydro electric plants effected:

TERNI	AVENTINO	SILA	MATESE
TIVOLI	FONTECUPA	CRICHELLA	PESCARA
NORIMO	PONTE A FIUME	TERNI GROUP	
PADUA	GERMANO	CANTERNO	

It is now impossible to find any of the material required, in the open market, as the Allied occupied country has been thoroughly combed and drained of all such material since the Allied occupation.

Much rehabilitation work is at a standstill due to the lack of 5399 material. Delivery during the next six months will enable important progress to be made and future programs planned.

All items on this requisition have been discussed with the Chief Engineer, AFHQ.

Insulating Material

To : C E AFHQ

1. Insulating material requisitioned under the above number is arriving in this theatre at intervals in various ports and it is necessary that each shipment is transferred to the depot at Naples for easy disposal, Naples being the port designated on the requisition.

2. Much important work of reconstruction and electrical rehabilitation depends upon the early arrival of insulating materials and shipped to the port mentioned on the requisition in order to avoid delay and loss.

3. Recently a large shipment arrived and was transferred to the Naples Warehouse, during transfer 15 (fifteen) cases were lost, total 1½ tons (see attached Memos) and we notify you accordingly in order to stress the importance of giving urgent attention to the requisitions for insulating materials that are being prepared and forwarded to you in the course of a few days.

4. This Sub Commission will be glad to have your assurance that requisitions for electrical material forwarded to you will receive urgent attention so that losses, as in this case, do not too seriously delay the programme of rehabilitation.

W.M. LAPPER, Lt.Colonel
Chief, Electrical Division

SUBJECT: Cement - Control of Distribution

TO : Ministry of Industry, Commerce and Labour
(Attn. Dr. Pellegrini)

1. The following is a suggested method whereby immediate releases of cement, to the extent of availability, may be made by you and this Subcommission from Italian controlled cement works, whilst at the same time a check is kept to prevent releases from exceeding production and assures supplies always being available upon the arrival of transport at the works for collection.

2. Attached is a schedule of estimated output from the six factories named thereon, and which, of course, depends upon availability of coal and power.

3. These factories are required, in terms of your Circular no. 10, page 3, para. 9, to declare the stock on hand at the end of the month concerned and the estimated output for the following month.

4. Provided with this information, the suggestion is that 50% of this cement be allocated by you and 50% by this Subcommission. A copy of the relative release orders to be exchanged for record purposes and bidding for transport when necessary.

5. This Subcommission continues to receive urgent demands from AMG territory where Uffici Provinciali dell'Industria e del Commercio do not yet operate, as well as from other AC Subcommissions, and until such time as the present phase merges into complete interministerial control, it would seem that a method of dual releases is necessary in order to speed up the release of cement.

539

Declassified E.O. 12356 Section 3.3/NND No. 785019

6. A point it is desired to bring up at this juncture for consideration is the one concerning conservation of transportation and it is recommended that Allied Military requirements in Southern Italy might continue to be met, to an extent to be agreed upon, from the Italian controlled factories at Barletta and Taranto, upon the understanding that a quid pro quo release of cement be made from Allied military controlled factories in propinquity to places where cement is needed for civilian requirements.

7. It will therefore be appreciated if you will be so good as to treat this matter as urgent and, if in agreement with the above proposals, you will furnish this Subcommission with the information referred to in para. 3 above. A representative of this Subcommission would then contact your nominee and the necessary details could be worked out without further delay, whilst, at the same time, the military authorities concerned would be contacted with a view to obtaining their opinion on the point raised in the foregoing paragraph of this letter.

Yours truly,

W. P. EVANS
Colonel
Director
Commerce Subcommission

SUBJECT: Allied Commission Requisitions - 1 January 45.

TO : Asst. C/S, AFHQ, G-5 Section.
Attn: Economic & Supply Division.

1. Following is a monthly report relative to Allied Commission's requisitions, filled, submitted, and receipts of shipments for the month of December.

2. Based on reports received by this office, the following requisitions have been filled during the past month of December (this report does not include requisitions for food or medical supplies):

WRB-123-QM
WRB-163-QM

3. Based on reports received by this office, the following is a list of shipments made against Allied Commission requisitions during the month of December:

Item	WRB Requisition	Remarks
	UCS-60	
Transformer Bushings	104-INC-	485 lbs - BA-606
Paint, deck, grey	105-6-7-QM	11 DWT - BA-608
Phosphorous Sesquisulphur	137-QM	10 DWT - HR-155
Bag, paper, cement	179-QM	25 DWT - HR-350
Coal Tar, refined	105-6-7-QM	31 DWT - BA-606
Wire, steel, baling	127-MIG	45 DWT - BA-606
Phosphate Rock	12-PHOS-GEN-44	8,760 DWT - (Gaeta-Lacydon (HR-847
Paper, various	178-QM	189-DWT - (HR-350 (BA-606
Paper, grade A.	178-QM	17 DWT - HR-347
	UCS-61	
Paint	105-6-7-QM	116 DWT - BA-621
Paper, printing-offset	124-QM	47 DWT - BA-621
Paper, text book, binding	124-QM	47 DWT - BA-621
Paper, printing	124-QM	18 DWT - BA-621
Paper, writing, ground wood	178-QM	29 DWT - HR-378
Wire Steel-baling	127-MIG	44 DWT - HR-378
Phosphates	12-PHOS-GEN-44	750 DWT - Palagosa

5989

Declassified E.O. 12356 Section 3.3/NND No. 785019

Item	WPB Requisition	Remarks
File, steel-hand	127-[illegible]	1,677 lbs - BA-621
Dye, stuff, black	82-[illegible]	2½ CWT - BA-621
Paper, carbon	129-[illegible]	1,637 lbs - BA-621
Needles, machine	143-[illegible]	1,500 Pkg - BA-621
Needles, hand	141-[illegible]	6,000 Pkg - BA-621
Linotype, parts	139-[illegible]	982 lbs - BA-621
Thread, cotton-binding	124-[illegible]	2,924 lbs - BA-621
Pins, common No. 4	129-[illegible]	316 lbs - BA-621
Transformer, bushing	104-[illegible]	2,672 lbs - {BA-621 / BA-625
Tires	187-ORD	34 DWT - BA-621
	WPB-62	
Wire, steel-baling	127-[illegible]	90 DWT - BR-916
Cigarette, paper	162-[illegible]	30 DWT - BR-916
Tires	187-ORD	16 DWT - BA-638

4. The following requisitions have been submitted to G-5 Section, AFHQ, during the month of December '44:

A.C. Recn. No.	Date	Item
*AC-MISC-52-45	30 Nov 44	Flints
AC-MISC-53-45	2 Dec 44	Cigarette Making Machines
AC-[illegible]-54-45	1 Dec 44	Lignite mining equip.
AC-[illegible]-55-45 (WPB-224-SIG)	1 Dec 44	Bulbs for miner's lamps
AC-[illegible]-56-45 (WPB-242-[illegible])	1 Dec 44	Clothing
AC-ORD-57-45	4 Dec 44	Rubber tire material
+AC-ORD-58-45	4 Dec 44	Vehicles, control
AC-ENG-59-45 (WPB-241-ENG)	5 Dec 44	Pickers
AC-ORD-60-45	7 Dec 44	Sheet, asbestos
AC-MISC-61-45 (WPB-245-[illegible])	7 Dec 44	Seals, oar
AC-SIG-62-45	9 Dec 44	Communications matrl.
AC-SIG-63-45	12 Dec 44	Rectifier
AC-ENG-64-45	22 Dec 44	Sicilian Sulphur Mine-Supplies
AC-ORD-65-45	22 Dec 44	Tire repair material
AC-MED-66-45	23 Dec 44	Sulphur Mine Supply (Ancona & Pesaro Provinces)
AC-ENG-67-45	26 Dec 44	Pumping Units
"AC-ORD-68-45	28 Dec 44	Trucks
AC-ORD-69-45	28 Dec 44	Vehicle, control
AC-ENG-70-45	26 Dec 44	Sulphur Mine Supplies(S.Italy)

*Returned to A.C. Not considered to be a military responsibility.
+Replaced by requ. AC-ORD-69-45.
"This requisition was substituted for ACC-ORD-45-45.

24 August 44

SUBJECT: Repair Materials - Terni Co., Power Stations.

TO : Director, Public Works & Utilities Subcommission.
Attention: Lt. Col. Lapper.

1. Reference is made to your letter ACC/142/IWU dated 22 August 44 requesting submission of requisition for repair materials for Terni Co. hydro-electric plants.

2. Requisition cannot be submitted on the basis of information contained in your letter. See AFHQ letter AG 400.1 (AMGOT) MES-AGM dated 11 March 44 relative to general data which must be included in every requisition.

3. For your guidance in resubmitting request, the following specific data must be given before this Division will submit requisition for those materials:

a. Data on materials:

(1) This Division will,accept only requests for materials whose dimensions and requirements are given in terms of units of measure of the U.S. Bureau of Standards (that is, in pounds, feet, gallons, etc.). Requirements or descriptions in metric units will not be accepted. See our letter RD-400.12 dated 24 April 44 on this matter.

(2) General descriptions of items are not considered sufficient. TOO MUCH INFORMATION CAN NOT BE PUT ON A REQUISITION. Experience of this Division indicates that the attitude that materials should be described in general terms in order to give flexibility in substituting and replacing materials is not to be taken. State in detail what you want, and suppliers in the U.S. and the U.K. will know what materials can be substituted for the items listed. To assist subcommissions in preparing requisitions, this Division has acquired a large library of manufacturers catalogs. The following catalogs covering materials listed in your letter are available for use in the Requisition Division:

Insulating Materials:
Westinghouse Electric & Mfg. Co.
Insulating Varnishes:
Westinghouse Electric & Mfg. Co.

5387

Declassified E.O. 12356 Section 3.3/NND No. 785019

General Electrical Materials:
Grayber Electric Co.
General Electric Supply Co.
Packings:
Johns-Manville Packings Co.
Garlock Packing Co.

(3) With reference to items "transformer insulating oil," "lubricating oil," and "oil for regulators and turbine bearings," contained on your list, channels for these items are still through Fuel Section, Commerce Subcommission, to Petroleum Section, AAI.

b. Basis for requisition:

(1) What amount of power is generated by these plants?

(2) What essential industries or utilities are supplied? Where are plants?

(3) What will happen if materials are not received?

(4) On what sort of survey are these requirements based?

(5) What in last date on which shipment will be accepted?

(6) Have efforts been made to obtain materials locally?

4. It is assumed that the hydro-electric plants of the Terni Co. are not the only plants requiring these materials. Requisition should be submitted for overall requirements, not on piece-meal basis.

5. Your letter of 22 August 44 is returned herewith.

ROBERT A. MARTINO,
Lt. Colonel. S.R.,
Division Chief.

Enc: Ltr ACC/11.2/PWJ, dtd 22 Aug 44.

Subject : RELEASE OF ENGINEER STORES
from Factories Under DW Control

HQ Allied Commission

Copy to: CO 80 EBW (Information)
File 1701/DW

---

1. Cases are still occurring of civilians applying direct to TERNI steelworks for various items of steel. This procedure is incorrect and leads to waste of transport, and it is requested that the following procedure be brought to the notice of all concerned.

2; a) All steel demands for civilian use should be made primarily to the appropriate Sub Commissiion. If approved, these demands should then be consolidated and submitted to the Engineering Materials Committee of the AFLR (It) Board and should give tonnages of plates and sections required in accordance with the sizes in Steel catalogue issued by me.

b) After allocations has been made by the Engineering Materials Committee you should then forward the necessary details to me when I will release and notify you when and where the steel will be available.

c) You should then arrange the necessary movement quoting the Release Voucher No. on all correspondence and in the case of collection ex Works ensure also that the person responsible for collection has this necessary information.

3. Other materials of local production such as nails, cemnt and bricks are now being produced in controlled factories in sufficient quantities to meet military requirements only. Any of these materials therefore required for civilian use must be obtained from factories other than these, and no good purpose can be served at present in submitting demands to me. 537
Should these factories increase their production over and above military needs, you will be notified of the surplus capacity available, or complete factories will be handed back to your control as has been done in the case of some cement factories.

4. Any Engineer Stores which are imported into this country cannot be issued for civilian use without staff authority.

SIGNED D.L.ANDERSON
Brigadier
Director of Works

Declassified E.O. 12356 Section 3.3/NND No. 785019
