Richiesta di materiali

Ringrazio ancora vivamente per l'assegnazione del cemento che pero per ora non è ancora arrivato a Bari. Vi sarei infinitamente grato se vorreste interessarvi ad altre mie pratiche dato che la mia officina lavora esclusivamente per ordine militare e non vorrei per la mancanza di materiale fermare. Non so quali pratiche bisognera iniziare e sarei ben felice se potessi trattare con voi che avete preso cosi a cuore la mia iniziale domanda. Si tratta di materiale per officina e cioè:

Tubi Mannesmann per paratoie in tutto quintali 12 cosi divisi: da 1/2"-Qli uno, da 1" qli 2, da 1 1/2" qli 3, da 2" qli 3, da 3" qli 2 e da 4" qli 1= totale Qli 12.

Lamiere di acciaio possibimmente in fogli 3.5 x 2 quintali 220 esattamente cosi divisi: da mm 6 qli 100, da mm 4 qli 50, da mm 8 qli 70.

Lamierini magnetici per trasformatori con perdite molto basse da 1.2 a 1.4 = Ton.2. -

Sarò a Roma entro il mese e non manchero di venire a ringraziarvi personalmente,

Vito Bellomo

Réchiesta di materiali

Ho incarico un mio cliente, il signor Martignano, di recarsi alla Calce e Cementi per pagare il cemento assegnatomi. Spero che i vagoni partano presto e sopratutto che tutto arrivi qui in buone condizioni.

Voglio pregare codesta Commissione di voler completare l'assegnazione, rilasciandomi le altre 50 ton. come da mia richiesta precedente. Nel corrente mese di gennaio avro occasione di venire a Roma e non manchero di venire nei vostri uffici.

Vi sarei infinitamente grato se nel frattempo vorreste interessarvi ad alcune mie urgenti necessita. Qui a Bari e assolutamente impossibile ottenere i materiali necessari e vi assicuro che per la mia officina elettromeccanica e per poter metter mano ad importanti riparazioni i seguenti materiali sono dell'Urgenza piu' assoluta:

50 Kg. di Cartone presspann per alternatore
100 " di vernice nera isolante
15 Ql. Olio per trasformatori

Voglio sperare che non vi sara difficile ppvvedere a rilasciarmi i predetti materiali e nel ringraziare anticipatamente colgo l'occasione di salutare distintamente.

Vito Bellomo 0537

13 FEB 1945 806

Bari, 10 febbraio 1945

Spett. Commissione Alleata di
Roma
Sottocommissione Lavori Pubblici
Att. Maj.Price

Nella mia ultima visita a Roma accennai a vari materiali occorrenti all'andamento della mia officina e per la costruzione dell'ampliamento autorizzato dal Ministero dell'Industria e dal Chief Engineer N.2 Dist.

La mia visita fu bruscamente abbreviata causa la morte di mia madre e conseguente ritorno a Bari. Ora mi permetto elencare qui i materiali che mi occorrono urgentemente e che pur avendo tentato di ottenere attraverso il Ministero Italiano non e stato possibile neppure avere una risposta.

Ton. 2 di Olio lubrificante per turbine e motori,
" 6 di catrame bituminoso per la copertura di mq;3000 di superfice,
1.500 mq. di Retina occorrente alla volta SAP per affogare nell'asfalto per impedire al medesimo lo slittamento della stagione estiva,
Qli 1 di filo di ferro cotto da mm. 1,
Ton. 3 di lamierini magnetici con perdite da 1.1, 1.2, 1.3 e spessore "35/100 mm; o 5/10; cinque decimi misura piu adatta; Ton. 1;
Perni d'acciaio o ribadini diam 14 mm lungh.40 mm Qli. 2
" 15 " " 40 " " 1

Spero che potrete fare qualcosa al riguardo dato che qui a Bari è proprio impossible ottenere sul mercato il necessario, ed al Ministero ogni visita e richiesta rappresenta tempo perduto.

Ringraziando vivamente,

N.B. PER la mia Tenuta a S.Litardo-Chiusi mi occorrebbero 1.000 tegole e 1.500 mattoni pieni, potete interessarvi anche di questa richiesta e farmi sapere qualcosa al riguardo? Grazie ed in attesa di vostre istruzioni

Riferendomi alla mia precedente richiesta appoggiata dalle Suore Inglesi per le quali ho dei lavori in corso autorizzati dalla Santa Sede e permessi dal Genio mi permetto richiedere un ulteriore rilascio di cemento tipo 500 dalla Calce e Cementi di Segni.

Colgo l'occasione per rigraziare sentitamente per la precedente assegnazione confermando che il materiale richiesto serve esclusivamente per la casa delle orfanelle che mi stata data per contratto. Il restante materiale mi è stato fornito dal Vaticano e quindi mentre sarebbe per me un aiuto per continuare i lavori l'assegnazione di tale cemento sarebbe un'opra di bene.

Per qualsiasi informazione resto a vostra completa disposizione.

Saluti distinti,

Ugo Crova

Egt; Mag: Price
Public Work AC Roma

Prima di lasciare Roma desidero ancora ringraziarla insieme alla sua segretaria per tutte le gentilezze usatemi. Vado a Pimbino per la mia pratica e poi passero da Terni; per i lamierini magnetici.
Tornando a Roma ripassero nei loro uffici sperando di trovare... qualche altra pratica pronta. Grazie ancora.
Come ho spiegato a voce, desidero ora specificare per scritto quanto mi occorre del famoso ferro che c'e sulla piazza di Roma:

Ferro a L	40 x 40	Qli	25
" "	45 x 45	"	10
" "	60 x 60	"	40
" "	70 x 70	"	5
" a T	25 x 25	"	25 (in verghe)
" " "	25 x 25	"	15 (in paletta)
" Z "	30 x 30	"	2
" a T	50 x 50	"	8
" " U	40 x 36	"	6
" " "	80 x 46	"	4
" ø	8	"	20
" "	10	"	30
" "	12	"	16
		Qli	206

Questo materiale si trova Roma presso la Societa Prodotti Siderurgici e credo non sara difficile ottenere il rilascio perche la ditta e disposta a venderlo, molto volentieri; mi raccomando quindi a voi.
Ho telefonato anche alla Calce e Cementi per il vagone che non e arrivato, ma mi hanno spiegato che e solo a causa del disordine delle linee ferroviarie. Ho saputo che... ora avete a disposizione dell'altro cemento, ed io non ne potrei avere ancora 50 tonn. ve ne sarei proprio grato e vi assicuro (preg- dete questo come promessa) non vi secchero piu per "cemento"

Distinti saluti

R O MA

Vi sono infinitamente obbligato per la precedente assegnazione che mi ha permesso di iniziare i miei lavori qui in Bari. Vorrei puro che mi faceste una ulteriore assegnazione di 80 Ton; per permettermi di terminare i miei lavori.

Avendo anche uno stabilimento a Manduria, che vorrei ingrandire e per cui ho tutto il materiale meno il cemento, Vi sarei grato se per il prossimo marzo mi poteste assegnare 30 tonnellate, per dare inizio ai lavori , e susseguentemente 100 Ton; in aprile 150 in maggio. Il cemento dovrebbe arrivare per Ferrovia alla stazione di Manduria (Taranto).

Ringraziando nuovamente , distinti saluti.

Bellomo Gaetano

Risposta a nota del *N.* *Div.*

OGGETTO Assegnazione di filo di rame isolato.

Il Lanificio F.lli Tavani, con sede in Chieti segnala che dopo le riparazioni ai danni subiti dalla centrale in servizio del proprio opificio ha esaurito ogni scorta di filo di rame isolato a seguito dell'avvenuta bruciatura di due bobine di un alternatore.

E poichè la centrale stessa funziona in parallelo con le altre centrali sul fiume Verde, al fine di evitare ulteriori inconvenienti la ditta suindicata chiede l'assegnazione di 12 Kg. di filo di rame isolato per avvolgimenti da 32/10 e da 38/10 di m/m al fine di avere una sufficiente scorta.

Compatibilmente con le altre più urgenti necessità, prego esaminare se sia possibile effettuare tale assegnazione.

Subject : General Construction Material

To : Whom it may concern

1. This is to certify that the Firm Ferroben is contracted to carry out important work of both military and civil importance on behalf of Allied Commission namely :-

a) Reconstruction of Railway Bridge over the river Arno,
b) Reconstruction of Ceprano Hydro electric station

it is important therefore that no obstacles are presented to the Firm Ferrobeton to delay this work.

2. Both the above jobs are being delayed because of lack of building materials, early movement is therefore essential.

You are requested to submit to the Transportation Sub-Commission, Movements Division (Shipping) your estimated tonnage acceptances into Italian Mainland ports for July 1945 as per attached proforma.

Your estimated tonnages, should be based on the requisitions you have placed with, and accepted by the Requisitioning Sub-Commission, or any firm demands you have made to AFHQ or Washington for supplies for that month.

Please contact Lieut. J.H.Hazelton, Room 58(Annex) 8th Floor, phone 4830CBI, Ex.256, if you have any queries about this return.

You are requested to submit your reply to this Sub-Commission not later than Sunday, 11 March.

ASSOCIAZIONE ESERCENTI IMPRESE ELETTRICHE

Feb. 6, 45

Reference 13/G.Sl

Roma Via Boncompagni 14

To HQ AC P W & U S/C
(AttnCol Lapper)

Subject : Cetara Geothermal Plant (Ischia Naples)
(Soc. Forze Endogene Napoletane Via Imbriani 42 Naples

Dear Colonel

I beg to call your attention to the peculiar electrical situation in the Island of Ischia.

The problem itself is not very important, but I think it deserves your consideration, if only for its unusual features.

The electric service in the Island of Ischia is now carried out burning fuel oil (Diesel motors) mearly 25 tons of it every month.

But it exists a geothermal plant using the thermal underground water, at a temperature of 92 - 98° Centigrades, for heating an intermediate fluid (ethyl chloride) which drives the turbine - alternator unit. The plant, of an entirely new design, is now complete of all parts and, having an output of 250 KW can meet the whole demand of the Island. Only 2 Tons of ethyl chloride (C_2H_5Cl) are needed for starting operation of the plant.

This ethyl chloriae has been ordered time ago to "Farmaceutici d Italia" Co -Milan, but the material could not be delivered.

I beg you to have examined by your offices the possibility of importing from the United States the 2 Tons of ethyl Chloride which are needed. If this product can be imported, the plant will be able to work, amd at the same time the functionning of the present Diesel Plants will be discontinued. It ensues that the import, once for all of 2 Tons of ethyl chloride will avoid the necessity of importing 25 Tons of fuel oil, every month.

It is therefore evident that this operation is very advantageous, both so far as shipping tonnage and cost of energy are concerned.

Is any special request necessary for obtaining this import ? It is neddless to say that the company which owns the plant and I personally, are at your complete disposal for supply every information you may think necessary.

I will be bery grateful if you will let me know your opinion on the foregoing, and I thank you before hand

Truly yours

Signed Giovanni Silva

1 February 1945

SUBJECT: Tires

TO : Col. Thompson
Col. Lapper

1. I was called to a conference of the Allocation Board this morning where the question of distribution and allocation of tires was discussed.

2. In the first place it should be stated that there will be one tube with each tire.

3. The Board tentatively agreed to allocate to Public Works and Utilities Sub-Commission 100 jeep tires and 100 truck tires to be divided equally between public works and electrical plants.

4. We are to furnish a detailed statement showing the actual distribution made of these tires divided between:

(a) Contractors on highways
(b) Genio Civile
(c) Public Utilities

5. Will you please prepare a list showing how you will distribute the tires assigned to you so that I may be able to furnish the statement requested?

There will have to be paid for at landed cost.

We will not get any of the tires assigned to regions

Roma

Faccio seguito alla mia visita e richiesta verbale per confermare la domanda per una assegnazione di 200 Ton; di Cemento e 30 rotoli di cartone bitumato. Specie quest'ultimo materiale è assolutamente necessario e essendo fabbricato dalla Calce Cementi di Colleferro (Miniere di Serenizza) è sotto il controllo dell' A.C. e quindi rilasciato sollo dietro vostre assegnazioni.
Per il cemento ho provato di ottenerlo quaggiù ma fino ad oggi non è stato posibile avere alcun rilascio.

Tutto il materiale serve esclusivamente per la costruzione di impianti nel mio stabilimento.

Ringrazio sentitamente, distinti saluti.

Mario Panico

Cemento
Cartone bitumato

Sono venuto a Roma e mi sono presentato subito al Ministero dell'Industria per la mia richiesta di cemento. Però mi hanno detto che in questo momento non possono fare assegnazioni e che bisogna attendere- per il cartone bitumato non hanno nessuna disposizione.

Mi permetto quindi rivolgere a voi le mie domande nella speranza che vengano accolte ed evase.
Ho avuto l'autorizzazione di costruire, ma mi mancano i materiali necessari, cioè

200 Ton. di cemento § 120 T. subito e 80 in Marzo§ nonchè

3000 mq; di cartone bitumato, esattamente 30 rotoli da 100 mq.

Mi fermero a Roma qualche giorno e spero di poter sistemare il finanziamento dei materiali prima della mia partenza per evitare ritardi nella consegna o soste nei vagoni.

Ringrazio infinitamente

Leonardo Panico

Richiesta di cemento

Ho ricevuto dalle Suore Inglesi qui a Roma un piccolo lavoro di ricostruzione di una loro casa danneggiata dai bombardamenti. Ho trovato sul mercato il materiale occorrente, ma impossibile trovare il cemento perche controllato tanto dal governo italiano che dalla Commissione Alleata.

Il quantitativo occorrente e veramente minimo, esattamente quintali 25 (venticinque). Mi permetto rivolgere quindi a voi la mia richiesta nella speranza che sia bene accolta.

Ringraziando anticipatamente,

Ugo Crova

Date: Date:

REMARKS:

Form ACC-MAT No. 10.

Declassified E.O. 12356 Section 3.3/NND No. 785019

5 JUSTIFICATIONS:

The 620 Tons of Cement requested on this Form is required in order to construct a Bridge over the Fiora River at Km.110+450, on route N° 1. The proposed construction plan has been laid out in such a manner that the present emergency built Military Bridge, will not be disturbed for this reason the Military Authorities, who have approved the proposed project, prefer to accept the risk of a washout of the temporary structure rather than to divert cement ermarked for other Military Projects.

Since the proposed plan of the new bridge covers a major road improvement, in addition to permanent rebridging the Fiora River, this Bridge should be built.

Therefore it is requested that this allotment of Cement be granted at once. The netire Tonnage can be accepted in one lot and paid by the contractor Impresa Ugo CALDERAI. However from the storage stand point it would be advantageous to authorize withdrawal by the month as shown on the face of Mat 10.

SUBJECT: Reconstruction bridge San Giovanni (Perugia)

Our Firm has been entrusted with the works of recon_ struction of the bridge San Giovanni at Perugia.

This work is considered of the highest military importance: it's approximatelly a twenty milion job and must be completed within five months.

In order to speed up the completion of our workshop on the spot it is necessary to obtain an allocation of ten railway wagons to tran_ sport from Rome (Tiburtina) to Bastia (Perugia) the following machinery and implements:

4 concrete mixers	of the weight	of kg.	1.300		kg. 5.200
1 screening machine	"	"	350		" 350
1 sand and graven washing machine	"	"	1.700		" 1.700
3 elevators	"	"	350		" 1.090
1 telepheric railway	"	"	1.000		" 1.000
1 hand saw	"	"	600		" 600
1 stone crusher	"	"	6.000		" 6.000
1 granulatore	"	"	6.000		" 6.000
2 pomps to draw water	"	"	200		" 400
50 mc. wood	"	"	700	mc.	" 35.000
400 ml. binario decauville	"	"	27	ml.	" 10.800
20 vagoncini in ferro	"	"	300		" 6.000
attrezzatura minuta	"	"			" 1.000
					kg. 75.100

2 Regiunto 31/1/45 } Emergenza Immediata 5/2 - 11/2

Declassified E.O. 12356 Section 3.3/NND No. 785019

This Firm asks you earnestly to allott at least two wagons right away and two wagons next week: the remaining six at the rate of two a week for the following three weeks.

Yours truly.

C. A. K. I. I. C.

[signature]

Major Price: This is a very urgent Project. Your efforts to obtain early release of Cars will be appreciated.

Per le vendite effettuate pel tramite della nostra Mandataria S. A. CONSORZIO DERIVATI VERGELLA di MILANO valgono le condizioni generali stabilite dai suoi listini. Per le vendite, invece, effettuate direttamente dalla ns. Società valgono le seguenti:

CONDIZIONI GENERALI DI VENDITA. — 1. Qualunque vendita è sempre subordinata alla nostra accettazione. — 2. Allorchè i prezzi sono indicati base, essi vanno maggiorati degli extra stabiliti dal listino extra. — 3. Sui quantitativi indicati negli ordini si riserviamo una tolleranza di peso del 5% in più od in meno. — 4. I termini di spedizione s'intendono sempre senza impegno. — 5. Qualunque ritardo nella consegna non darà mai diritto a penali, risarcimento di danni, annullamento di ordini, o riduzione di prezzo. — 6. Decliniamo ogni responsabilità qualora casi imprevisti o di forza maggiore ritardino od impediscano la esecuzione di un ordine o di parte di esso. — 7. Per eventuali contratti a termine le specifiche dovranno esserci rimesse entro il termine pattuito, trascorso il quale sarà in nostra facoltà sia di considerare annullata la quantità non specificata, sia di esigere le pronta spedizione. — 8. La merce, anche se venduta franco destino viaggia sempre a rischio e pericolo del Committente. — 9. Non si accettano reclami trascorsi 2 giorni dal ricevimento della merce. — 10. Per eventuali ammanchi il destinatario deve reclamare presso l'Amministrazione Ferroviaria entro il peso della merce in partenza riscontrato dalla Ferrovia. — 11. Sono riconosciuti validi soltanto i pagamenti fatti al nostro domicilio in Roma. 12. Il ritardo del pagamento anche parziale delle fatture oltre la loro scadenza dà luogo alla decadenza dello sconto, se pattuito, e alla immediata decorrenza degli interessi di mora in ragione del 6% annuo. E' in nostra facoltà, trascorso il termine di scadenza esigere tratto a scoperto. — 13. Se è convenuto il pagamento con effetti, il debitore deve fare il regolamento entro 15 giorni dal ricevimento della fattura. — 14. Le irregolarità o mancanza di pagamento ci danno facoltà di annullare il contratto, sospendere le consegne, o esigere garanzie, senza che il Committente possa avanzare pretese o riserve al riguardo. — 15. Tutti i materiali venduti rimangono di nostra esclusiva proprietà fino a quando non siano integralmente pagati. 16. Per qualsiasi controversia, il Foro Giudiziario competente è quello di Roma. — 17. Queste condizioni generali sono valide per tutti gli effetti di legge, intendendosi integralmente accettate dal Committente col conferimento dell'Ordine.

Ricevo oggi una lettera del Signor Lasorsa avvisandomi della sua richiesta di loo tonnellate di cemento nenessarie per i lavori qui in fattoria, ma io ho fatto fare un esatto preventivo per cercare di risparmiare un po di materiale e di cemento ne bastano ~~XXX~~ 75 (dico settanta cinque) tonnellate. Il Signor Lasorsa mi ha pregato di avvisare subito il loro ufficio in caso che ci fossero delle novita e credo che sia molto importante sapere in tempo che si possono risparmiare 25 tonnelate di cemento;

Oggi stesso faro un telegramma a Bari per avvisare del progetto fatto;

Distinti saluti

Il Fattore di S.Litardo

I just receive letter from Lasorsa advising his request for 100 Tons to be used on work here in the Factory; but I have just made a plount and accordingly this Plan the exact need of cement is

SUBJECT : Release of CEMENT for the rehabilitation of Hydro-electric Plants.

TO : P.B.S. Engineer Section. APO 782

FILE N° : R4/ENG/50.1 (to quote in reply)

Referring to a suggestion of AC HQ COMMERCE SUB-COMMISSION we make an application to you in view to obtain at least a contribution of the above mentioned material to ease the very difficult situation of Companies which have very important reconstruction works on electric power plants in course.

The requests were submitted to Commerce S.C. for the following quantities of Cement and in the following order :

September	11th	: 50 tons demanded by	A.C.E.A.
"	20th	: 10 " "	"
"	20th	: 180 " "	"
October	3rd	: 500 " "	S.R.E.
November	10th	: 10 " "	Centrale Elettrica-Isola del Liri (Frosinone)
Total		750 tons	

From this total of 750 tons of Cement
A.C.E.A. (Azienda Comunale Elettricità ed Acque) made request for 240 tons for urgent and important repairs on the hydro-electric power stations of Castelmadama and Salisano.
S.R.E. (Società Romana di Elettricità) made requests for 500 tons for rehabilitation of the power plants of Acquoria, Ceprano and Pontefiume.

These 740 tons of Cement are urgently needed by the two main Electric Power Companies for repairs on channels, galleries, anchoring blocks, foundations and other works requiring concrete structures and reinforced concrete supports, impossible to be done without cement.

A further quantity of 10 tons is requested by 592 Ing. Angelo Viscogliosi for the Hydro-electric Power station of Isola del Liri (Frosinone) as an urgent need for repairs.

May this office be advised if you deem it necessary to

MANUFACTURE OF CALCIUM CARBIDE

1. Calcium Carbide is at present in extremely short supply in Italy and in great demand for both Army and civil (Mining and Industrial) needs. No carbide has yet been manufactured in Liberated Italy due to the electric power situation and local stocks have already dwindled to practically nil.

2. For the manufacturing process, a continuous supply of electric power is not necessary; intermittent periods of power availability of eight hours or more can be utilized.

3. Two factories are at present capable of manufacture of carbide

a) Societa Industriale Carburo at Ascoli Piceno
and b) Elettrochimica di Papigno, at Terni.

The Ascoli Piceno plant can be discounted for the present as rail communication to and from the factory will not be established before May 1945. The Terni plant on the other hand is ready to go into production now and has raw material in stock sufficient for the manufacture of 2.400 tons calcium carbide.

4. The present potential production of this factory is 2.700 Tons/Month at which output the plant consumes 17.500 KW working 24 hrs day. The minimum practical load on the furnace is 10.000 KW and this for eight hours daily during off peak periods would give 600 Tons/Month product. At this output the factory has 4 month's stocks of raw materials on hand.

5. The sole material requirements during the first 3 or 4 months are electrodes and sheet iron for containers.

5923

a) Electrodes. The Soc. Ital. dei Forni Elettrici e dell'Elettrocarbonium has in stock materials for the manufacture of 500 Tons electrodes which should be sufficient for both the Terni Plant and the

Declassified E.O. 12356 Section 3.3/NND No. 785019

needs. No carbide has yet been manufactured in Liberated Italy due to the electric power situation and local stocks have already dwindled to practically nil.

2. For the manufacturing process, a continuous supply of electric power is not necessary. Intermittent periods of power availability of eight hours or more can be utilized.

3. Two factories are at present capable of manufacture of carbide

a) Societa Industriale Carburo at Ascoli Piceno
and b) Elettrochimica di Papigno, at Terni.

The Ascoli Piceno plant can be discounted for the present as rail communication to and from this factory will not be established before May 1945. The Terni plant on the other hand is ready to go into production now and has raw material in stock sufficient for the manufacture of 2,400 tons calcium carbide.

4. The present potential production of this factory is 2,700 Tons/Month at which output the plant consumes 17,500 KW working 24 hrs day. The minimum practical load on the furnaces is 10,000 KW and this for eight hours daily during off peak periods would give 600 Tons/Month product. At this output the factory has 4 month's stocks of raw materials on hand.

5. The sole material requirements during the first [illegible] months are electrodes and sheet iron for containers.

592

a) Electrodes. The Soc. Ital. dei Forni Elettrici e dell'Elettrocarbonium has in stock materials for the manufacture of 500 Tons electrodes which should be sufficient for both the Terni Plant and the Ascoli Piceno plant for 1945 on the assumption that the Terni plant can start in February and the Ascoli Piceno plant in May. The production of these electrodes could be completed in three months using 150 KW 8 hours/day for two months and 60 KW for 24 hours/day for third month.

b) Containers. 51 Tons/Month sheet iron is required for an output of 600 Tons Carbide/Month and this would be reduced in the proportion that empty containers were returned for refilling. The factory has its own drum making plant.

6. Production of carbide can therefore proceed at the rate of 600 Tons/Month as soon as electric power as scheduled below is allotted. Material requirements are also shown.

Declassified E.O. 12356 Section 3.3/NND No. 785019

Schedule "A" Calcium Carbide production
Power and Material requirements.

ITEM	1st Month	2nd Month	3rd Month	Future Monthly Requirements.

RISPOSTA AL

PISTOIA, 18 Gennaio 1944

OGGETTO Relazione sulle occorren=
ze immediate di questa Ditta per
ripristinare la propria Officina
per costruzione e riparazione di
Turbine Idrauliche e regolatori.

Questa Ditta particolarmente organizzata ed attrezzata per la costruzione di TURBINE IDRAULICHE e REGOLATORI, ha avuto il proprio Stabilimento Via Cammelli 16 Pistoia quasi completamente distrutto per opera delle Forze Armate Germaniche nel Luglio 1944.

Poichè l'organizzazione tecnica, i disegni, i modelli e la propria Fonderia in ghisa sono stati salvati, sta cercando di riprendere anche l'attività del reparto Officina, sia pure in misura limitata, per rispondere alle richieste delle varie Soc. Elettriche già Clienti di questa Ditta, relative alla riparazione o ricostruzione parziale od anche totale di turbine sinistrate che debbono essere sollecitamente rimesse in efficenza per essere in grado di produrre energia elettrica.

Fino quì la Ditta ha fatto ogni sforzo con i propri mezzi, impiantando motori a scoppio, coprendo con mezzi di fortuna una parte dei capannoni rimasti, rimettendo in efficenza una parte del macchinario meno danneggiato ecc. ma per portare a termine la sistemazione dell'Officina o meglio di un Reparto, che la metta in grado di poter lavorare anche i pezzi di grandi dimensioni e pesanti come occorrono per le Turbine, ha urgente bisogno del proseguimento di alcune facilitazioni e di alcune nuove concessioni:

I°) Assegnazione minima di Litri 600 (seicento) al mese per l'azionamento dei 3 motori a scoppio che debbono azionare le trasmissioni ed i forni, in luogo dei litri 300 attualmente assegnati, con proporzionale quantità di olio lubrificante.

2°) Autorizzazione alla utilizzazione di energia elettrica occorrente per la normale illuminazione della Officina ed Uffici e di una potenza di circa HP 4 a HP 5 per azionare piccole macchine come trapani elettrici portatili, rettifiche portatili, affilatrici, il cui comando non può avvenire con i motori a scoppio.

segue

Declassified E.O. 12356 Section 3.3/NND No. 785019

3°) Assegnazione di circa Qli 50 cemento, per fare le nuove fondazioni alle macchine e per riparazione di alcune parti vitali del fabbricato per le quali non è possibile adoperare calce.

4°) Assegnazione di circa 5000 embricini per ultimare la copertura del capannone centrale in acconto dei ventimila embricini occorrenti per la copertura dei capannoni rimasti utilizzabili e senza tener conto di tutti i capannoni distrutti;

5°) Mantenimento del permesso di circolazione della propria macchina Fiat 500 per recarsi in qualunque punto della Toscana ove sia necessaria la presenza di Tecnici per l'esame e la revisione degli impianti di Centrali Elettriche da riparare.

E' da considerarsi che le richieste suddette minime indispensabili per un primo passo verso la ripresa delle attività, sono ben modeste in confronto delle possibilità di produzione di questa Ditta che si possono compendiare come appresso:

Fusioni di getti di ghisa per Turbine fino al peso di Tonn. 4
Tornitura di alberi per turbine e per alternatori fino alla lunghezza di metri 8
Tornitura di grandi pezzi di turbine e di volani fino oltre metri 3 di diametro.

TRANSLATION

Pistoia, 18 January 1944.

SUBJECT : Report on immediate needs for reconstruction of Hydraulic Turbines and Regulators Manufacture.

Our workshops, specialized in construction of Turbines and Regulators, was almost completely destroyed by the Germans in July 1944.

The Technical organization, drawings, models, and Foundry have been saved and repairs are in progress in the factory, in order to be able to meet, as far as possible the demands of several Electric Companies for repairs or reconstruction (partial or total) of damaged Turbines, for production of electric power.

Up to now our Firm has done every possible effort with our own means, installing i.c. engines, reconstructing provisional roofs, repairing part of machinery etc., but, in order to be able to work on large and heavy parts, as are these needed for Turbines, we have urgent need of the following :

1) Allocation of at least 600 litres monthly, for the 3 i.c. motors operating in transmissions and furnaces, instead of the actual 300 litres, and a proportionate amount of lubricating oil.

2) Allocation of electric power, for lighting of workshop and Offices, and for 4÷5 KW necessary operate small implements, such as portable drilling machines, rectifyers, grinders, which cannot be operated by i.c. motors.

5423

Declassified E.O. 12356 Section 3.3/NND No. 785019

3) Allocation of about 50 quintals of cement, for construction of new foundations, and repairs on buildings which cannot be done by lime.

4) Allocation of 5000 tiles for covering one shed (20.000 are needed for covering sheds which can be repaired, excluding the destroyed ones).

5) Circulation permit for a car FIAT 500, necessary for visiting power plants.

The e/m demands are the minimum necessary to start work. Our firm is equipped for the following work :

Casting turbine parts up to 4 tons.
Turning turbine and generator shafts up to 8 m. length.
Turning large parts of turbines ant fly-wheels up to 3 meters in diameter.

(signed : Rinaldo CANTINI)

2 Copies for Maj Woods

Very Urgent.

FORWARDED
T.J. WALTERS
Lieut-Colonel
Prov. Commissioner

REPORT ABOUT THE VISIT OF THE ELECTRIC PLANT OF THE ESTABLISHMENT OF CERAMICA RICHARD GINORI COMPANY - VIA S. MICHELE DEGLI SCALZI PISA.

- The line at 7200 Volt for the supply of the Establishment, derived from the principal line Cabina Politeama - Cabin Hospital 5917 Cisanello is much damaged.

- The principal transformation cabin has the entrance small tower of the conductors at high tension, and the room at the first floor, much damaged by shellings.

- In the room of the transformers at ground floor there are:

  n. 2 transformers Westinghouse, three-fase in oil, with 85 KW, ratio 7200-4160/208 Volts, with two switches in oil.

  n.1 Siemens transfomer, three-phase in oil, 10 KW ratio 7200/195 Volt, 50 periods.

Declassified E.O. 12356 Section 3.3/NND No. 785019

C O P Y

The table of low tension for the command of the plant of motor power and light of the Establishment is intact and in good conditions.

The distribution plant at low tension in the Establishment can be repaired easily in the large huts undamaged by the war. On the contrary that in the damaged rooms is almoust completely destroyed.

In the department of the retorts the transformation cabin is almoust destroyed and the electric tools much damaged. There is:

No. 1 transformer three-phase in oil, type Scotti -Griocchi 137 KV ratio 7500-7300-7000/190 Volts and having : "possanti at low tension much broken and "1 possante" at high tension broken only at the basis.

The command table at low tension of the retorts, is in good conditions. There is not the settling self-transformers.

In the various departments there are:

1) In the mechanical work-shop:

No. 1 three-phase motor with 3,5 HP Volt 190
" 1 three-phase motor, but 1,5 HP for the functioning of the wind-valve of the iron mill.
Some damaged motors that cannot work, have been amassed in this work-shop.

2) In the room of the water well:

No. 1 three-phase motor 10 HP-Volt 190 for the functioning of the pump for the raising of the water.

3) In the mill-stones rooms:

No. 1 three-phase motor "Marelli" 10 HP for the functioning of the mineral mill stones.

No. 1 three phase motor 40 HP

No. 1 motor of very old type Gadda & C. Volt 150 Amperes 30

No. 1 three phase Marelli 7[illegible] HP Volt 190.

FABBRICA TESSUTI E FILATI LANA

DITTA LORETO D'AMBROSIO

ISOLA DEL LIRI (FROSINONE)

P. FROSINONE N. 7600 —

3n.600

Isola Liri 27 gennaio 1945

Spett. Headquarters Allied Commission Roma

A seguito dei danni di guerra subìti, la scttoscritta Ditta chiede l'assegnazione di q.li 100 di cemento resistenza 500 per la riparazione e ricostruzione dei seguenti fabbricati:

1) ricostruzione di una centrale idroelettrica (cabina e opere di presa d'acqua) distrutta da mine poste dai tedeschi;

2) riparazione di un'ala di fabbricato della sala macchine adibito a lanificio -colpito da bombardamenti aerei;

3) ricostruzione della sala tintoria e apprettaggio distrutta da mine.

Nella fiducia del benevolo accoglimento della presente la sottoscritta ringrazia e distintamente ossequia.

Sig. Roma Isola Liri
